4	FTSE/JSE AFRICA INDEX SERIES.....	<u>3152</u>
5	SECTOR CLASSIFICATION	<u>3253</u>
6	GLOSSARY OF TERMS.....	<u>3253</u>
7	EXPLANATION OF THE INDEX TREATMENT FOR SPECIFIC CORPORATE ACTIONS (DUMMY LINES IN DATA RECORDS).....	<u>3455</u>
8	FTSE / JSE AFRICA INDEX SERIES – CORE INDICES	<u>3556</u>
8.1	Valuations Data Files (Index Values).....	<u>3556</u>
8.1.1	Leading Record Layout	<u>3556</u>
8.1.2	Record Type DFV Sub Type 02 Sequence No. 01	<u>3657</u>
8.1.3	Record Type DFV Sub Type 02 Sequence No. 02	<u>3758</u>
8.2	CONSTITUENTS DATA FILES	<u>3859</u>
8.2.1	Leading Record Layout	<u>3859</u>
8.2.2	Record Type DFC Sub Type 01 Sequence No. 01	<u>3960</u>
8.2.3	Record Type DFC Sub Type 01 Sequence No. 02	<u>4061</u>
8.2.4	Record Type DFC Sub Type 01 Sequence No. 03	<u>4162</u>
8.2.5	Record Type DFC Sub Type 01 Sequence No. 04	<u>4263</u>
8.3	ENHANCED CONSTITUENTS DATA FILES.....	<u>4364</u>
8.3.1	Leading Record Layout	<u>4364</u>
8.3.2	Record Type DFA Sub Type 01 Sequence No. 01	<u>4465</u>
8.4	TRACKER DATA FILES.....	<u>4667</u>
8.4.1	TRACKER 1 – INDEX LEVEL DATA.....	<u>4667</u>
8.4.1.1	Leading Record Layout	<u>4667</u>
8.4.1.2	Record Type DFT Sub Type 03 Sequence No. 01	<u>4768</u>
8.4.1.3	Record Type DFT Sub Type 03 Sequence No. 02	<u>4869</u>
8.4.2	TRACKER 2 - STOCK LEVEL DATA - WEIGHTING AMENDMENTS	<u>4970</u>
8.4.2.1	Leading Record Layout	<u>4970</u>
8.4.2.2	Record Type DFT Sub Type 04 Sequence No. 01	<u>5071</u>
8.4.2.3	Record Type DFT Sub Type 04 Sequence No. 02	<u>5172</u>
8.4.2.4	Record Type DFT Sub Type 04 Sequence No. 03	<u>5273</u>
8.4.3	TRACKER 3 - STOCK LEVEL DATA - EX-DIVIDEND CHANGES	<u>5374</u>
8.4.3.1	Leading Record Layout	<u>5374</u>
8.4.3.2	Record Type DFT Sub Type 05/07 Sequence No. 01 - 99	<u>5475</u>
8.4.3.3	Record Type DFT Sub Type 06/08 Sequence No. 01 - 99	<u>5576</u>

8.5 OPENING CONSTITUENTS DATA FILES	5677
8.5.1 Leading Record Layout	5677
8.5.2 Record Type DFO Sub Type 11 Sequence No. 01	5778
8.5.3 Record Type DFO Sub Type 11 Sequence No. 02	5879
8.5.4 Record Type DFO Sub Type 11 Sequence No. 03	5980
8.5.5 Record Type DFO Sub Type 11 Sequence No. 04	6084
8.6 FIVE-DAY TRACKER DATA	6182
8.6.1 STOCK LEVEL DATA - WEIGHTING AMENDMENTS	6182
8.6.1.1 Leading Record Layout	6182
8.6.1.2 Record Type DFF Sub Type 14 Sequence No. 01	6283
8.6.1.3 Record Type DFF Sub Type 14 Sequence No. 02	6384
8.6.1.4 Record Type DFF Sub Type 14 Sequence No. 03	6485
9 FTSE / JSE AFRICA INDEX SERIES – CAPPED INDICES	6586
9.1 VALUATIONS DATA FILES	6586
9.1.1 Leading Record Layout	6586
9.1.2 Record Type DCV Sub Type 02 Sequence No. 01	6687
9.1.3 Record Type DCV Sub Type 02 Sequence No. 02	6788
9.2 CONSTITUENTS DATA FILES	6889
9.2.1 Leading Record Layout	6889
9.2.2 Record Type DCC Sub Type 01 Sequence No. 01	6990

