## Index Harmonisation Methodology Change Implementation - Informative Notice

09 February 2024

---

FTSE/JSE would like to draw clients' attention to the [FAQ Document](#) that was published in October 2023. The document provided a detailed analysis of the impact of the methodology change in each of the indices as well as links to the market notices that have been published regarding the Index Harmonisation project.

In addition to the above mentioned document, an [Informative Notice](#) was published in June 2023 wherein FTSE/JSE announced that the implementation date for the alignment of the All Share weightings to SWIX weightings had been finalised. The effective date is from the start of business on the 18<sup>th</sup> of March 2024.

There will be no change to Index codes, Index names, historical data, file names or data products with Phase 1 of the project. The only change will be the free float values of a few companies. For the final phase, which is the termination of the SWIX Indices, there will be a number of changes, however this information will be communicated in detail in due course.

Please note, that the FTSE/JSE Africa Index Series [Ground Rules](#) reflecting the methodology change will be updated in due course. Index users are reminded that all methodology updates are subject to review and approval by the FTSE Russell Index Governance Board and will be considered in line with [FTSE Russell's Policy for Benchmark Methodology Changes](#).
