TRADING AND INFORMATION SYSTEM RELEASES IN CTS - 11 APRIL 2022

With reference to [Service Hotline 027/2022](#) and [Attachment](#) issued 4 March 2022, market participants are hereby informed of the deployment into CTS Release (2A) of the Trading and Information System release version 7.4 effective 11 April 2022. Go-Live for release version 7.4 is scheduled for **28 May 2022** and dates for release version 7.5 will be communicated.

The releases will include:

- Internal JSE changes to the Regulatory NEWS Gateway
- Data field enhancements on Enhanced Statistics message
- Transact Time alignment on Post Trade Gateway

A further reminder is drawn to the Native Trading Gateway protocol versioning change. The JSE requests all clients to ensure that they make use of **protocol version 2 from 1 July 2022** only as the default versioning on the **Equity Market protocol**. This is to ensure that the JSE can release further market-facing functionality in H2 2022. There are no versions on the Derivative Markets protocol.

For more information pertaining to the release, please refer to the JSE Trading Release document available on the JSE website under “Next Functional Release” using the following link:

<https://clientportal.jse.co.za/technical-library/trading-and-market-data-documentation>

Please refer all API Specification, connectivity and testing related queries to CustomerSupport@jse.co.za