1 VERSION CONTROL

Version	Author	Change date	Reason for Change
1 – 1.6	Neil Vendeiro		Initial Draft
1.7	Hannelie Venter	1 Dec 2009	Updated Sector Classification in line with the Industry Classification Benchmark (ICB) - 2009 Enhancements initiated by FTSE Group.
1.8	Eunice Nel	19 Jan 2010	Changed the Constituent Code's field length from 6 to 10 characters. The following Record Types are affected together with their Namibian counterparts: DFC 01 DFT 04 DFT 05/07 DCC 01 DCT 04 DCT 05/07 DPC 01 DPT 04 DPT 05/07 DYC 01 DYT 04 DYT 05/07 DDC 01 DDT 04
1.9	James Hough	15 Oct 2010 21 Jan 2011	Updated Index definitions for new indices in Section 4. Added the following new sections for new products and record types: Sections 13 to 1924. Added part 2 of Annexure A to describe country code translation in the new record types.
1.9 (revised)	James Hough	1 Apr 2011	Errors found in the layout positions of the following record types were all corrected (refer to <i>Errors in FTSE-JSE InfoMax User Manual Version 1.9</i> document): DNC01, DNV02, DNO11, D1C01, D1V02, D2C01, D2V02, D3C01, D3V02, D4C01, D4V02
This table continues on the next page			

Version	Author	Change date	Reason for Change
1.10	James Hough	1 Aug 2011	- The following record types had errors in the starting positions (previous field's length wasn't consistent with following field's start position). The definition in the file was inconsistent with what was being produced: D1T03, D2T03, D3T03, D4T03, DNT03 - The SEDOL fields in these record types had an invalid end position (the length was correct as was the start of the next field, so overall layout is not affected): D1T04, D2T04, D3T04, D4T04, DNT04 - The heading text was corrected on the following headings: 19.3.1.324.3.1.3 and 19.3.3.224.3.3.2 - The fields "Modified Date" and "Effective Date" had an inconsistent end position for DRF14 sequence 03 (the length was correct as was the start of the next field, so overall layout is not affected). - Added the following new sections for new product record types: Section 2022 to section 2426 - New Index descriptions in section 4.
1.11	James Hough	10 Aug 2011	- New TDIV Index description added to Section 4. - Added the following new sections for new product record types: Section 2527 to section 3436
1.12	James Hough	27 Sep 2011	- Change to the continuation of the tracker records for constituent amendments. For other stock-level amendment record types (like DFT04) when an instrument has multiple amendments then the details of the first amendment runs from continuation 01 to 04 and the details of the second amendment record for the same instrument runs from continuation 05 to 08, etcetera. This was not the case for the record types introduced in version 1.9, but to aid processing, the change has now been implemented in the following record types: DAT04, DAF14, DIT04, DIF14, DHT04, DHF14, DRT04, DRF14, DQT04, DQF14, DNT04, DNF14, D1T04, D1F14, D2T04, D2F14, D3T04, D3F14, D4T04, D4F14 - In order to process the changes identified in point 1 above, the "EMPTY PADDING" field on these record types has been replaced by a generated "EQUITY IDENTIFIER" field.
This table continues on the next page			

Version	Author	Change date	Reason for Change
1.13	Mark Randall	20 Mar 2012	1. New Index descriptions for JN00, JN0U, JNX4, JNR4 and JNS4 in section 4 2. A change to the description of the TRI calculation in section 37.139.1 37.139.4
1.14	Brian Nkosi	24 Mar 2012	New record types SL 01 and SL 02. 1. SL 01 consists of instrument intraday snapshot as at 15:00. 2. SL 02 contains index intraday snapshot as at 15:00.
1.15	Eunice Nel	1 November 2013	Added descriptions for 3 new Indices in section 4: 1. All Share Net TRI 2. Shareholder Weighted All Share Net TRI 3. Preference Share Net TRI
1.16	Eunice Nel	1 October 2013	Addition of the ISIN field to the Leading Record Layout of the All Africa and International Benchmark Index Record Types: • D1C, D1T04, D1F • D2C, D2T04, D2F • D3C, D3T04, D3F • D4C, D4T04, D4F • DNC, DNT04, DNF, DNO
1.17	Haseel Bhima	01 April 2014	Update SW “Weighting Change” in Annexure A

2 DISCLAIMER

This manual has been produced as a guide at a given point of time and in an abbreviated form, to the key provision of the JSE Limited Rules and directives, Stock Exchanges Act and Related legislation.

Given the compressed and dated nature of the contents of a document such as this, it should not be construed as the full and official interpretation of the Act, Rules and Directives; and the JSE Limited does not accept any responsibility or liability for any errors or omission in the formulation of this manual, nor for any consequential claims arising there from. Accordingly, the JSE Limited accepts no responsibility for any transaction entered into as a result of the contents herein.

3 INTRODUCTION

The aim of the Dissemination system is to provide users with raw data on daily Index movements. All information offered for dissemination is extracted from the relevant JSE systems, and held in a central database. Each user can specify the type of records they require from the standard layouts available. The users can get their data via ISDN or Leased line connection.

The user must inform the Market Data Department in writing of the record types they would like to receive.

