JSE TRADING AND INFORMATION SYSTEM THROTTLING ISSUE BANDWIDTH UPDATE

The JSE had planned the below updates to the minimum bandwidth requirements for the MillenniumIT Trading and Information System which will affect the Equity Market, Equity Derivative and Currency Derivative Market. Today the EQM throttled feed experienced throttling that eventually resulted in dropped multicast packets as the system configuration to not send more than the minimum bandwidth of 1.822 Mbps to bandwidth sensitive clients was upheld.

The minimum bandwidth increases will be updated effective 5 May 2025 in CTS Production and CTS Release and effective 7 July 2025 on Production, **with the immediate change of the EQM Throttled service to become effective immediately tomorrow, 10 April 2025.**
