1 VERSION CONTROL

Version	Author	Date	Reason for Change
1.0	Market Data Team	May 2021	Initial Document Creation
2.0	Tshepo Modise	April 2022	Addition of the Base CPI and Link\Reference Index Fields in the Mixed Rate tabs of the Bonds Instrument Reference as well as New Bonds Listing data product.
3.0	Tshepo Modise	June 2022	Addition for Foreign Issuer Field in the Bonds Instrument Reference and New Bonds Listing Data products
4.0	Tshepo Modise	October 2022	Updated SLA time for Bonds Coupon Rate from 14:50 to 13:30
5.0	Tshepo Modise	November 2022	Add below changes <ul style="list-style-type: none"> • Add "LEI Code" Field on the Bonds Instrument General data product file (Daily & Monthly). • Add "LEI Code" Field on the New Bonds Listing General data product file. • Add "Pricing redemption date" field on the Bonds CA Event Schedule. • Update Coupon Rate Update files name by removing time suffix and replace it with Early & Late. • Add "ISIN" field on all Bonds Instrument Reference data product files. • Rename the field titled "ISIN" on the Bonds Reference Instrument data file to "Reference Instrument ISIN". • Rename the field titled "ISIN" on the New Bonds Listing Reference Instrument data file to "Reference Instrument ISIN".
6.0	Tshepo Modise	May 2023	Updated business descriptions of various fields
7.0	Tshepo Modise	August 2024	Update the delimiter field description from Semi colon to comma

Version	Author	Date	Reason for Change
8.0	Tshepo Modise	February 2025	<ul style="list-style-type: none"> • Addition of Fields to cater for ZARONA rate • Addition of note regarding republication of ZARONIA Rate in the Bonds Coupon Rate Update • Change of SLA time for early provision files for New Bond Listings and Corporate Actions Events Schedule.
9.0	Tshepo Modise	September 2025	<ul style="list-style-type: none"> • Change of SLA time for early provision files for New Bond Listings and Corporate Actions Events Schedule.
10.0	Tshepo Modise	February 2025	<ul style="list-style-type: none"> • Addition of fields to Bond instrument Coupon General and Corporate Actions Event Schedule

2 DISCLAIMER

This document is strictly for informational purposes solely for developing or operating systems for your use that interact with the market data systems of the JSE. The JSE reserves the right to withdraw, modify, or replace the specification (or any part thereof) at any time by means of a notice to contracted clients.

To the extent allowed by law, JSE does not (expressly, tacitly or impliedly) guarantee or warrant the availability, sequence, accuracy, completeness, reliability or any other aspect of any of the information contained in, linked to or distributed through these specifications, or that the information contained therein are up to date. Prospective subscribers that are interested in subscribing to either the daily or monthly data products must contact the Market Data Department in writing via MDSalesTeam@jse.co.za.

2.1 FTP SITE AND FOLDERS

The files are made available via the Information Delivery Portal (IDP), which is the JSE's primary client facing FTP server. IDP is access controlled so access requires an approved IDP user ID and password.

Access to IDP is facilitated via different protocols. Refer to the Information Delivery Portal Connectivity document for access and other pertinent information:

<https://www.jse.co.za/services/market-data/technical-documents>

2.2 USER ID AND PASSWORD

1. If you are a new IDP user, a representative from the JSE Market Data Sales Support team will provide you with your User ID and password.
2. On request, and if reasonable, more than one User ID will be provided to address primary and backup needs.
3. Depending on the nature of the use, we will provide a User ID suitable for manual human based access and/or a User ID suitable for automated system-based access. A human based User ID caters for manual access and is typically used as a backup to a system based access. The password for human based User IDs expire once a month and system based User IDs expire once a year.
4. An Account Manager from the Market Data Sales team will contact you to confirm receipt of the data file(s), User ID and Password.
5. The onus is on you to test as soon as you have received the above-mentioned information to ensure that you can successfully access the IDP server.

Should you experience any problems relating to the information communicated to you or the actual testing using the provided information, please contact the under-mentioned teams for assistance:

3 PRODUCT FAMILY

This document contains the product specifications for the following products that make up the family of Bonds Reference data products.

1. **Bonds Instrument Reference** - provides key reference data of all Debt Securities instruments that are listed instruments in the Bond Market.
2. **New Bonds Listing** - provides key reference data of all Debt Securities instruments that are in the process of being listed on the JSE Bond market but are not yet listed. Once the security is listed, its reference data will only be made available via the Bond Instrument Reference data product.
3. **Bonds Corporate Actions Events Schedule** - provides key upcoming corporate actions event data of all listed Debt Securities instruments.
4. **Bonds Coupon Rate Update** - product provides key upcoming Rate changes that affect all Debt Securities instruments listed in the Bond Market.

4 BONDS INSTRUMENT REFERENCE

The Bonds Instrument Reference data product provides key reference data of all *listed* instruments in the Bond Market. The bonds listed in this report are the primary driver in the SA Capital Market.

Because of the nature of the data, where some of the data has a one-to-many relationship, this data product comprises of a primary general section that contains common data and several secondary data sections where each section provides a complementary but distinct different set of related data.

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats. The Excel format version presents the data sections as Excel sheets while the CSV format version presents each data section as a separate data file.

The product is available at the end of each business day for daily data subscribers, with a copy of the daily product is made available at the end of the last business day of the month for monthly data subscribers. The SLA time for this data product is **16h20**.

To cater for historical retrieval, the daily and monthly data files for the last rolling 40 business days will be available on the IDP server with the historical data files suffixed with “_yyymmdd”.

Primary General Data section – Contains common data

1. Bonds Instrument General

Secondary Data sections – Each section contains related but different data

2. Bonds Instrument Redemption Schedule
3. Bonds Instrument Coupon General
4. Bonds Instrument Coupon Schedule
5. Bonds Instrument Callable Step Up
6. Bonds Instrument Market Listing
7. Bonds Instrument Split Maturity Schedule
8. Bonds Instrument Reference Index
9. Bonds Instrument Reference Instrument
10. Bonds Instrument Reference Entities
11. Bonds Instrument Guarantor
12. Bonds Instrument Mixed Rate

Data - Start Row		5	Data - Start Row		7

Detail			
Field Name	Field Description	CSV Column	Excel Cell
Universal Instrument Master Id	Unique ID assigned to any Instrument generated at the JSE.	1	A6
JSE Alpha Code	Primary JSE identifier for the Debt Security as defined by the Issuer. Also referred to as “Bond Code” or “Stock Code”. Is an alphanumeric field with a maximum length of 6 characters and always expressed in Capital Letters.	2	B6
ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa.	3	C6

	It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.		
Issuer Name	An entity, approved by the Exchange, that has issued Debt Securities on the Exchange under the Interest Rate Market	4	D6
LEI Code	Identify the Legal Entity. Legal Entity Identifier (LEI) is a 20-digit reference code used to uniquely identify legally distinct entities that engage in financial transactions as well as associated reference data	5	E6
Issue Type	Instrument type used to classify Debt Security Instruments. Types are as follows: <ul style="list-style-type: none"> • FXRN-Fixed Rate Note • FLRN-Floating Rate Note • MXRN-Mixed Rate Note • IDXLN-Index-Linked Notes • CRLN-Credit Linked Notes • STNT-Structured Note • ZCNT-Zero Coupon Note 	6	F6
CFI code	Classification of Financial Instrument code, an ISO (ISO 10962) identification standard used to define and describe financial instruments as a uniform set of codes for all market participants. The code is issued by the JSE as the accredited National Numbering Agency for South Africa. This is an alphabetic field with a maximum length of 6 characters.	7	G6
FISN code	Financial Instrument Short Name, an ISO (ISO 18774) identification standard that provides a consistent and uniform approach to standardise short names and descriptions for financial instruments. The FISN is not meant to be machine-readable, but to provide a short format for essential information about a security for human use.	8	H6
Issue Date	The date upon which a Debt Security is listed on the exchange.	9	I6
Listed/Unlisted Flag	Flag that denotes whether the Debt Security is listed on the exchange or not.	10	J6
Status	Indicates the status of the Listed Debt Security. The status are as follows: <ul style="list-style-type: none"> • Listed but pending coupon • Listed 	11	K6

	<ul style="list-style-type: none"> • Delisted • Matured • Called • Redeemed • Repurchased • Suspended <p>Note: A new instrument will be included in the file for the first time on the Issue date of the instrument with its status being 'Listed'. If the instrument status is updated to either Delisted, Matured, Called, Redeemed or Repurchased, the instrument will remain in the file up until the month-end date of that month that the instrument status was updated in.</p>		
Status Reason	Additional optional status information relevant for Suspension status.	12	L6
Nominal Amount	The nominal amount of Debt Security issued by the Issuer and placed in the market.	13	M6
Amount Authorised	The amount which the Board of Directors/ Company and JSE has approved for issue in respect of the Programme.	14	N6
Issue Price Format	Format of the Issue Price i.e. Rand or Percent.	15	O6
Issue Price	The price of a bond is equal to the present value of the expected cash flows. In BOND terminology, it is the Present Value (PV) of both the coupons and the Principal amount combined. The price at which investors buy the bonds when they are first issued, which will typically be approximately equal to the nominal amount. The net proceeds that the issuer receives are thus the issue price, less issuance fees.	16	P6
Maturity Date	<p>The date when the principal amount of a Debt Security becomes due and payable, if not subject to prior call or redemption.</p> <p>Note that if an instrument is delisted, called, redeemed or repurchased before the set Maturity date, the Maturity date will be updated with the effective date of the delisting, called, redemption or repurchased date as specified in the related Corporate Action</p>	17	Q6
Legal Final Maturity Date	The legal final maturity date of the Debt Security as stated in the official documentation.	18	R6
Pricing Redemption date	The date field is used for valuation purposes to calculate the price for the instrument up until the date specified. This date will be equal to the Legal Final Maturity Date of the instrument unless the Bond has a call option where specific early redemption (call) dates have been specified. For callable bonds the earlier redemption (call) date will be shown in this field and	19	S6