3.1 CONFIRMATION OF USER ID AND PASSWORD

1. A representative from the Business Support department will provide you with your Sign-on and Dataset name before 11am on the day you go live.
2. For security purposes, a representative from the RACF department will provide you with your Password.
3. An Account Officer, from the Market Data Department will contact you to confirm receipt of the Dataset, UserID and Password.
4. The onus is on you to test as soon as you have received the above-mentioned information to ensure that you will gain access to the Mainframe.

Should you experience any problems relating to the information communicated to you or the actual testing of this information, please contact the under-mentioned persons for assistance:

4 FTSE/JSE AFRICA INDEX SERIES

THE INDICES OF THE FTSE/JSE AFRICA INDEX SERIES

The FTSE/JSE Africa Index Series resulted from a joint venture between the JSE Limited (JSE) and the FTSE Russell Group (FTSE), a world leader in the creation and management of indices. The series brought with it a change in the philosophy and methodology for calculating indices and classifying sectors. The FTSE/JSE Africa Index Series replaced the JSE Actuaries indices on 24 June 2002.

The FTSE/JSE Africa Index Series complies with the recommendations made by the International Organization of Securities Commissions (IOSCO), as laid out in the Principles for Financial Benchmarks published in July 2013 (the IOSCO Principles). More information is available at www.ftserussell.com

FTSE/JSE Africa Headline Indices

All eligible listed companies are included in at least one of the FTSE/JSE Africa Headline Indices. The eligible companies are ranked by full market capitalisation (before free float weightings are applied). The top 99% of all companies are included in the **FTSE/JSE All Share Index** with the remaining 1% forming the **FTSE/JSE Fledgling Index**. The FTSE/JSE All Share Index is further divided into the **FTSE/JSE Large Cap Index**, **FTSE/JSE Mid Cap Index** and **FTSE/JSE Small Cap Index**. For a full list of Indices and their details, please click on this link <https://www.jse.co.za/services/indices/ftsejse-africa-index-series>

5 SECTOR CLASSIFICATION

Securities are classified according to the **ICB Classification** System,

Please refer to the link below for more information regarding the new ICB structure that was introduced on 1 July 2019:

<https://www.ftserussell.com/data/industry-classification-benchmark-icb>

6 GLOSSARY OF TERMS

12 Month High Value	The highest index value, which the index reached over the past 12 months. MAX(Index Value) for every Index over a 12 month period.
12 Month Low Value	The lowest index value, which the index reached over the past 12 months. MIN(Index Value) for every Index over a 12 month period.
Day of High	The highest index value achieved during the day/week/month. MAX(Index Value) for every Index over a day/Week/month period.
Date of High	The date on which the highest value was attained during the past wweek/month/year. Select Date for MAX(Index Value) for every Index over a Month period.
Date of Low	The date on which the lowest value was attained during the past week/month/Year. Select Date for MIN(Index Value) for every Index over a week/month/12 Month period.
Earnings Yield	The earnings per Instrument for the past 12 months divided by the closing price (CSII * ARHEPS) / Instrument Market Capitalisation
Low Value	The lowest index value achieved during the day/month/week MIN(Index Value) for every Index over a Day/week/month period
Total Value Traded	The total value of Instruments traded for the index constituents during the week/month. SUM(Trade Volume * Trade Price / 100) for every Constituent in every Index over a week/month period
Total Volume Traded	The total volume of Instruments traded for the index constituents during the day/week/month. SUM(Trade Volume) for every constituent in every Index over a day/week/Month period

Value Traded

The total value of instruments traded for the index constituents during the day.
 $\text{SUM}(\text{Trade Volume} * \text{Trade Price} / 100)$ for every constituent in every Index over a day period

7 EXPLANATION OF THE INDEX TREATMENT FOR SPECIFIC CORPORATE ACTIONS (DUMMY LINES IN DATA RECORDS)

FTSE Russell Rules regarding the use of Dummy Lines in Indices:

- 7.1. Dummy lines are non-tradable instruments which have been temporarily created by FTSE/JSE in order to reflect a corporate event.
- 7.2. The use of dummy lines is normally determined on an ad hoc basis and typically results from complexities surrounding a corporate event.
- 7.3. Where the use of dummy lines is necessary FTSE/JSE provides advance notification either via an Informative Notice published on the FTSE/JSE website. Dummy lines will also be visible within the standard corporate action deliverables when they are being utilized.
- 7.4. Dummy lines are generally used in order to ensure the index reflects the investor experience or in order to facilitate index replication by index funds.

Under this rule the JSE would add in a dummy line on ex-date to represent the distribution until after settlement date, and then subsequently delete the dummy line and increase the free float in the distributed stock on the same date.

If the distributed instrument is not eligible for index inclusion, the index divisor will change with the deletion of the dummy line.

On the ex-date of the distribution:

- The stock which is distributing its shareholding price will be adjusted.
- This is offset by the addition of a dummy line which corresponds with the value of the distribution – the terms are applied to the share figure and the price is updated nightly to match the close price of the stock which is being distributed.
- Market cap neutral for all holders.

