BOND, INTEREST RATE & COMMODITY DERIVATIVES MARKETS SECURITY **ENHANCEMENT - DRESS REHEARSAL - 2 JULY 2022**

We are introducing additional security to the Bond (IRM), Interest Rate (IRD) & Commodity Derivatives (CDM) Markets, trading and clearing systems effective, Monday, 4th July 2022.

This implementation includes a micro segmentation security capability across our data centre and services. The servers responsible for the IRM, IRD and CDM Markets will be enforced with approved rules, driving a zero-trust policy across the various JSE assets within our data centre.

To ensure minimal impact to market participants we are conducting a market dress rehearsal on Saturday, 2nd July 2022.

We encourage market participants listed below to secure the date with a detailed **Issued By:** test plan to follow:

Participant	Test Requirements
Trading Members	Connectivity to frontend Trading System;
	Confirm business as usual trading activities.
Clearing Members	Connectivity testing is mandatory for all
	clearing members;
	JSE Clear will complete all end of day
	activities and recommend that all clearing
	members perform the same testing
	interfacing to JSE Clear for the purposes of
	this test.
Live Information Subscribers	Connectivity to Market Data Gateways;
	Confirm flow of multicast data;
	Re-request data;
Software Providers	Connectivity to frontend Trading System;
	Confirm business as usual trading activities.

Thank you for your support in enhancing our security.