	<p>the final redemption date in the Maturity Date field. If more than one call date has been specified, then this the Pricing redemption date is set as the first early redemption (call) date. Four days before this call date is reached and if no instruction has been received from the Issuer to 'call' the instrument, the pricing redemption date will be updated to either the next early redemption (call) date or the final legal maturity date, if no further call dates were specified.</p> <p>If the instrument does Call, the Maturity date will be updated to align with the Call date and Pricing redemption date.</p>		
Most recent Redemption date	The most recent date that the bond had a partial redemption event processed	20	T6
Pricing Method	Indicates the pricing method – Inflation, Yield or Price. Yield if it corresponds to the JSE current pricing formula, Yield if it is a CPI linked bond else it will be Price.	21	U6
Bond Calculator Indicator	If the Debt Security can be priced and corresponds to the JSE current pricing formula, then this is flagged with "Y".	22	V6
Settlement Method	Specifies the settlement method of the underlying Debt Security. Sample values include "electronic" or "physical".	23	W6
Settlement Provider	Central Security Depository (CSD) that provides/facilitates settlement. Two possible values are "Strate" and "Granite".	24	X6
SA Bond Category	<p>The Strate Bond Classification categories are as follows</p> <ul style="list-style-type: none"> • Category 1 – Zero/discounted instruments • Category 2 – Fixed Coupon Rate with fixed maturity date • Category 3 – Variable rate, fixed maturity date • Category 4 – All others/Flexi 	25	Y6
Sub-Sector	<p>The sub-sector of the Issuer. This pertains to an internal structure maintained by JSE Issuer Regulation division. The field indicates the Industry that the Issuer, linked to the Bond, is dealing in at a much granular level compared to the Major Division or Sector such as Cash Grains, Vegetables, Dairy Farms, Forestry etc.</p> <p>Follow this JSE website link to access structure hierarchy information on the structure as maintained by the Issuer Regulation division.</p>	26	Z6
Sector	This field indicates the Industry that the Issuer, linked to the Bond, is dealing in at a much granular level compared to the Major Division such as Agricultural Production Crops, Livestock etc.	27	AA6

	Follow this JSE website link to access structure hierarchy information on the structure as maintained by the Issuer Regulation division.		
Major Division	<p>This field indicates the Industry that the Issuer, linked to the Bond, is dealing in at a high level such as Agriculture, Forestry, Forestry, Fishing mining etc.</p> <p>Follow this JSE website link to access structure hierarchy information on the structure as maintained by the Issuer Regulation division.</p>	28	AB6
Guarantee or Ranking	<p>This field dictates the pay-out order in the event that the issuer cannot meet its financial obligations. This is a ranking structure that is used by issuers to prioritize debt pay-out.</p> <ul style="list-style-type: none"> • T= Government guarantee - select which government RSA/NAM • G = Joint guarantee • S = Secured • S = Senior Secured • S = Junior Secured • S = Secured Class A • S = Secured Class B • S = Secured Class C • S = Secured Class D • S = Secured Class E • S = Secured Class F • P = Negative pledge • N = Senior Unsecured • N = Unsubordinated Unsecured • N = Senior Unsecured Unsubordinated • N = Unsubordinated, Unconditional, Unsecured • O = Senior Unsecured Subordinated • Q = Junior Unsecured • J = Junior Unsecured Subordinated • C = Supranational • U = Unsecured/Unguaranteed • U = Subordinated Unsecured Tier 1 • U = Subordinated Unsecured Tier 2 	29	AC6

	<ul style="list-style-type: none"> • U = Subordinated Unsecured 		
Redemption/Reimbursement	<p>This field indicates the retirement provisions made for the debt issue.</p> <ul style="list-style-type: none"> ○ Redemption/Reimbursement type: <ul style="list-style-type: none"> • Fixed Maturity • Fixed Maturity with Call Feature • Fixed Maturity with Put Feature • Fixed Maturity with Put and Call • Amortization Plan • Amortization Plan with Call Feature • Amortization Plan with Put Feature • Amortization Plan with Put and Call • Perpetual Bond • Perpetual with Call Feature • Perpetual with Put Feature • Extendible 	30	AD6
Specified Denomination	<p>This field defines the minimum denomination in ZAR for what a Bond/Note is worth. This field is captured as per the denomination as per the Applicable Pricing Supplement (APS) The Rand value denomination of the debt security as specified in the pricing supplement</p>	31	AE6
Underlying Issuer Foreign Issuer Indicator	<p>Indicator of either Yes or No. 'Yes' indicating that the Issuer's residential status of the underlying reference instrument is 'foreign'.</p> <p>(this field is linked to the 'inward listed' field - If an Instrument has been classified as an 'Inward Listed', it is because the Issuer's residential status is 'Foreign', or the Underlying of the Instrument is 'Foreign'.)</p>	32	AF6
Inward Listed (SA Reserve Bank Approved)	<p>Flag that denotes that it is an inward listed Debt Security approved by the SA Reserve Bank.</p>	33	AG6
Country of Issuance	<p>Country of residence of the Issuer.</p>	34	AH6
Companion Bond - JSE Alpha Code	<p>The Alpha code of a liquid companion instrument to assist in the re-valuation of parallel shifts in the yield curve. Usually, governments bonds are flagged as companion bonds. (Note that not all instruments will have a companion bond).</p>	35	AI6
Companion Bond - Instrument Type	<p>The type of the liquid companion instrument used to assist in the re-valuation of parallel shifts in the yield curve.</p>	36	AJ6
Notes	<p>Optional freeform text field for additional context</p>	37	AK6
APS URL Link	<p>Link to the legal document for the Debt Security</p>	38	AL6

Pricing Class Code	An internal code used as an indication of the pricing methodology used. Values include: AFRN - Amortising Floating Rate Note AI - Amortising Instruments CI - Customised Instruments CP - Commercial Paper CPI – Inflation linked ESN - Equity Structured Note F - Fixed FC - Fixed Coupon Quarterly FRN - Floating Rate Note P - Perpetuity V - Vanilla Fixed	39	AM6
Foreign Issuer	Indicates the residential status of the bond issuer (Foreign or Local)	40	AN6
Compounded Calculated Coupon Rate	The Coupon Rate calculated using the lookback methodology as defined by the SARB. This field is populated if the Reference Rate is 'ZARONIA'.	41	AO6

4.4 BONDS INSTRUMENT REDEMPTION SCHEDULE

Detail			
Field Name	Field Description	CSV Column	Excel Cell
JSE Alpha Code	This is the primary identifier for the Debt Security and is an alphanumeric field with a length of max 6. The Issuer requests the code.	1	A6
ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa. It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.	2	B6
Coupon Rate	The coupon/interest rate of the Debt Security.	3	C6

	Coupon Rate is displayed as a percentage limited to 3 decimals		
Coupon Currency	The currency of the coupon for the Debt Security. (only ZAR – Rand is currently permitted)	4	D6
Coupon Withholding Tax (taxable field)	Withholding tax on interest payments that came into effect on 1 March 2015. Exemptions apply to any foreign person in respect of Debt Security that is listed on a “recognised exchange as defined in the Income Tax Act. The Interest Rate Market of the JSE constitutes a “recognised Exchange”. Indicator Yes / No	5	E6
Business Day Convention	Indicate how payments / maturity will be treated if it should fall on a non-business day. Available values include: <ul style="list-style-type: none"> • Following(This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following(The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) • Preceding(This means that the interest will be paid on the last business day before the weekend or public holiday.) 	6	F6
Coupon Frequency	The number of coupon/interest payments made annually. Available values include: <ul style="list-style-type: none"> • Annually • At Maturity* • Monthly • No Coupon* • Onetime • Quarterly • Semi Annually • Tri-Annually 	7	G6

	<p>*'At Maturity' and 'No coupon' frequency is used to indicate the business truth that this bond will repay capital only (no coupon) or the capital and interest at the maturity date (at maturity)</p> <p>No coupon schedule is generated for these types of coupon frequencies and will not be included in the 'coupon schedule' file. The 'First Interest / Coupon date', 'First Books close date' and 'Last Day to Register for Maturity Amount' fields that are included in the 'coupon general' file is to indicate the dates for the capital repayment at maturity, required by the market for processing.</p>		
Coupon Payment Type	<p>This field describes the type of Coupon Payment that the Bond will pay e.g.</p> <ul style="list-style-type: none"> • Fixed Coupon: For Fixed Rate Note bonds • Index Linked Coupon: For Index Linked Bonds • Variable Coupon: For Floating Rate Note Bonds • Zero coupon: For Bonds that don't pay any coupon 	8	H6
Reference Rate	Indicates whether the variable notes is linked to 3/6/9/12m JIBAR or ZARONIA or another index.	9	I6
Basis Points	Indicates the basis points /margin for floating rate notes, to be added to the Reference Rate.	10	J6
Over/Under	<p>Indicates whether the Basis Point value that should be added or subtracted from the Reference Rate.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes) 	11	K6
Rate of Reference Rate	The rate (for the Reference Rate) used for the Coupon calculation on Listing date and Reset Date.	12	L6
Books closed period	The number of days that the books are closed between the last date to register and the coupon date.	13	M6
Coupon Rate Floor	In the event of a floating rate note, the coupon/interest rate could be limited on the downside.	14	N6

	Rate is displayed as a percentage limited to 3 decimals		
Coupon Rate Cap	In the event of a floating rate note, the coupon/interest rate could be limited on the upside. Rate is displayed as a percentage limited to 3 decimals	15	O6
Customised Coupon	This indicates if the Coupon/interest rate is system calculated or provided by the Issuer. Available values include: <ul style="list-style-type: none"> • External Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 	16	P6
Day count convention	A day-count convention measures how interest accrues on investments. In the Debt Security market, this determines the number of days and the amount of accrued interest between two coupon dates (when the next coupon date is less than a full coupon period away). The calculation is important to traders of various bonds because, when a bond is sold, the seller is entitled to a portion of the coupon payment. Options are: <ul style="list-style-type: none"> • 30/360 • Actual/360 • Actual/365 	17	Q6
First Accrual Date	The date from which interest is accrued for the first coupon/interest payment	18	R6
First Interest / Coupon Date	The first date that the coupon/interest payment will be paid, as stipulated by the Issuer.	19	S6
First Books Close Date	The books close date for the first coupon/interest payment, as stipulated by the Issuer.	20	T6
Date of Listing Reference rate	The specified date to be used for the Reference Rate.	21	U6
Broken First Coupon	For long / short stub instrument. Indicates that the first coupon will be for a period shorter or longer than the interest periods indicated for the particular debt instrument.	22	V6
Last Day to Register for Maturity Amount	Last date to register that is specific to a coupon/interest payment that pays at maturity only.	23	W6

	This date will be 1 calendar day prior to the 'Book Closed Date'.		
Base CPI	Applicable base CPI rate.	24	X6
Linked\Reference Index	This field is used to indicate if the Bond is linked to an Index which can be one of the following: <ul style="list-style-type: none"> • CPI • OTHER • PPI • RPI 	25	Y6
Compounded Calculated Coupon Rate	The Coupon Rate calculated using the lookback methodology as defined by the SARB. This field is populated if the Reference Rate is 'ZARONIA'.		
Previous Coupon Rate	This is the Coupon Rate for the previous Coupon Period. This field is populated if the Reference Rate is 'ZARONIA', but only once the first Coupon Payment Date has been reached.	26	Z6
Previous Rate of Reference Rate	This is the Rate of Reference Rate for the previous Coupon Period. This field is populated if the Reference Rate is 'ZARONIA', but only once the first Coupon Payment Date has been reached.	27	AA6
Previous Coupon Payment Date	This is the Rate of Reference Rate for the previous Coupon Period. This field is populated if the Reference Rate is 'ZARONIA', but only once the first Coupon Payment Date has been reached.	28	AB6
Lookback Period	The Period as defined by the Issuer for the calculation of the Coupon Rate. This field is populated if the Reference Rate is 'ZARONIA'.	30	AD6
Credit Adjustment Spread Percentage	A Credit Adjustment Spread (CAS) is a fixed numerical adjustment rate to account for the difference in credit risk and term structure between JIBAR and ZARONIA, ensuring economic neutrality during the transition.	31	AE6

4.6 BONDS INSTRUMENT COUPON SCHEDULE

CSV Version		Excel Version	
File Name	Bonds Instrument Coupon Schedule_YYYYMMDD	Workbook name	Bond Instrument Reference_YYYYMMDD
File type	CSV	File type	XLS

Detail

Note:

Coupon Schedule creation

With the listing process, the coupon schedules for year 1 will be created.