T + 2 from the settlement occurring:

- The dummy line is deleted.
- The stock which has been distributed has its free float adjusted to reflect the terms distributed into the index.
- Market cap neutral only for the shared indexes.

An ISIN will be generated to contain the word 'DUMMY' in order to distinguish it from other securities.

N.B. Please refer to FTSE Russell Corporate Actions and Events Guide for Market Capitalisation Weighted Indexes on this link: [Click Here](#)

8 FTSE / JSE AFRICA INDEX SERIES – CORE INDICES

8.1 VALUATIONS DATA FILES (INDEX VALUES)

8.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Board	28	4 (T)	31
Market	32	4 (T)	35
Exchange	36	4 (T)	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g.: DFV.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 01.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
BOARD	The board the Index is linked to.
MARKET	The market the Index is linked to.
EXCHANGE	The exchange the Index is linked to.
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

This file contains the index closing positions for the current trading day.

8.1.2 Record Type DFV Sub Type 02 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents	46	15	60
Capital index (ZAR)	61	18 (10.8)	78
Total return index (ZAR)	79	18 (10.8)	96
XD adjustment (today)	97	13 (7.6)	109
XD adjustment (YTD)	110	13 (7.6)	122
Market capitalisation (ZAR)	123	16 (10.6)	138
Actual dividend yield	139	7 (3.4)	145

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS	Number of lines of stock included in index calculation (including secondary lines), as at today's market close.
CAPITAL INDEX (ZAR)	Today's capital index value.
TOTAL RETURN INDEX (ZAR)	Today's total return index value. See Appendix A for definition and calculation method.
XD ADJUSTMENT (TODAY)	Todays ex dividend adjustment in Rands. $= \frac{\sum (\text{shares} \times \text{investibility} \times \text{actual dividend})}{\sum (\text{shares} \times \text{investibility} \times \text{price})}$
XD ADJUSTMENT (YTD)	Ex-dividend adjustment year to date (from 1 Jan to 31 Dec.).
MARKET CAPITALISATION (ZAR)	Market capitalisation in Rands millions at today's close (net, after free float)
ACTUAL DIVIDEND YIELD	Actual dividend yield. $\frac{\text{Annual div (in currency of price)}}{\text{Price}} = \text{Stock div}$ $\text{Div yield of index} = \frac{\sum (\text{shares} \times \text{investibility} \times \text{annual div})}{\sum (\text{shares} \times \text{investibility} \times \text{price})} \times 100$

8.1.3 Record Type DFV Sub Type 02 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Daily performance – Capital	40	12 (T)	51
Daily performance – TRI	52	12 (T)	63
Percentage weighting ALL-SHARE	64	12 (T)	75
Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{yesterday's index}} - 1 \right) \times 100$$

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{today's TRI}}{\text{yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING ALL-SHARE Percentage weighting within All-Share Index.

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Sector indices with no constituents will not appear in the file.

8.2 CONSTITUENTS DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

8.2.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS

YTD TRI PERFORMANCE (ZAR)	Year-to-date Total Return Index performance (ZAR)

8.4 TRACKER DATA FILES

This file contains changes / amendments i.e. it provides indices' related amendments at both index and index constituent levels. It consists of three sections:

- Tracker 1 (Index level data),
- Tracker 2 (stock level data - weightings amendments)
- Tracker 3 (stock level data - ex-dividends on the following trading day)

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

8.4.1 TRACKER 1 – INDEX LEVEL DATA

These are the changes effective on the following trading day.

8.4.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Board	28	4 (T)	31
Market	32	4 (T)	35
Exchange	36	4 (T)	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g.: DFT.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 01.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
BOARD	The board the Index is linked to.
MARKET	The market the Index is linked to.
EXCHANGE	The exchange the Index is linked to.
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

8.4.1.2 Record Type DFT Sub Type 03 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents (previous market cap)	46	15	60
Number of constituents (new market cap)	61	15	75
Previous market cap	76	16 (10.6)	91
New market cap	92	16 (10.6)	107
Previous divisor	108	16 (10.6)	123
New divisor	124	16 (10.6)	139

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS (PREVIOUS MARKET CAPITALISATION)	Number of constituents included in the index calculation (including secondary lines), as at market close.
NUMBER OF CONSTITUENTS (NEW MARKET CAPITALISATION)	Adjusted number of constituents included in the index calculation (including secondary lines), after effected changes.
PREVIOUS MARKET CAPITALISATION	Market capitalisation in Rand millions, at market close.
NEW MARKET CAPITALISATION	Adjusted market capitalisation in Rand millions, at after effected changes.
PREVIOUS DIVISOR	Index divisor as at market close.
NEW DIVISOR	Adjusted index divisor after effected changes.

