

## SERVICE HOTLINE

**Number:** 023/2025  
**Date:** 17 March 2025

**Name and Surname:** Martin Koch  
**Designation:** Head - Trading Operations

## TRADING SYSTEM OS UPGRADE

We are pleased to inform you that the MillenniumIT trading solution, which powers our Equity, Equity Derivative, and Currency Derivative Markets, will undergo a comprehensive Operating System (OS) technical upgrade. This initiative is part of our commitment to maintaining best practices and ensuring the highest standards of performance, security and reliability.

The upgrade will be implemented in phases, starting with the CTS Production, CTS Release and Staging (TB75) environments on Friday, 21 March 2025, which will be effective Monday, 24 March 2025. This phased approach will allow us to thoroughly test and validate the enhancements in preparation for full production deployment on Friday, 18 April 2025, to be effective Monday, 21 April 2025.

We kindly request your participation in testing these environments to ensure a smooth transition. Additionally, we highly recommend testing during the change weekend on the production environment to promote continuity during the transition.