As the instrument moves through its life cycle and passes the coupon dates, the next coupon schedule will be created on a rolling basis.

Field Name	Field Description	CSV Column	Excel Cell
JSE Alpha Code	This is the primary identifier for the Debt Security and is an alphanumeric field with a length of max 6. The Issuer requests the code.	1	A6

ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa. It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumerical national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.	2	B6
Interest / Coupon dates	Dates on which a Debt Security pays a coupon but depending on the business day convention.	3	C6
First Coupon Date	First date on which a Debt Security pays a coupon but depending on the business day convention.	4	D6
Last Day to Register	Last day to register to qualify for the coupon payment.	5	E6
Actual Payment Date	Actual date of coupon payment as adjusted by the business day convention specified	6	F6
Coupon Determination Date	The date that the final Coupon Rate is confirmed for the Period. This is linked to the Look Back Period. This field is populated if the Reference Rate is 'ZARONIA'.	7	G6

4.7 BONDS INSTRUMENT CALLABLE AND STEP UP

CSV Version		Excel Version	
File Name	Bonds Instrument Callable Step Up_YYYYMMDD	Workbook name	Bond Instrument Reference_YYYYMMDD

It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.	2	B6

Call Indicator	Indicates “Yes” when the Debt Security is called.	3	C6
Callable / Step Up Date	Date(s) on which a Debt Security can either Call or Step Up/Down the Coupon Rate. A ‘Coupon Rate Step Up/Down’ or a ‘Callable’ event will be created at least four days before the effective date of this callable / step up date, based on the confirmation from the issuer.	4	D6
Step-up/down Coupon Rate	For fixed coupon interest payments, the Step-up/down coupon/interest rate of the Debt Security. Rate is displayed as a percentage limited to 3 decimals	5	E6
Step-up /down Reference Rate	For Variable Coupon interest payments, the Step-up/down rate that is used to indicate whether the variable notes is linked to 3/6/9/12m JIBAR or another index.	6	F6
Step-up /Down Basis points	For Variable Coupon interest payments, the Step-up/down points that indicates the basis points /margin for floating rate notes that is to be added to the Reference Rate.	7	G6
Step-up/down Over/Under indicator	For Variable Coupon interest payments, the Step-up/down indicator that indicates whether the Basis Point value that should be added or subtracted from the Reference Rate. Available values include: <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes) 	8	H6

4.8 BONDS INSTRUMENT MARKET LISTINGS

Note: A bond instrument can be listed on numerous markets. The information of this instrument linked to the specific MIC code will be displayed in this file. e.g. A bond instruments can be listed on both the JSE Cash bond market (MIC: XBES) as well as the Bond ETP platform (MIC: JSEB)

CSV Version		Excel Version

ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa.	2	B6

	It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumerical national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.		
Guarantor JSE Alpha Code	Alpha code identifier of the linked Guarantor.	3	C6
Entity / Role Type	Type of the linked Guarantor.	4	D6

4.14 BONDS INSTRUMENT REFERENCE MIXED RATE

An Instrument can be issued as a Mixed Rate Note; meaning that for the first defined period the debt instrument pays a specific type of coupon and then for the next defined period changes to another type of coupon payment. These different periods are referred to as legs. The number of legs for Mixed Rate Notes are typically two legs but could be more than two.

Refer to the Coupon General Section for the meaning of the fields.

CSV Version		Excel Version

Detail			
Field Name	Field Description	CSV Column	Excel Cell

JSE Alpha Code	Primary identifier for the Debt Security and is an alphanumeric field with a length of max 6. The Issuer requests the code.	1	A6
ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa. It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a "G" in the third character.	2	B6
Leg Number	The number of the Coupon Rate for the leg.	3	C6
Leg Start Date	The Mixed Rate Coupon leg start date for the leg.	4	D6
Leg End Date	The Mixed Rate Coupon leg end date for the leg. A mixed rate note will be loaded where the end date of the first leg is one day before the start date of the next leg. However, there are specific data-rules when a mixed-rate note is either called or redeemed/repurchased early, where the 'end-date of the first leg', the 'start date of the second leg' and the 'end data of the second leg' all gets updated to the 'redeemed' or 'called' date as per the corporate action processed. The dates are updated to reflect that the second leg will not come into effect (i.e. instrument and all legs are now end-dated):	5	E6
Leg Coupon Frequency	The Mixed Rate Coupon leg frequency for the leg. The number of coupon/interest payments made annually. Available values include: <ul style="list-style-type: none"> • Annually • At Maturity* • Monthly • No Coupon* • Onetime • Quarterly • Semi Annually • Tri-Annually 	6	F6

	<p>*'At Maturity' and 'No coupon' frequency is used to indicate the business truth that this bond will repay capital only (no coupon) or the capital and interest at the maturity date (at maturity)</p> <p>No coupon schedule is generated for these types of coupon frequencies and will not be included in the 'coupon schedule' file. The 'First Interest / Coupon date', 'First Books close date' and 'Last Day to Register for Maturity Amount' fields that are included in the 'coupon general' file is to indicate the dates for the capital repayment at maturity, required by the market for processing.</p>		
Leg Business Day Convention	<p>The Mixed Rate Coupon leg indication as to how the payment / maturity will be treated if it should fall on a non-business day for the leg.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Following (This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following (The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) • Preceding (This means that the interest will be paid on the last business day before the weekend or public holiday) 	7	G6
Leg Coupon Rate	<p>The Mixed Rate Coupon rate for the leg.</p> <p>Coupon Rate is displayed as a percentage limited to 3 decimals</p>	8	H6
Leg Coupon Payment Type	<p>Same as Coupon Payment type. Just that its used for a Mixed Rate note Bond to denote the field at the Leg level.</p> <ul style="list-style-type: none"> • Fixed Coupon: For Fixed Rate Note bonds • Index Linked Coupon: For Index Linked Bonds • Variable Coupon: For Floating Rate Note Bonds • Zero coupon: For Bonds that don't pay any coupon 	9	I6
Leg Basis points	<p>The Mixed rate leg indicator that indicates the basis points /margin for floating rate notes, to be added to the Reference Rate for the leg.</p>	10	J6

Leg Over/Under	<p>The Mixed Rate leg indicator that indicates whether the Basis Point value that should be added or subtracted from the Reference Rate for the leg.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes) 	11	K6
Leg Reference Rate	The Mixed Rate leg indicator that indicates whether the variable notes is linked to 3/6/9/12m JIBAR or ZARONIA or another index for the leg.	12	L6
Leg Books Closed Period	The Mixed Rate leg period that indicates the number of days that the books are closed between the last date to register and the coupon date for the leg.	13	M6
Leg Rate of Reference Rate	The Mixed Rate leg Reference Rate used for the Coupon calculation for the leg.	14	N6
Leg Date of Listing Reference rate	The Mixed Rate Reference Rate date for the leg.	15	O6
Leg Day count Convention	<p>The Mixed Rate Day Count Convention for the leg.</p> <p>Options are:</p> <ul style="list-style-type: none"> • 30/360 • Actual/360 • Actual/365 	16	P6
Leg Coupon Rate Cap	The Coupon Rate Cap for the leg. Rate is displayed as a percentage limited to 3 decimals	17	Q6
Leg Coupon Rate Floor	The Coupon Rate Floor for the leg. Rate is displayed as a percentage limited to 3 decimals	18	R6
Leg Customised Coupon	<p>The Mixed Rate Customised Coupon for the leg.</p> <p>This indicates if the Coupon/interest rate is system calculated or provided by the Issuer.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • External <p>Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date</p>	19	S6

	<ul style="list-style-type: none"> • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 		
Leg Last Day to Register for Maturity Amount	The Mixed Rate Last Day to Register for the Maturity Amount for the leg. This date will be 1 calendar day prior to the Book Closed Date of the leg.	20	T6
Leg Underlying Index Code	The Mixed Rate underlying index code for the leg.	21	U6
Mixed Rate Conversion determination date	The Mixed Rate conversion determination date for the leg.	22	V6
Base CPI	Applicable base CPI rate.	23	W6
Linked\Reference Index	This field is used to indicate if the Bond is linked to an Index which can be one of the following: <ul style="list-style-type: none"> • CPI • OTHER • PPI • RPI 	24	X6
Leg Lookback Period	The Period as defined by the Issuer for the calculation of the Coupon Rate. This field is populated if the Reference Rate is 'ZARONIA'.		

5 NEW BONDS LISTING

The New Bonds Listing data product provides key reference data of all Debt Securities instruments that are in the process of *being listed on the JSE Bond market but are not yet "listed"*. Once the security is "listed", its reference data is made available via the Bond Instrument Reference data product.

Because of the nature of the data, where some of the data has a one-to-many relationship, this data product comprises of a primary general section that contains common data and several secondary data sections where each section provides a complementary but distinct different **set of related data**. **The structure of this product is an exact match of the Bond Instrument Reference data product.**

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats. The Excel format version presents the data sections as Excel sheets while the CSV format version presents each data section as a separate data file.

Due to the dynamic nature of Bonds, a set of the daily files is made available three times each business day with the new version completely replacing the old version each time so does not contain delta changes. The SLA time for the different publication time is **11h30**, **13h30** and **16h20** but the JSE will always endeavour to make the files as early as possible after they are produced.