Date Last Modified	149	10 (T)	158
Effective Date	159	10 (T)	168

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE OUTSTANDING	Shares in issue figure at index close.
NEW SHARES IN ISSUE OUTSTANDING	New shares in issue figure.
CLOSING INVESTIBILITY WEIGHTING USED IN INDEX CALCULATION	Percentage of shares in issue included in index calculation (determined by the product of 1 year forward DY and free float).
NEW INVESTIBILITY WEIGHTING USED IN INDEX CALCULATION	Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.
FTSE AMENDMENT CODE	FTSE code for weighting and housekeeping amendments. (See Annexure A)
FTSE AMENDMENT CODE DESCRIPTION	Details, where available, on FTSE amendment code. (See Annexure A)
DATE LAST MODIFIED	The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY
EFFECTIVE DATE	The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of three (3), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 03, the details of the second corporate action for the same instrument will appear between continuation numbers 04 and 06.

9 FTSE / JSE AFRICA INDEX SERIES – CAPPED INDICES

Only the Capped All Share and the Capped Top40 Indices will be provided in the data files below.

9.1 VALUATIONS DATA FILES

This file contains the index closing positions for the current trading day.

9.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Board	28	4 (T)	31
Market	32	4 (T)	35
Exchange	36	4 (T)	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g.: DCV.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 01.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
BOARD	The board the Index is linked to.
MARKET	The market the Index is linked to.
EXCHANGE	The exchange the Index is linked to.
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

9.1.2 Record Type DCV Sub Type 02 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents	46	15	60
Capital index (ZAR)	61	18 (10.8)	78
Total return index (ZAR)	79	18 (10.8)	96
XD adjustment (today)	97	13 (7.6)	109
XD adjustment (YTD)	110	13 (7.6)	122
Market capitalisation (ZAR)	123	16 (10.6)	138
Actual dividend yield	139	7 (3.4)	145

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS	Number of lines of stock included in index calculation (including secondary lines), as at today's market close.
CAPITAL INDEX (ZAR)	Today's capital index value.
TOTAL RETURN INDEX (ZAR)	Today's total return index value. See Appendix A for definition and calculation method.
XD ADJUSTMENT (TODAY)	Today's ex dividend adjustment in Rands.
XD ADJUSTMENT (YTD)	Ex-dividend adjustment year to date (from 1 Jan to 31 Dec.).
MARKET CAPITALISATION (ZAR)	Market capitalisation in Rands millions at today's close (net, after free float and adjustment for capping)
ACTUAL DIVIDEND YIELD	Actual dividend yield. $\frac{\text{Annual div (in currency of price)}}{\text{Price}} = \text{Stock div}$ $\text{Div yield of index} = \frac{\sum (\text{shares x investibility x annual div})}{\sum (\text{shares x investibility x price})} \times 100$

9.1.3 Record Type DCV Sub Type 02 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Daily performance – Capital	40	12 (T)	51
Daily performance – TRI	52	12 (T)	63
Percentage weighting in this index	64	12 (T)	75
Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{yesterday's index}} - 1 \right) \times 100$$

Right hand bracket too small

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{today's TRI}}{\text{yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING IN THIS INDEX Percentage weighting within this Index.

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Sector indices with no constituents will not appear in the file

9.2 CONSTITUENTS DATA FILES

9.2.1 Leading Record Layout

This file contains the index constituents as at the end of the current day.

Please note that the sequences will be created in multiples of 4 for every CAPPED Index in this family. At the time of production of this manual only two Capped indices are being calculated i.e. the Capped All Share Index and the Capped Top40 Index.

The sequences will work as follows:

Sequences 01 - 04, will carry data for all indices in this family, and the constituents within each index can be identified by looking at the fields within the leading record. The index code in the leading record needs to be used in conjunction with the Record Type's sequence number in order to distinguish which index a constituent record is referring.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12

ISO CODE	ISO currency code for constituent (ZAR)
FILLER	Spaces or Blanks.
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.
PRICE (RAND)	Closing price in Rands.
NUMBER OF SHARES IN ISSUE	Actual number of shares in issue (1% rule applied).

9.4.4 Record Type DCO Sub Type 11 Sequence No. 03

FIELD NAME	START POS	LENGTH	END POS
Market capitalisation (gross)	40	16 (10.6)	55
Investibility weighting factor	56	16 (T)	71
Adjusted market cap (net)	72	16 (10.6)	87
Percentage weighting within this index	88	15 (T)	102
Percentage weighting within industry	103	16 (T)	118
Percentage weighting within ICB sector	119	16 (T)	134

FIELD DESCRIPTIONS:

MARKET CAPITALISATION (GROSS)	Market Capitalisation in Rands millions at index close (gross i.e. not adjusted for investibility weighting factor).
INVESTIBILITY WEIGHTING FACTOR	Percentage of shares in issue included in index calculation (determined by one – year forecast dividend yield).
ADJUSTED MARKET CAPITALISATION (NET)	Adjusted market capitalisation in Rands millions at index close (net i.e. investibility weighting factor multiplied by market capitalisation used in index calculation).
PERCENTAGE WEIGHTING WITHIN THIS INDEX	Percentage weighting within this Index.
PERCENTAGE WEIGHTING WITHIN INDUSTRY	Percentage weighting within FTSE/JSE All-Share ICB industry universe as defined in the Ground Rules.
PERCENTAGE WEIGHTING WITHIN ICB SECTOR	Percentage weighting within FTSE/JSE All-Share ICB Sector universe as defined in the Ground Rules.

