JSE INTEREST RATE AND CURRENCY DERIVATIVES MARKET – INFRASTRUCTURE UPGRADE 4 AND 5 FEBRUARY 2017

With respect to the recent IRC Nutron system outages, the JSE will be performing a major infrastructure upgrade on Saturday, 4 and Sunday, 5 February 2017.

At 12h00 on Saturday, 4 February the JSE will communicate whether the infrastructure upgrade was successful or not.

If the upgrade is successful, it is highly recommended that all IRC Members participate in a connectivity test, which will take place between 14h00 and 16h00 on Saturday, 4 February 2017.

If the upgrade is unsuccessful, clients will not be required to perform a connectivity test on Saturday, but rather a connectivity test on the original infrastructure.

This connectivity test will take place at 12h00 on Sunday, 5 February 2017 once the roll-back has been completed.

The JSE does **not** mandate clients to participate in this change, but strongly recommends client participation.

The JSE appreciates your co-operation in this regard and should you wish to participate in the connectivity test, please contact the Client Services Centre for further details.

Market/s:

Interest Rate and Currency
Derivatives Market

Environment(s):

Production