To cater for historical retrieval, the last version will be available on the IDP server for the last rolling 40 business days, with the historical data files suffixed with "_yyyymmdd".

Primary General Data section – Contains common data

1. New Bonds Listing General

Secondary Data sections – Each section contains related but different data

2. New Bonds Listing Redemption Schedule
3. New Bonds Listing Coupon General
4. New Bonds Listing Coupon Schedule
5. New Bonds Listing Callable Step Up
6. New Bonds Listing Market Listing
7. New Bonds Listing Split Maturity Schedule
8. New Bonds Listing Reference Index
9. New Bonds Listing Reference Instrument
10. New Bonds Listing Reference Entities
11. New Bonds Listing Guarantor

Detail			
Field Name	Field Description	CSV Column	Excel Cell
Universal Instrument Master Id	Unique ID assigned to any Instrument generated at the JSE.	1	A6
JSE Alpha Code	<p>Primary JSE identifier for the Debt Security as defined by the Issuer. Also referred to as “Bond Code” or “Stock Code”.</p> <p>Is an alphanumeric field with a maximum length of 6 characters and always expressed in Capital Letters.</p> <ul style="list-style-type: none"> • 	2	B6

ISIN	<p>International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa.</p> <p>It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumerical national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.</p>	3	C6
Issuer Name	An entity, approved by the Exchange, that has issued Debt Securities on the Exchange under the Interest Rate Market	4	D6
LEI Code	Identify the Legal Entity. Legal Entity Identifier (LEI) is a 20-digit reference code used to uniquely identify legally distinct entities that engage in financial transactions as well as associated reference data	5	E6
Issue Type	<p>Used to classify Debt Security Instruments. Types are as follows:</p> <ul style="list-style-type: none"> • FXRN-Fixed Rate Note • FLRN-Floating Rate Note • MXRN-Mixed Rate Note • IDXLN-Index-Linked Notes • CRLN-Credit Linked Notes • STNT-Structured Note • ZCNT-Zero Coupon Note 	6	F6
CFI code	<p>Classification of Financial Instrument code, an ISO (ISO 10962) identification standard used to define and describe financial instruments as a uniform set of codes for all market participants. The code is issued by the JSE as the accredited National Numbering Agency for South Africa.</p> <p>This is an alphabetic field with a maximum length of 6 characters.</p>	7	G6
FISN code	<p>Financial Instrument Short Name, an ISO (ISO 18774) identification standard that provides a consistent and uniform approach to standardise short names and descriptions for financial instruments.</p> <p>The FISN is not meant to be machine-readable, but to provide a short format for essential information about a security for human use.</p>	8	H6
Issue Date	The date upon which a Debt Security is listed on the exchange.	9	I6

Listed/Unlisted Flag	Flag that denotes whether the Debt Security is listed on the exchange or not.	10	J6
Status	<p>Indicates the status of the Listed Debt Security whilst in the process of being listed. The status are as follows:</p> <p>Draft approved: When application is made to the JSE for listing, the JSE provides ‘informal approval’ and the draft instrument details will be available. To note that the instrument information/attributes has not yet been finalised and therefore can still be updated.</p> <p>Pre-listed: Once ‘formal approval’ has been granted by the JSE, the final instrument details will be updated and available with the link to the APS included. Listed but pending coupon: Instrument is listed but final coupon details is still pending Listed: The instrument is listed, available on the JSE trading platform and included in the valuation products</p> <p>Cancelled: Instruments that are not formally approved or where the listing was withdrawn by the Issuer (before the listing date), will be included in the product with the status of ‘cancelled’</p> <ul style="list-style-type: none"> • 	11	K6
Status Reason	Additional optional status information relevant for Suspension status.	12	L6
Nominal Amount	The nominal amount of Debt Security issued by the Issuer and placed in the market.	13	M6
Amount Authorised	The amount which the Board of Directors/ Company and the JSE has approved for issue in respect of the Programme.	14	N6
Issue Price Format	Format of the Issue Price i.e., Rand or Percent.	15	O6
Issue Price	The price of a bond is equal to the present value of the expected cash flows. In BOND terminology, it is the Present Value (PV) of both the coupons and the Principal amount combined. The price at which investors buy the bonds when they are first issued, which will typically be approximately equal to the nominal amount. The net proceeds that the issuer receives are thus the issue price, less issuance fees.	16	P6
Maturity Date	The date when the principal amount of a Debt Security becomes due and payable, if not subject to prior call or redemption.	17	Q6
Legal Final Maturity Date	The legal final maturity date of the Debt Security as stated in the official documentation.	18	R6
Pricing Redemption date	The date field is used for valuation purposes to calculate the valuation/price of the instrument up until the date specified. This date will be equal to the Legal Final Maturity Date of the instrument unless the Bond has a call option where specific early redemption (call) dates have been specified. For callable bonds the earlier redemption (call) date will be shown in this field	19	S6

	and the final redemption date in the Maturity Date field. If more than one call date has been specified, then this the Pricing redemption date is set as the first early redemption (call) date.		
Most recent Redemption date	The most recent date that the bond had a partial redemption event processed	20	T6
Pricing Method	Indicates the pricing method – Inflation, Yield or Price. Yield if it corresponds to the JSE current pricing formula, Yield if it is linked to CPI or else it will be Price.	21	U6
Bond Calculator Indicator	If the Debt Security can be priced and corresponds to the JSE current pricing formula, then this is flagged with “Y”.	22	V6
Settlement Method	Specifies the settlement method of the underlying Debt Security. Sample values include “electronic” or “physical”.	23	W6
Settlement Provider	Central Security Depository (CSD) that provides/facilitates settlement. Two possible values are “Strate” and “Granite”.	24	X6
SA Bond Category	The Strate Bond Classification categories are as follows <ul style="list-style-type: none"> • Category 1 – Zero/discounted instruments • Category 2 – Fixed Coupon Rate with fixed maturity date • Category 3 – Variable rate, fixed maturity date • Category 4 – All others/Flexi 	25	Y6
Sub-Sector	The sub-sector of the Issuer. This pertains to an internal structure maintained by JSE Issuer Regulation division. The field indicates the Industry that the Issuer, linked to the Bond, is dealing in at a much granular level compared to the Major Division or Sector such as Cash Grains, Vegetables, Dairy Farms, Forestry etc. Follow this JSE website link to access structure hierarchy information on the structure as maintained by the Issuer Regulation division.	26	Z6
Sector	This field indicates the Industry that the Issuer, linked to the Bond, is dealing in at a much granular level compared to the Major Division such as Agricultural Production Crops, Livestock etc. Follow this JSE website link to access structure hierarchy information on the structure as maintained by the Issuer Regulation division.	27	AA6
Major Division	This field indicates the Industry that the Issuer, linked to the Bond, is dealing in at a high level such as Agriculture, Forestry, Forestry, Fishing mining etc.	28	AB6

	<p>Follow this JSE website link to access structure hierarchy information on the structure as maintained by the Issuer Regulation division.</p>		
<p>Guarantee or Ranking</p>	<p>This field dictates the pay-out order if the issuer cannot meet its financial obligations. This is a ranking structure that is used by issuers to prioritize debt pay-out.</p> <ul style="list-style-type: none"> • T= Government guarantee - select which government RSA/NAM • G = Joint guarantee • S = Secured • S = Senior Secured • S = Junior Secured • S = Secured Class A • S = Secured Class B • S = Secured Class C • S = Secured Class D • S = Secured Class E • S = Secured Class F • P = Negative pledge • N = Senior Unsecured • N = Unsubordinated Unsecured • N = Senior Unsecured Unsubordinated • N = Unsubordinated, Unconditional, Unsecured • O = Senior Unsecured Subordinated • Q = Junior Unsecured • J = Junior Unsecured Subordinated • C = Supranational • U = Unsecured/Unguaranteed • U = Subordinated Unsecured Tier 1 • U = Subordinated Unsecured Tier 2 	<p>29</p>	<p>AC6</p>

	<ul style="list-style-type: none"> • U = Subordinated Unsecured 		
Redemption/Reimbursement	<p>This field indicates the retirement provisions made for the debt issue.</p> <p>Redemption/Reimbursement type:</p> <ul style="list-style-type: none"> • Fixed Maturity • Fixed Maturity with Call Feature • Fixed Maturity with Put Feature • Fixed Maturity with Put and Call • Amortization Plan • Amortization Plan with Call Feature • Amortization Plan with Put Feature • Amortization Plan with Put and Call • Perpetual Bond • Perpetual with Call Feature • Perpetual with Put Feature • Extendible 	30	AD6
Specified Denomination	<p>This field defines the minimum denomination in ZAR for what a Bond/Note is worth. This field is captured as per the denomination as per the Applicable Pricing Supplement (APS)</p> <p>The Rand value denomination of the debt security as specified in the pricing supplement</p>	31	AE6
Underlying Issuer Foreign Issuer Indicator	<p>Indicator of either Yes or No. 'Yes' indicating that the Issuer's residential status of the underlying reference instrument is 'foreign'.</p> <p>(this field is linked to the 'inward listed' field - If an Instrument has been classified as an 'Inward Listed', it is because the Issuer's residential status is 'Foreign', or the Underlying of the Instrument is 'Foreign'.)</p>	32	AF6
Inward Listed (SAReserveBankApproved)	<p>Flag that denotes that it is an inward listed Debt Security approved by the SA Reserve Bank.</p>	33	AG6
Country of Issuance	<p>Country of residence of the Issuer.</p>	34	AH6
Companion Bond - JSE Alpha Code	<p>The Alpha code of a liquid companion instrument to assist in the re-valuation of parallel shifts in the yield curve. Usually, governments bonds are flagged as companion bonds. (Note that not all instruments will have a companion bond).</p>	35	AI6
Companion Bond - Instrument Type	<p>The type of the liquid companion instrument used to assist in the re-valuation of parallel shifts in the yield curve.</p>	36	AJ6

Notes	Optional freeform text field for additional context	37	AK6
APS URL Link	Link to the legal document for the Debt Security	38	AL6
Pricing Class Code	An internal code used as an indication of the pricing methodology used. Values include: AFRN - Amortising Floating Rate Note AI - Amortising Instruments CI - Customised Instruments CP - Commercial Paper CPI – Inflation linked ESN - Equity Structured Note F - Fixed FC - Fixed Coupon Quarterly FRN - Floating Rate Note P - Perpetuity V - Vanilla Fixed	39	AM6
Foreign Issuer	Indicates the residential status of the bond issuer (Foreign or Local)	40	AN6