9.4.5 Record Type DCO Sub Type 11 Sequence No. 04

FIELD NAME	START POS	LENGTH	END POS
Dividend yield Percentage	40	15 (T)	54

FIELD DESCRIPTIONS:

DIVIDEND YIELD PERCENTAGE

Percentage dividend yield per stock.

$$\left(\frac{\text{Annual div}}{\text{price}} \times 100 \right)$$

9.5 FIVE-DAY TRACKER DATA

This record type publishes known upcoming stock-level amendments over the next 5 business days which impact the constituent's weighting in the index.

N.B This record type will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

Percentage weighting within all share index	88	15 (T)	102
Percentage weighting within Industry	103	16 (T)	118
Percentage weighting within sector	119	16 (T)	134

FIELD DESCRIPTIONS:

MARKET CAPITALISATION (GROSS)	Market Capitalisation in Rands millions at index close (gross i.e. not adjusted for investibility weighting factor).
INVESTIBILITY WEIGHTING FACTOR	Percentage of shares in issue included in index calculation (determined either by free float rule).
ADJUSTED MARKET CAPITALISATION (NET)	Adjusted market capitalisation in Rands millions at index close (net i.e. including investibility weighting factor or market capitalisation used in index calculation).
PERCENTAGE WEIGHTING WITHIN ALL SHARE INDEX	Percentage weighting within FTSE/JSE All-Share Index.
PERCENTAGE WEIGHTING WITHIN INDUSTRY	Percentage weighting within FTSE/JSE All-Share ICB Industry.
PERCENTAGE WEIGHTING WITHIN SECTOR UNIVERSE	Percentage weighting within FTSE/JSE All-Share ICB Sector.

11.2.5 Record Type DYC Sub Type 01 Sequence No. 04

FIELD NAME	START POS	LENGTH	END POS
Dividend yield Percentage	40	15 (T)	54
Three year historic sales growth	55	18 (9.9)	72
Three year historic EPS growth	73	18 (9.9)	90
Two year forward sales estimates	91	18 (9.9)	108
Two year forward EPS estimates	109	18 (9.9)	126
Growth Rate	127	18 (9.9)	144

FIELD DESCRIPTIONS:

Dividend Yield Percentage

Percentage dividend yield per stock

$$= \left(\frac{\text{Annual div}}{\text{price}} \times 100 \right)$$

Three year historic sales growth

3 Year Historic Sales Growth reflects the average of the company's three most recent consecutive absolute net sales or revenue annual growth values. The most recently reported sales value should be less than 18 months old (in developed markets). Sales values are for the 12 months to the company's fiscal year end and are generally as reported by the company. However, sales are generally adjusted to exclude excise taxes, sales from non-operating activities and discontinued operations in addition to sales generated by associated companies. If the company has changed its year end and a 12 month figure is not reported, the reported value is annualised. A sales value is also calculated for banks, insurance & financial companies and includes interest, investment & premium income in addition to commission & fees as appropriate.

Three year historic EPS growth

3 Year Historic EPS Growth is the average of the company's three most recent consecutive absolute EPS annual growth values. The most recent EPS value should be less than 18 months old (in developed markets). Annual earnings per share (EPS) is for the 12 months to fiscal year end. EPS is calculated as net income after taxes, minority interest and preferred dividends, but before amortization of intangibles and after-tax extraordinary items, divided by adjusted shares.

Two year forward sales estimates

This field will not be populated and will be filled with zeros.

estimates generally reflect sales derived from the company's core-operating activities. Generally transportation & non-operating costs are excluded from gross revenues for industrial corporations. Bank revenues include interest and non-interest income. Insurance revenues are comprised of net technical income and net financial income.

Two year forward EPS estimates

EPS estimates are generally based on net income from continuing operations divided by weighted average shares outstanding for the year.

Growth Rate

Return on Equity is Earnings per Share (EPS) for the most recent fiscal year divided by the previous year's book value per share. Payout ratio is Dividend per Share (DPS) divided by EPS. Values are again for the 12 months to the most recent fiscal year end. (More detailed EPS, Book Value and dividend per share definitions can be found under the "3 Year historic EPS growth", "Book to Price", "Dividend Yield" headings respectively)

11.2.6 Record Type DYC Sub Type 01 Sequence No. 05

FIELD NAME	START POS	LENGTH	END POS
Book to Price	40	18 (9.9)	57
Sales to Price	58	18 (9.9)	75
Cash flow to Price	76	18 (9.9)	93
Value Weight	94	18 (T)	111
Growth Weight	112	18 (T)	129

FIELD DESCRIPTIONS:

BOOK TO PRICE

Book to Price is a company's common/ordinary equity capital at the most recent fiscal year end divided by the company's market capitalisation at the review date. Common/ordinary equity is generally as reported, but is adjusted to exclude minority interest, preferred stock and selected items as appropriate.

