EQM, EDM AND FXM TRADING SYSTEM BANDWIDTH UPDATE

The JSE will increase the bandwidth limits for the EQM, EDM and FXM Unthrottled and Throttled Level 2 market data feeds. This follows sustained periods of elevated market activity and pressure on existing bandwidth thresholds.

These updates are intended to improve feed resilience and support consistent delivery during high-volume trading conditions.

We will implement the changes in phases to give clients time to review the updates, confirm readiness, and provide feedback.