Detail			
Field Name	Field Description	CSV Column	Excel Cell
JSE Alpha Code	This is the primary identifier for the Debt Security and is an alphanumeric field with a length of max 6. The Issuer requests the code.	1	A6
ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa. It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.	2	B6
Coupon Rate	The coupon/interest rate of the Debt Security.	3	C6

	Coupon Rate is displayed as a percentage limited to 3 decimals		
Coupon Currency	The currency of the coupon for the Debt Security. (only ZAR – Rand is currently permitted)	4	D6
Coupon Withholding Tax (taxable field)	Withholding tax on interest payments that came into effect on 1 March 2015. Exemptions apply to any foreign person in respect of Debt Security that is listed on a “recognised exchange as defined in the Income Tax Act. The Interest Rate Market of the JSE constitutes a “recognised Exchange”. Yes / No indicator	5	E6
Business Day Convention	Indicate how payments / maturity will be treated if it should fall on a non-business day. Available values include: <ul style="list-style-type: none"> • Following(This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following(The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) • Preceding(This means that the interest will be paid on the last business day before the weekend or public holiday.) 	6	F6
Coupon Frequency	The number of coupon/interest payments made annually. Available values include: <ul style="list-style-type: none"> • Annually • At Maturity • Monthly • No Coupon • Onetime • Quarterly • Semi Annually • Tri-Annually 	7	G6

	<p>*'At Maturity' and 'No coupon' frequency is used to indicate the business truth that this bond will repay capital only (no coupon) or the capital and interest at the maturity date (at maturity)</p> <p>No coupon schedule is generated for these types of coupon frequencies and will not be included in the 'coupon schedule' file. The 'First Interest / Coupon date', 'First Books close date' and 'Last Day to Register for Maturity Amount' fields that are included in the 'coupon general' file is to indicate the dates for the capital repayment at maturity, required by the market for processing.</p>		
Coupon Payment Type	<p>This field describes the type of Coupon Payment that the Bond will pay e.g.</p> <ul style="list-style-type: none"> • Fixed Coupon: For Fixed Rate Note bonds • Index Linked Coupon: For Index Linked Bonds • Variable Coupon: For Floating Rate Note Bonds • Zero coupon: For Bonds that don't pay any coupon 	8	H6
Reference Rate	Indicates whether the variable notes is linked to 1/3/6/9/12m JIBAR or ZARONIA or LIBOR or Prime.	9	I6
Basis Points	Indicates the basis points /margin for floating rate notes, to be added to the Reference Rate.	10	J6
Over/Under	<p>Indicates whether the Basis Point value that should be added or subtracted from the Reference Rate.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the the reference rate (This option is applicable to Inverse Floating Rate Notes) 	11	K6
Rate of Reference Rate	The rate (for the Reference Rate) used for the Coupon calculation on Listing date	12	L6

Books closed period	The number of days that the books are closed between the last date to register and the coupon date.	13	M6
Coupon Rate Floor	In the event of a floating rate note, the coupon/interest rate could be limited on the downside. Rate is displayed as a percentage limited to 3 decimals	14	N6
Coupon Rate Cap	In the event of a floating rate note, the coupon/interest rate could be limited on the upside. Rate is displayed as a percentage limited to 3 decimals	15	O6
Customised Coupon	This is when the Coupon/interest rate is calculated and provided by the Issuer. Available values include: <ul style="list-style-type: none"> • External Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 	16	P6
Day count convention	A day-count convention measures how interest accrues on investments. In the Debt Security market, this determines the number of days and the amount of accrued interest between two coupon dates (when the next coupon date is less than a full coupon period away). The calculation is important to traders of various bonds because, when a bond is sold, the seller is entitled to a portion of the coupon payment. Options are: <ul style="list-style-type: none"> • 30/360 • Actual/360 • Actual/365 	17	Q6
First Accrual Date	The date from which interest is accrued for the first coupon/interest payment	18	R6
First Interest / Coupon Date	The first date that the coupon/interest payment will be paid, as stipulated by the Issuer.	19	S6
First Books Close Date	The books close date for the first coupon/interest payment, as stipulated by the Issuer.	20	T6
Date of Listing Reference rate	The specified date to be used for the Reference Rate.	21	U6

Broken First Coupon	For long / short stub instrument. Indicates that the first coupon will be for a period shorter or longer than the interest periods indicated for the particular debt instrument.	22	V6
Last Day to Register for Maturity Amount	Last date to register that is specific to a coupon/interest payment that pays at maturity only. This date will be 1 calendar day prior to the 'Book Closed Date'.	23	W6
Base CPI	Applicable base CPI rate.	24	X6
Linked\Reference Index	This field is used to indicate if the Bond is linked to an Index which can be one of the following: <ul style="list-style-type: none"> • CPI • OTHER • PPI • RPI 	25	Y6
Compounded Calculated Coupon Rate	The Coupon Rate calculated using the lookback methodology as defined by the SARB. This field is populated if the Reference Rate is 'ZARONIA'.	26	Z6
Previous Coupon Rate	This is the Coupon Rate for the previous Coupon Period. This field is populated if the Reference Rate is 'ZARONIA', but only once the first Coupon Payment Date has been reached.	27	AA6
Previous Rate of Reference Rate	This is the Rate of Reference Rate for the previous Coupon Period. This field is populated if the Reference Rate is 'ZARONIA', but only once the first Coupon Payment Date has been reached.	28	AB6
Previous Coupon Payment Date	This is the Rate of Reference Rate for the previous Coupon Period. This field is populated if the Reference Rate is 'ZARONIA', but only once the first Coupon Payment Date has been reached.	29	AC6
Lookback Period	The Period as defined by the Issuer for the calculation of the Coupon Rate. This field is populated if the Reference Rate is 'ZARONIA'.	30	AD6

Detail

Note:

Coupon Schedule creation

With the listing process, the coupon schedules for year 1 will be created.

As the instrument moves through its life cycle and passes the coupon dates, the next coupon schedule will be created on a rolling basis.

Field Name	Field Description	CSV Column	Excel Cell
JSE Alpha Code	This is the primary identifier for the Debt Security and is an alphanumeric field with a length of max 6. The Issuer requests the code.	1	A6

ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa. It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumerical national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.	2	B6
Interest / Coupon dates	Dates on which a Debt Security pays a coupon but depending on the business day convention.	3	C6
First Coupon Date	First date on which a Debt Security pays a coupon but depending on the business day convention.	4	D6
Last Day to Register	Last day to register to qualify for the coupon payment.	5	E6
Actual Payment Date	Actual date of coupon payment as adjusted by the business day convention specified.	6	F6
Coupon Determination Date	The date that the final Coupon Rate is confirmed for the Period. This is linked to the Look Back Period. This field is populated if the Reference Rate is 'ZARONIA'.

Data - Start Row		5	Data - Start Row		7

Detail

Notes: Certain government bonds list as ‘Split Bonds’, which means that an instrument will split into 3 new bonds at a specific point in time. The detail of the Split is not always known up-front, but only confirmed closer to the Split Date.

All processing will be done manually, that is, new listing of new notes and maturity/delisting of current note.

Field Name	Field Description	CSV Column	Excel Cell
JSE Alpha Code	This is the primary identifier for the Debt Security and is an alphanumeric field with a length of max 6. The Issuer requests the code.	1	A6
ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa.	2	B6

	It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.		
Split Maturity Date	The split maturity date for the Debt Security that will split into new series.	3	C6
Split Maturity Date Notes (Free text)	Supporting notes relating to the split maturity date.	3	D6

5.9 NEW BONDS LISTING REFERENCE INDEX

CSV Version		Excel Version

It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.	2	B6

Guarantor JSE Alpha Code	Alpha code identifier of the linked Guarantor.	3	C6
Entity / Role Type	Type of the linked Guarantor.	4	D6

5.13 NEW BONDS LISTING MIXED RATE

An Instrument can be issued as a Mixed Rate Note; meaning that for the first defined period the debt instrument pays a specific type of coupon and then for the next defined period changes to another type of coupon payment. These different periods are referred to as legs. The number of legs for Mixed Rate Notes are typically two legs but could increase over time.

Refer to the Coupon General Section for the meaning of the fields.

Field Name	Field Description	CSV Column	Excel Cell
JSE Alpha Code	Primary identifier for the Debt Security and is an alphanumeric field with a length of max 6. The Issuer requests the code.	1	A6

ISIN	<p>International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa.</p> <p>It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumerical national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.</p>	2	B6
Leg Number	The number of the Coupon Rate for the leg.	3	C6
Leg Start Date	The Mixed Rate Coupon leg start date for the leg.	4	D6
Leg End Date	The Mixed Rate Coupon leg end date for the leg.	5	E6
Leg Coupon Frequency	<p>The Mixed Rate Coupon leg frequency for the leg.</p> <p>The number of coupon/interest payments made annually.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Annually • At Maturity • Monthly • No Coupon • Onetime • Quarterly • Semi Annually • Tri-Annually <p>*‘At Maturity’ and ‘No coupon’ frequency is used to indicate the business truth that this bond will repay capital only (no coupon) or the capital and interest at the maturity date (at maturity)</p> <p>No coupon schedule is generated for these types of coupon frequencies and will not be included in the ‘coupon schedule’ file. The ‘First Interest / Coupon date’, ‘First Books close date’ and ‘Last Day to Register for Maturity Amount’ fields that are included in the ‘coupon general’ file is to indicate the dates for the capital repayment at maturity, required by the market for processing.</p>	6	F5

Leg Business Day Convention	<p>The Mixed Rate Coupon leg indication as to how the payment / maturity will be treated if it should fall on a non-business day for the leg.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Following(This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following(The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) • Preceding(This means that the interest will be paid on the last business day before the weekend or public holiday) 	7	G6
Leg Coupon Rate	<p>The Mixed Rate Coupon rate for the leg.</p> <p>Coupon Rate is displayed as a percentage limited to 3 decimals</p>	8	H6
Leg Coupon Payment Type	<p>Same as Coupon Payment type. Just that its used for a Mixed Rate note Bond to denote the field at the Leg level.</p> <ul style="list-style-type: none"> • Fixed Coupon: For Fixed Rate Note bonds • Index Linked Coupon: For Index Linked Bonds • Variable Coupon: For Floating Rate Note Bonds • Zero coupon: For Bonds that don't pay any coupon 	9	I6
Leg Basis points	<p>The Mixed rate leg indicator that indicates the basis points /margin for floating rate notes, to be added to the Reference Rate for the leg.</p>	10	J6
Leg Over/Under	<p>The Mixed Rate leg indicator that indicates whether the Basis Point value that should be added or subtracted from the Reference Rate for the leg.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes) 	11	K6