SALES TO PRICE

Sales to Price is a company's most recent annual sales value divided by the company's market capitalisation at the review date. (A more detailed definition of sales is provided under the "3 Year historic sales growth" heading)

CASH FLOW TO PRICE

Cash Flow to Price is generally a company's most recent Cash Flow for the year divided by the market capitalisation of the company at the review date. If Cash Flow is not reported it is estimated based on net income plus depreciation and other non-cash items.

VALUE WEIGHT

The percentage weight rate in the Value Index

GROWTH WEIGHT

The percentage weight rate in the Growth Index

11.2.7 Record Type DYC Sub Type 01 Sequence No. 06

11.3 TRACKER DATA FILES

This file contains changes / amendments i.e. it provides indices' related amendments at both index and index constituent levels. It consists of three sections:

- Tracker 1 (Index level data).
- Tracker 2 (stock level data - weightings amendments)
- Tracker 3 (stock level data - ex-dividends on the following trading day)

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

11.3.1 TRACKER 1 – INDEX LEVEL DATA

These are the changes effective on the following trading day.

11.3.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15

Capital index (ZAR)	61	18 (10.8)	78
Total return index (ZAR)	79	18 (10.8)	96
XD adjustment (today)	97	13 (7.6)	109
XD adjustment (YTD)	110	13 (7.6)	122
Market capitalisation (ZAR)	123	16 (10.6)	138
Actual dividend yield	139	7 (3.4)	145

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS	Number of lines of stock included in index calculation (including secondary lines), as at today's market close.
CAPITAL INDEX (ZAR)	Today's capital index value.
TOTAL RETURN INDEX (ZAR)	Today's total return index value. See Appendix A for definition and calculation method.
XD ADJUSTMENT (TODAY)	Today's ex dividend adjustment in Rands.
XD ADJUSTMENT (YTD)	Ex-dividend adjustment year to date (from 1 Jan to 31 Dec.).
MARKET CAPITALISATION (ZAR)	Market capitalisation in Rands millions at today's close (net, after free float and adjustment by one year-forecast dividend yield)
ACTUAL DIVIDEND YIELD	Actual dividend yield. $\frac{\text{Annual div (in currency of price)}}{\text{Price}} = \text{Stock div}$ $\text{Div yield of index} = \frac{\sum (\text{shares x investibility x annual div})}{\sum (\text{shares x investibility x price})} \times 100$

12.1.3 Record Type DDV Sub Type 02 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Daily performance – Capital	40	12 (T)	51
Daily performance – TRI	52	12 (T)	63
Percentage weighting in this index	64	12 (T)	75
Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{yesterday's index}} - 1 \right) \times 100$$

Right hand bracket too small

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{today's TRI}}{\text{yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING IN THIS INDEX Percentage weighting within this Index.

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Sector indices with no constituents will not appear in the file

12.2 CONSTITUENTS DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

12.2.1 Leading Record Layout

This file contains the index constituents as at the end of the current day.

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15

Filler	121	4 (T)	124
Secondary line	125	1 (T)	125
Price (Rand)	126	16 (10.6)	141
Number of shares in issue	142	15	156

FIELD DESCRIPTIONS:

INDEX MARKER	Indices of which company is a constituent (i.e. J200 = FTSE / JSE Top 40)
COUNTRY CODE	Country code for constituent (ZA)
EXCHANGE CODE	Primary exchange code for constituent (e.g. J)
ISO CODE	ISO currency code for constituent (ZAR)
FILLER	Spaces or Blanks.
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.
PRICE (RAND)	Closing price in Rands.
NUMBER OF SHARES IN ISSUE	Actual number of shares in issue (1% rule applied).

12.2.4 Record Type DDC Sub Type 01 Sequence No. 03

FIELD NAME	START POS	LENGTH	END POS
Market Capitalisation (Gross)	40	16 (10.6)	55
Investibility Weighting Factor	56	16 (T)	71
Market Capitalisation (After Weighting Factor)	72	16 (10.6)	87
Percentage weighting within this index	88	15 (T)	102

FIELD DESCRIPTIONS:

MARKET CAPITALISATION (GROSS)	Market Capitalisation in Rands millions at index close (gross i.e. not adjusted for investibility weighting factor).
INVESTIBILITY WEIGHTING FACTOR	Percentage of shares in issue included in index calculation (determined by one – year forecast dividend yield).
MARKET CAPITALISATION (AFTER WEIGHTING FACTOR)	Adjusted market capitalisation in Rands millions at index close (i.e. market capitalisation used in index calculation).
PERCENTAGE WEIGHTING WITHIN THIS INDEX	Percentage weighting within this Index.