Leg Reference Rate	The Mixed Rate leg indicator that indicates whether the variable notes is linked to 3/6/9/12m JIBAR or ZARONIA another index for the leg.	12	L6
Leg Books Closed Period	The Mixed Rate leg period that indicates the number of days that the books are closed between the last date to register and the coupon date for the leg.	13	M6
Leg Rate of Reference Rate	The Mixed Rate leg Reference Rate used for the Coupon calculation for the leg.	14	N6
Leg Date of Listing Reference rate	The Mixed Rate Reference Rate date for the leg.	15	O6
Leg Day count Convention	The Mixed Rate Day Count Convention for the leg. Options are: <ul style="list-style-type: none"> • 30/360 • Actual/360 • Actual/365 	16	P6
Leg Coupon Rate Cap	The Coupon Rate Cap for the leg.	17	Q6
Leg Coupon Rate Floor	The Coupon Rate Floor for the leg.	18	R6
Leg Customised Coupon	The Mixed Rate Customised Coupon for the leg. This indicates if the Coupon/interest rate is system calculated or provided by the Issuer. Available values include: <ul style="list-style-type: none"> • External Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 	19	S6
Leg Last Day to Register for Maturity Amount	The Mixed Rate Last Day to Register for the Maturity Amount for the leg. This date will be 1 calendar day prior to the Book Closed Date of the leg.	20	T6
Leg Underlying Index Code	The Mixed Rate underlying index code for the leg.	21	U6
Mixed Rate Conversion determination date	The Mixed Rate conversion determination date for the leg.	22	V6

Base CPI	Applicable base CPI rate.	23	W6
Linked\Reference Index	This field is used to indicate if the Bond is linked to an Index which can be one of the following: <ul style="list-style-type: none"> • CPI • OTHER • PPI • RPI 	24	X6
Leg Lookback Period	The Period as defined by the Issuer for the calculation of the Coupon Rate. This field is populated if the Reference Rate is 'ZARONIA'.	25	Y6

6 BONDS CORPORATE ACTIONS EVENTS SCHEDULE

The Bonds Corporate Actions Events Schedule data product provides key upcoming corporate actions event data of all *listed* instruments in the Bond Market.

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats. In addition, the data that relates to general reference data updates, one of the very dynamic Corporate Actions event types, is made available as a separate CSV file in addition to being included in the main data product.

Due to the dynamic nature of the data, a set of the daily files is made available three times each business day with the new version completely replacing the old version each time so does not contain delta changes. The SLA time for the different publication time is **11h30**, **13h30** and **17h00** but the JSE will always endeavour to make the files as early as possible after they are produced.

To cater for historical retrieval, the last version will be available on the IDP server for the last rolling 40 business days, with the historical data files suffixed with “_yyymmdd”.

Note that while there are common fields that will always have values, the specific type of Corporate Event will dictate which fields have values versus not in each row.

To cater for historical retrieval, the daily and monthly data files for the last rolling 40 business days will be available on the IDP server with the historical data files suffixed with “_yyymmdd”.

Effective Date	<p>The date that the changes stipulated in the Corporate Action event will become effective.</p>	9	I6
Call Date	<p>The date when the call (early redemption) of a debt security will take place.</p>	10	J6
Old Maturity Date	<p>The current date when the principal amount of a Debt Security becomes due and payable, if not subject to prior call or redemption.</p>	11	K6
New Maturity Date	<p>The new date when the principal amount of a Debt Security becomes due and payable, if not subject to prior call or redemption.</p>	12	L6
Old Nominal Amount (ZAR)	<p>If the Corporate Action will lead to a change in the nominal amount of the Debt Security issued by the Issuer and placed in the market, this will contain the old nominal amount.</p>	13	M6
New Nominal Amount (ZAR)	<p>If the Corporate Action will lead to a change in the nominal amount of the Debt Security issued by the Issuer and placed in the market, this will contain the new nominal amount.</p>	14	N6
Old Issue Price	<p>The current price of a bond which is equal to the present value of the expected cash flows. In Bond terminology, it is the Present Value (PV) of both the coupons and the Principal amount combined. The</p>	15	O6

	price at which investors buy the bonds when they are first issued, which will typically be approximately equal to the nominal amount. The net proceeds that the issuer receives are thus the issue price, less issuance fees.		
New Issue Price	The new price of a Debt Security which is equal to the present value of the expected cash flows. In Bond terminology, it is the Present Value (PV) of both the coupons and the Principal amount combined. The price at which investors buy the bonds when they are first issued, which will typically be approximately equal to the nominal amount. The net proceeds that the issuer receives are thus the issue price, less issuance fees.	16	P6
Old Issue Price Format	Format of the current Issue Price i.e., Rand or Percent.	17	Q6
New Issue Price Format	Format of the new Issue Price i.e., Rand or Percent.	18	R6
Nominal Decrease Amount (ZAR)	If the Corporate Action will lead to a decrease in the nominal amount of the Debt Security issued by the Issuer and placed in the market, this will contain the decrease amount.	19	S6
Old Amount Authorised	If the Corporate Action will lead to a change to the authorized amount which the Board of Directors/ Company approved for issue in respect of the Programme, this is the old amount.	20	T6
New Amount Authorised	If the Corporate Action will lead to a change to the authorized amount which the Board of Directors/ Company approved for issue in respect of the Programme, this is the new amount.	21	U6
Redemption Amount (ZAR)	Certain instruments do not repay at Maturity but repay specific amounts at specific dates throughout the life of the Bond, until Maturity date. This field reflects the amount.	22	V6
Repurchase Amount (ZAR)	Amount of notes repurchased	23	W6
Old Sub Sector Code	If the Corporate Action will lead to a change in the classified sub-sector, this will contain the old Sub-sector code. Sub-sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	24	X6
Old Sub Sector	If the Corporate Action will lead to a change in the classified sub-sector, this will contain the old Sub-sector name. Sub-sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	25	Y6
Old Sector Code	If the Corporate Action will lead to a change in the classified sector, this will contain the old Sector code. Sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	26	Z6
Old Sector	If the Corporate Action will lead to a change in the classified sector, this will contain the old Sector name. Sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	27	AA6
Old Major Division Code	If the Corporate Action will lead to a change in the classified division, this will contain the old Division code. Division pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	28	AB6

Old Major Division	If the Corporate Action will lead to a change in the classified division, this will contain the old Division name. Division pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	29	AC6
New Sub Sector Code	If the Corporate Action will lead to a change in the classified sub-sector, this will contain the new Sub-sector code. Sub-sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	30	AD6
New Sub Sector	If the Corporate Action will lead to a change in the classified sub-sector, this will contain the new Sub-sector name. Sub-sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	31	AE6
New Sector Code	If the Corporate Action will lead to a change in the classified sector, this will contain the new Sector code. Sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	32	AF6
New Sector	If the Corporate Action will lead to a change in the classified sector, this will contain the new Sector name. Sector pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	33	AG6
New Major Division Code	If the Corporate Action will lead to a change in the classified division, this will contain the new Division code. Division pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	34	AH6
New Major Division	If the Corporate Action will lead to a change in the classified division, this will contain the new Division name. Division pertains to an internal classification maintained by JSE Issuer Regulation division that can be accessed via link Interest Rate Market Classification .	35	AI6
Old Coupon Rate	If the Corporate Action will lead to a change to the coupon/interest rate of the Debt Security, this will contain the old rate. Coupon Rate is displayed as a percentage limited to 3 decimals	36	AJ6
New Step Up/Down Coupon Rate	If the Corporate Action will lead to a change to the Step Up/Down coupon rate of the Debt Security, this will contain the new rate. Coupon Rate is displayed as a percentage limited to 3 decimals	37	AK76
Old Basis Points	If the Corporate Action will lead to a change to the basis points /margin for floating rate notes to be added to the Reference Rate, this will contain the old value.	38	AL6
New Step Up/Down Basis Points	If the Corporate Action will lead to a change to the basis points /margin for floating rate notes to be added to the Reference Rate, this will contain the new value.	39	AM6
Old Over/Under Indicator	If the Corporate Action will lead to a change to the Step-up/down indicator, that indicates whether the Basis Point value that should be added or subtracted from the Reference Rate, this will contain the old indicator.	40	AN6

	<p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes) 		
New Step Up/Down Over/Under Indicator	<p>If the Corporate Action will lead to a change to the Step-up/down indicator, that indicates whether the Basis Point value that should be added or subtracted from the Reference Rate, this will contain the new indicator.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes) 	41	AO6
Old Reference Rate	If the Corporate Action will lead to a change to the Reference Rate, that indicates whether the variable notes are linked to 3/6/9/12m JIBAR or another index, this will contain the old rate.	42	AP6
New Step Up/Down Reference Rate	If the Corporate Action will lead to a change to the Step-up/down rate, which indicates whether the variable notes are linked to 3/6/9/12m JIBAR or another index, this will contain the new rate.	43	AQ6
Tap Amount (ZAR)	Indicates the amount the Nominal amount of an already existing Debt Security should be increased with	44	AR6
Interest Commencement Date for Tap Issue	The value in this field will be picked up automatically by the system. Indicates the commencement date for interest to be calculated on the New Nominal Amount after the Tap Issue Event (Equals next interest date) Refer IBL162	45	AS6
First Interest Payment Date for Tap Issue	Indicates the actual first interest Payment Date after the Tap Issue Event. The system will create this date automatically only if the Payment date is different to the Coupon date. If Coupon date and payment dates are the same the system will not update this field.	46	AT6
Reason for Suspension	Indicates the reason for the suspension of the Debt Instrument.	47	AU6
Reason for Unsuspension	Indicates the reason for the unsuspension of the Debt Instrument.	48	AV6
CA Notes	This free form field represents additional information relevant to the Corporate Action. It contains any pertinent information not already on the Corporate Actions schedule.	49	AW6

Approval Date	Indicates the date/time the event has been approved by a second user	50	AX6
Leg 1 Type of Interest / Cash Payment	This field will indicate if the interest will be linked to <ul style="list-style-type: none"> • C – Cash payment • F – Fixed rate • K – Payment in kind • V – Variable • Z – Zero rate/discounted 	51	AY6
Leg 1 Pricing Method	The pricing method for the first leg – Yield, Inflation or Price. Yield if it corresponds to the JSE current pricing formula, Inflation if liked to CPI else it will be Price.	52	AZ6
Leg 1 Bond Calculator Indicator	The first leg that indicates that if the Debt Security can be priced then this is flagged with “Y”.	53	BA6
Leg 1 SA Bond Category	Contains the Bond Classification category for the first leg as defined by Strate as follows: <ul style="list-style-type: none"> • Category 1 – Zero/discounted instruments • Category 2 – Fixed Coupon Rate with fixed maturity date • Category 3 – Variable rate, fixed maturity date • Category 4 – All others/Flexi 	54	BB6
Leg 1 FISN	The Financial Instrument Short Name of the first leg of the Debt Security. FISN is an ISO (ISO 18774) identification standard that provides a consistent and uniform approach to standardise short names and descriptions for financial instruments. The FISN is not meant to be machine-readable, but to provide a short format for essential information about a security for human use.	55	BC6
Leg 1 CFI code	The classification of Financial Instrument code for the first leg of the Debt Security. CFI is an ISO (ISO 10962) identification standard used to define and describe financial instruments as a uniform set of codes for all market participants. The code is issued by the JSE as the accredited National Numbering Agency for South Africa. This is an alphabetic field with a maximum length of 6 characters.	56	BD6
Leg 1 Pricing Class	<ul style="list-style-type: none"> • An internal code used as an indication of the pricing methodology used. Values include: AFRN - Amortising Floating Rate Note AI - Amortising Instruments CI - Customised Instruments CP - Commercial Paper 	57	BE6

	<p>CPI – Inflation linked</p> <p>ESN - Equity Structured Note</p> <p>F - Fixed</p> <p>FC - Fixed Coupon Quarterly</p> <p>FRN - Floating Rate Note</p> <p>P - Perpetuity</p> <p>V - Vanilla Fixed</p>		
Leg 1 Coupon Rate	The first leg of the coupon/interest rate of the Debt Security. Coupon Rate is displayed as a percentage limited to 3 decimals	58	BF6
Leg 1 Business Day Convention	<p>The first leg of how payments / maturity will be treated if it should fall on a non-business day. Available values include:</p> <ul style="list-style-type: none"> • Following(This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following(The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) • Preceding(This means that the interest will be paid on the last business day before the weekend or public holiday) 	59	BG6
Leg 1 Coupon Frequency	<p>The first leg of the number of coupon/interest payments that will be made annually. Available values include:</p> <ul style="list-style-type: none"> • Annually • At Maturity • Monthly • No Coupon • Onetime • Quarterly • Semi Annually • Tri-Annually 	60	BH6

	<p>*'At Maturity' and 'No coupon' frequency is used to indicate the business truth that this bond will repay capital only (no coupon) or the capital and interest at the maturity date (at maturity)</p> <p>No coupon schedule is generated for these types of coupon frequencies and will not be included in the 'coupon schedule' file. The 'First Interest / Coupon date', 'First Books close date' and 'Last Day to Register for Maturity Amount' fields that are included in the 'coupon general' file is to indicate the dates for the capital repayment at maturity, required by the market for processing.</p>		
Leg 1 Coupon Payment Type	<p>The first leg of the type of Coupon Payment that the Debt Security will pay e.g.</p> <ul style="list-style-type: none"> • Fixed Coupon: For Fixed Rate Note bonds • Index Linked Coupon: For Index Linked Bonds • Variable Coupon: For Floating Rate Note Bonds • Zero coupon: For Bonds that don't pay any coupon 	61	BI6
Leg 1 Reference Rate	The first leg that Indicates whether the variable notes is linked to 3/6/9/12m JIBAR or another index.	62	BJ6
Leg 1 Basis points	The first leg that indicates the basis points /margin for floating rate notes, to be added to the Reference Rate.	63	BK6
Leg 1 Over/Under	<p>The first leg that indicates whether the Basis Point value that should be added or subtracted from the Reference Rate.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes) 	64	BL6
Leg 1 Rate of Reference Rate	The first leg that indicates the rate (for the Reference Rate) used for the Coupon calculation. Rate is displayed as a percentage limited to 3 decimals	65	BM6
Leg 1 Books closed period	The first leg that indicates the number of days that the books are closed between the last date to register and the coupon date.	66	BN6
Leg 1 Coupon Rate Floor	The first leg, In the event of a floating rate note, that indicates the coupon/interest rate that could be limited on the downside. Rate is displayed as a percentage limited to 3 decimals	67	BO6
Leg 1 Coupon Rate Cap	The first leg, In the event of a floating rate note, that indicates the coupon/interest rate that could be limited on the upside. Rate is displayed as a percentage limited to 3 decimals	68	BP6

Leg 1 Customised Coupon	<p>The first leg that indicates when the Coupon/interest rate is calculated and provided by the Issuer. This is when the Coupon/interest rate is system calculated or provided by the Issuer.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • External Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 	69	BQ6
Leg 1 Day count convention	<p>The first leg that indicates the day-count convention that measures how interest accrues on investments. In the Debt Security market, this determines the number of days and the amount of accrued interest between two coupon dates (when the next coupon date is less than a full coupon period away). The calculation is important to traders of various bonds because, when a bond is sold, the seller is entitled to a portion of the coupon payment.</p> <p>Options are:</p> <ul style="list-style-type: none"> • 30/360 • Actual/360 • Actual/365 	70	BR6
Leg 1 Date of Listing Reference rate	The first leg that indicates the specified date to be used for the Reference Rate.	71	BS6
Leg 1 Base CPI	The first leg that indicates the applicable base CPI rate.	72	BT6
Leg 1 Linked\Reference Index	<p>The first leg that indicates if the Bond is linked to an Index which can be one of the following:</p> <ul style="list-style-type: none"> • CPI • OTHER • PPI • RPI 	73	BU6
Leg 2 Type of Interest / Cash Payment	<p>This field will indicate if the interest will be linked to</p> <ul style="list-style-type: none"> • C – Cash payment • F – Fixed rate • K – Payment in kind • V – Variable <p>Z – Zero rate/discounted</p>	74	BV6

Leg 2 Pricing Method	The pricing method for the second leg – Yield, Inflation or Price. Yield if it corresponds to the JSE current pricing formula, inflation if linked to CPI else it will be Price.	75	BW6
Leg 2 Bond Calculator Indicator	The second leg that indicates that if the Debt Security can be priced then this is flagged with “Y”.	76	BX6
Leg 2 SA Bond Category	Contains the Bond Classification category for the second leg as defined by Strate as follows: <ul style="list-style-type: none"> • Category 1 – Zero/discounted instruments • Category 2 – Fixed Coupon Rate with fixed maturity date • Category 3 – Variable rate, fixed maturity date • Category 4 – All others/Flexi 	77	BY6
Leg 2 FISN	The Financial Instrument Short Name of the second leg of the Bond. FISN being an ISO (ISO 18774) identification standard that provides a consistent and uniform approach to standardise short names and descriptions for financial instruments. The FISN is not meant to be machine-readable, but to provide a short format for essential information about a security for human use.	78	BZ6
Leg 2 CFI code	The classification of Financial Instrument code for the second leg of the Bond. CFI is an ISO (ISO 10962) identification standard used to define and describe financial instruments as a uniform set of codes for all market participants. The code is issued by the JSE as the accredited National Numbering Agency for South Africa. This is an alphabetic field with a maximum length of 6 characters.	79	CA6
Leg 2 Pricing Class	<ul style="list-style-type: none"> • An internal code used as an indication of the pricing methodology used. Values include: AFRN - Amortising Floating Rate Note AI - Amortising Instruments CI - Customised Instruments CP - Commercial Paper CPI – Inflation linked ESN - Equity Structured Note F - Fixed FC - Fixed Coupon Quarterly FRN - Floating Rate Note 	80	CB6

	<p>P - Perpetuity</p> <p>V - Vanilla Fixed</p>		
Leg 2 Coupon Rate	The second leg of the coupon/interest rate of the Debt Security. Coupon Rate is displayed as a percentage limited to 3 decimals	81	CC6
Leg 2 Business Day Convention	<p>The second leg of how payments / maturity will be treated if it should fall on a non-business day. Available values include:</p> <ul style="list-style-type: none"> • Following(This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following(The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) <p>Preceding(This means that the interest will be paid on the last business day before the weekend or public holiday.)</p>	82	CD6
Leg 2 Coupon Frequency	<p>The second leg of the number of coupon/interest payments that will be made annually. Available values include:</p> <ul style="list-style-type: none"> • Annually • At Maturity • Monthly • No Coupon • Onetime • Quarterly • Semi Annually • Tri-Annually <p>*'At Maturity' and 'No coupon' frequency is used to indicate the business truth that this bond will repay capital only (no coupon) or the capital and interest at the maturity date (at maturity)</p> <p>No coupon schedule is generated for these types of coupon frequencies and will not be included in the 'coupon schedule' file. The 'First Interest / Coupon date', 'First Books close date' and 'Last Day to Register for Maturity Amount' fields that are included in the 'coupon general' file is to indicate the dates for the capital repayment at maturity, required by the market for processing.</p>	83	CE6

Leg 2 Coupon Payment Type	<p>The second leg of the type of Coupon Payment that the Debt Security will pay e.g.</p> <ul style="list-style-type: none"> • Fixed Coupon: For Fixed Rate Note bonds • Index Linked Coupon: For Index Linked Bonds • Variable Coupon: For Floating Rate Note Bonds <p>Zero coupon: For Bonds that don't pay any coupon</p>	84	CF6
Leg 2 Reference Rate	The second leg that Indicates whether the variable notes is linked to 3/6/9/12m JIBAR or another index.	85	CG6
Leg 2 Basis points	The second that indicates the basis points /margin for floating rate notes, to be added to the Reference Rate.	86	CH6
Leg 2 Over/Under	<p>The second leg that indicates whether the Basis Point value that should be added or subtracted from the Reference Rate.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points <p>Margin/bps less ref rate = Basis points minus the reference rate (This option is applicable to Inverse Floating Rate Notes)</p>	87	CI6
Leg 2 Rate of Reference Rate	The second leg that indicates the rate (for the Reference Rate) used for the Coupon calculation. Rate is displayed as a percentage limited to 3 decimals	88	CJ6
Leg 2 Books closed period	The second leg that indicates the number of days that the books are closed between the last date to register and the coupon date.	89	CK6
Leg 2 Coupon Rate Floor	The second leg, In the event of a floating rate note, that indicates the coupon/interest rate that could be limited on the downside. Rate is displayed as a percentage limited to 3 decimals	90	CL6
Leg 2 Coupon Rate Cap	The second leg, In the event of a floating rate note, that indicates the coupon/interest rate that could be limited on the upside. Rate is displayed as a percentage limited to 3 decimals	91	CM6
Leg 2 Customised Coupon	<p>The first leg that indicates when the Coupon/interest rate is calculated or provided by the Issuer.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • External <p>Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date</p>	92	CN6

	<ul style="list-style-type: none"> • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 		
Leg 2 Day count convention	<p>The second leg that indicates the day-count convention that measures how interest accrues on investments. In the Debt Security market, this determines the number of days and the amount of accrued interest between two coupon dates (when the next coupon date is less than a full coupon period away). The calculation is important to traders of various bonds because, when a bond is sold, the seller is entitled to a portion of the coupon payment.</p> <p>Options are:</p> <ul style="list-style-type: none"> • 30/360 • Actual/360 • Actual/365 	93	CO6
Leg 2 Date of Listing Reference rate	The second leg that indicates the specified date to be used for the Reference Rate.	94	CP6
Leg 2 Base CPI	The second leg that indicates the applicable base CPI rate.	95	CQ6
Leg 2 Linked\Reference Index	<p>The second leg that indicates if the Bond is linked to an Index which can be one of the following:</p> <ul style="list-style-type: none"> • CPI • OTHER • PPI • RPI 	96	CR6
Pricing redemption date	<p>The date field is used for calculating the valuation of the instrument up to the specified date. This date is set to the next Call Date and then updated to either the next Call date or the Maturity date if the instrument is not called. If there is no call date this date is set to legal Final Maturity date.</p>	97	CS6
Lookback Period	<p>The Period as defined by the Issuer for the calculation of the Coupon Rate.</p> <p>This field is populated if the Reference Rate is 'ZARONIA'.</p>	98	CT6
Credit Adjustment Spread	A Credit Adjustment Spread (CAS) is a fixed numerical adjustment rate to account for the difference in credit risk and term structure between JIBAR and ZARONIA, ensuring economic neutrality during the transition.	99	CU6
New Books Closed Period	The number of days that the books are closed between the last date to register and the coupon date.	100	CV6
New Business Day Convention	Indicate how payments / maturity will be treated if it should fall on a non-business day.	101	CW6

	<p>Available values include:</p> <ul style="list-style-type: none"> • Following(This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following(The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) • Preceding(This means that the interest will be paid on the last business day before the weekend or public holiday.) 		
New Day Count Convention	<p>A day-count convention measures how interest accrues on investments. In the Debt Security market, this determines the number of days and the amount of accrued interest between two coupon dates (when the next coupon date is less than a full coupon period away). The calculation is important to traders of various bonds because, when a bond is sold, the seller is entitled to a portion of the coupon payment.</p> <p>Options are:</p> <ul style="list-style-type: none"> • 30/360 • Actual/360 <p>Actual/365</p>	102	CX6
New Customised Coupon	<p>This indicates if the Coupon/interest rate is system calculated or provided by the Issuer.</p> <p>Available values include:</p> <ul style="list-style-type: none"> • External Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 	103	CY6

6.3 BONDS CORPORATE ACTIONS REFERENCE DATA UPDATE EVENT

Note: Detail in this file includes manual update(s) done on any field on a bond instrument, where it wasn't updated through a standard corporate event

CSV Version		Excel Version	
File Name	Bonds CA Reference Data Update Event_YYMMDD_HHMM	Workbook Name	There is no CSV version

Detail				
Field Name	Field Description	CSV Column	Excel Cell	
CA Event ID	The unique identifier for this specific Corporate Event.	1	A6	
CA Event Status	The status of the specific Corporate Event.	2	B6	
Issuer Name	The name of the entity approved by the Exchange to issue Debt Securities on the Exchange under the Interest Rate Market	3	C6	
JSE Alpha Code	Primary JSE identifier for the Debt Security as defined by the Issuer. Also referred to as “Bond Code” or “Stock Code”. It is an alphanumeric field with a maximum length of 6 characters and always expressed in Capital Letters.	4	D6	

	• .		
ISIN	<p>International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa.</p> <p>It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumerical national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.</p>	5	E6
Universal Instrument Master Id	Unique ID assigned to any Instrument generated at the JSE.	6	F6
Issue Type	<p>Instrument type used to classify Debt Security Instruments. Types are as follows:</p> <ul style="list-style-type: none"> • FXRN-Fixed Rate Note • FLRN-Floating Rate Note • MXRN-Mixed Rate Note • IDXLN-Index-Linked Notes • CRLN-Credit Linked Notes • STNT-Structured Note • ZCNT-Zero Coupon Note 	7	G6
Effective Date	The date that the changes stipulated in the Corporate Action event will become effective.	8	H6
Changed Field Name	Name of the field being changed	9	I6
Qualifier	Specific qualifier of field being changed if multi-occurring field	10	J6
Old Value	Value Before Event	11	K6
New Value	Value After Event	12	L6
CA Notes	This free form field represents additional information relevant to the Corporate Action. It contains any pertinent information not already on the Corporate Actions schedule.	13	M6
Approval Date	Indicates the date/time the event has been approved by a second user	14	N6

7 BONDS CORPORATE RATE UPDATE

The Bonds Corporate Rate Update data product provides key upcoming Rate changes that affect *listed* instruments in the Bond Market.

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats.

The daily files are made available two times each business day with the new version completely replacing the old version each time so the new version does not contain delta changes. The SLA time for the different publication time is **10h40, 13h30** but the JSE will always endeavour to make the files as early as possible after they are produced

To cater for historical retrieval, the daily and monthly data files for the last rolling 40 business days will be available on the IDP server with the historical data files suffixed with “_yyymmdd”.

N.B. SARB has the option to republish the ZARONIA rate at 12 PM on a given day if required, the republished rate will be disseminated by the JSE in the 13h30 publication.

7.1 DAILY DATA FILE NAMES AND LOCATION

CSV Format File Names	IDP Folder Location
Bonds Coupon Rate Update_YYYYMMDD_Early.csv Bonds Coupon Rate Update_YYYYMMDD_Late.csv	Distribution\Bonds Market Prod\Market Data\Bonds Coupon Rate Update\

Excel Format File Names	IDP Folder Location
Bonds Coupon Rate Update_YYYYMMDD_Early.xlsx Bonds Coupon Rate Update_YYYYMMDD_Early.xlsx	Distribution\Bonds Market Prod\Market Data\Bonds Coupon Rate Update\

7.2 BONDS COUPON RATE UPDATE

The file is disseminated twice a day.

- The early file which is created at 10h24 will include the majority of the reset instruments for the day, if linked to JIBAR with a standard calculation (Customised coupon indicator = internal).
- The second (late) file disseminated at 13h30 is a delta file and will only include resets for instruments that wasn't included in the first file where these bonds are linked to complex formulas where the Issuer has to calculate and provide the updated rate to the JSE (Customised coupon indicator = external)

Detail					
Field Name	Field Description			CSV Column	Excel Cell
CA Event ID	The unique identifier for this specific Corporate Event.			1	A6

CA Event Status	The status of the specific Corporate Event.	3	B6
Issuer Name	The name of the entity approved by the Exchange to issue Debt Securities on the Exchange under the Interest Rate Market	4	C6
JSE Alpha Code	Primary JSE identifier for the Debt Security as defined by the Issuer. Also referred to as “Bond Code” or “Stock Code”. It is an alphanumeric field with a maximum length of 6 characters and always expressed in Capital Letters.	5	D6
ISIN	International Security Identification Number that the JSE generates for all South African Instruments as the accredited National Numbering Agency for South Africa. It is unique per instrument and a twelve-character number that consists of a two-letter country code, followed by the nine-character alphanumeric national security identifier, and a check digit. ISINs issued by the JSE for Debt Security instruments will have a “G” in the third character.	6	E6
Universal Instrument Master Id	Unique ID assigned to any Instrument generated at the JSE.	7	F6
Coupon Payment Type	This field describes the type of Coupon Payment that the Bond will pay e.g. <ul style="list-style-type: none"> • Fixed Coupon: For Fixed Rate Note bonds • Index Linked Coupon: For Index Linked Bonds • Variable Coupon: For Floating Rate Note Bonds Zero coupon: For Bonds that don’t pay any coupon	8	G6
Coupon Frequency	The number of coupon/interest payments made annually. Available values include: <ul style="list-style-type: none"> • Annually • At Maturity • Monthly • No Coupon • Onetime • Quarterly • Semi Annually • Tri-Annually 	9	H6

	<p>*'At Maturity' and 'No coupon' frequency is used to indicate the business truth that this bond will repay capital only (no coupon) or the capital and interest at the maturity date (at maturity)</p> <p>No coupon schedule is generated for these types of coupon frequencies and will not be included in the 'coupon schedule' file. The 'First Interest / Coupon date', 'First Books close date' and 'Last Day to Register for Maturity Amount' fields that are included in the 'coupon general' file is to indicate the dates for the capital repayment at maturity, required by the market for processing.</p>		
Customised Coupon	<p>This indicates if the Coupon/interest rate is system calculated or provided by the Issuer. Available values include:</p> <ul style="list-style-type: none"> • External Indicates that the issuer/sponsor needs to calculate and provide the coupon to the JSE at Reset Date • Internal Indicates that sufficient information is available for the JSE systems to automatically calculate the coupon rate at reset date 	10	I6
Business Day Convention	<p>Indicates how payments / maturity will be treated if it should fall on a non-business day. Available values include:</p> <ul style="list-style-type: none"> • Following(This means that the interest will be paid on the first business day after the weekend or public holiday.) • Modified Following(The same rule as above applies. However, if the first business day after the weekend or public holiday falls in a new calendar month the last business day before the weekend / public holiday will be used instead.) • Preceding(This means that the interest will be paid on the last business day before the weekend or public holiday.) 	11	J6
Old Coupon Rate	The old coupon/interest rate of the Debt Security. Rate is displayed as a percentage limited to 3 decimals	12	K6

New Coupon Rate	The new coupon/interest rate of the Debt Security. Rate is displayed as a percentage limited to 3 decimals	13	L6
New Basis Points	Indicates the basis points /margin for floating rate notes, to be added to the Reference Rate.	14	M6
New Over/Under Indicator	Indicates the old indicator that dictates whether the Basis Point value that should be added or subtracted from the Reference Rate. Available values include: <ul style="list-style-type: none"> • Over = Reference rate plus Basis points • Under = Reference rate minus Basis points • Margin/bps less ref rate = Basis points minus the eference rate (This option is applicable to Inverse Floating Rate Notes) 	15	N6
New Reference Rate	Indicates whether the variable notes is linked to 3/6/9/12m JIBAR or another index.	16	O6
New Rate of Reference Rate	The rate (for the Reference Rate) used for the Coupon calculation	17	P6
Next Coupon Date	The next date when a Debt Security will pay a coupon but depending on the business day convention.	18	Q6
Next Reset Date	The next date when a Debt Security will pay a coupon but depending on the business day convention.	19	R6
Next payment Date	Next coupon payment date.	20	S6
Approval Date	Indicates the date/time the event has been approved by a second user	21	T6