12.2.5 Record Type DDC Sub Type 01 Sequence No. 04

FIELD NAME	START POS	LENGTH	END POS
Dividend yield Percentage	40	15 (T)	54
Weighting Factor	55	16 (6,10)	70

FIELD DESCRIPTIONS:

DIVIDEND YIELD Percentage

Percentage dividend yield per stock.

$$\left(\frac{\text{Annual div}}{\text{price}} \times 100 \right)$$

WEIGHTING FACTOR

Constituent market capitalisation adjustment factor.

12.3 TRACKER DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

12.3.1 TRACKER 1 DATA FILES (INDEX LEVEL DATA)

This file contains changes / amendments i.e. it provides indices' related amendments at both index and index constituent levels. It consists of three sections:

These are the changes effective on the following trading day.

12.3.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Board	28	4	31
Market	32	4	35
Exchange	36	4	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g.: DDT.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 01.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
BOARD	The board the Index is linked to.
MARKET	The market the Index is linked to.
EXCHANGE	The exchange the Index is linked to.
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

12.3.1.2 Record Type DDT Sub Type 03 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents (previous market cap)	46	15	60
Number of constituents (new market cap)	61	15	75
Previous market cap	76	16 (10.6)	91
New market cap	92	16 (10.6)	107
Previous divisor	108	16 (10.6)	123
New divisor	124	16 (10.6)	139

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS (PREVIOUS MARKET CAPITALISATION)	Number of constituents included in the index calculation (including secondary lines), as at market close.
NUMBER OF CONSTITUENTS (NEW MARKET CAPITALISATION)	Adjusted number of constituents included in the index calculation (including secondary lines), after effected changes.
PREVIOUS MARKET CAPITALISATION	Market capitalisation in Rand millions, at market close, after the 1 year forward DY adjustment.
NEW MARKET CAPITALISATION	Adjusted market capitalisation in Rand millions, at market open after effected changes and 1 year forward DY adjustment.
PREVIOUS DIVISOR	Index divisor as at market close.
NEW DIVISOR	Adjusted index divisor after effected changes.

12.3.1.3 Record Type DDT Sub Type 03 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
XD adjustment value	40	13 (10.3)	52

FIELD DESCRIPTIONS:

XD ADJUSTMENT VALUE

Todays ex dividend adjustment in Rands.

12.3.2 TRACKER 2 DATA FILES - STOCK LEVEL DATA - WEIGHTING AMENDMENTS

12.3.2.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6

Country code	119	2 (T)	120
Exchange code	121	2 (T)	122
ISO code	123	5 (T)	127

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
CONSTITUENT NAME	Name of constituent (tradable instrument as provided by FTSE).
FILLER	Spaces or Blanks.
ISIN NUMBER	International Securities Identification Number
COUNTRY CODE	Country code for constituent (value) (ZA).
EXCHANGE CODE	Primary exchange code for constituent (e.g. J)
ISO CODE	ISO currency code for constituent (ZAR).

Note: This sequence will be created in multiples of three (3), to reflect multiple corporate actions.

12.3.2.3 Record Type DDT Sub Type 04 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Index Marker	40	6 (T) x 12	111
Filler	112	4 (T)	115
Filler	116	4 (T)	119
Closing price	120	16 (10.6)	135
Price adjustment factor	136	16 (10.6)	151
Adjusted price	152	16 (10.6)	167

INDEX MARKER String of max 12 index codes to which this constituent/tradable instrument belongs.

FILLER Spaces or Blanks.

FILLER Spaces or Blanks.

CLOSING PRICE Closing price at market close - in Rand.

PRICE ADJUSTMENT FACTOR Price adjustment factor e.g. in the case of a corporate action related to a split or consolidation.

ADJUSTED PRICE Share price in currency indicated, after price adjustment factor.

Note: This sequence will be created in multiples of three (3), to reflect multiple corporate actions.

12.3.2.4 Record Type DDT Sub Type 04 Sequence No. 03

FIELD NAME	START POS	LENGTH	END POS
Closing shares in issue outstanding	40	15	54
New shares in issue outstanding	55	15	69
Closing investibility weighting used in index calculation	70	16 (T)	85
New investibility weighting used in index calculation	86	16 (T)	101
Previous Weighting Factor	102	16 (6.10)	117
New Weighting Factor	118	16 (6.10)	133
Secondary line	134	1 (T)	134
FTSE amendment code	135	6 (T)	140
FTSE amendment code notes	141	40(T)	180

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

PREVIOUS WEIGHTING FACTOR

Previous Constituent Market Capitalisation adjustment factor

NEW WEIGHTING FACTOR

New Constituent Market Capitalisation adjustment factor

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

Note: This sequence will be created in multiples of three (3), to reflect multiple corporate actions.

12.3.2.5 Record Type DDT Sub Type 04 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Weighting Factor	40	16 (T)	55
New Weighting Factor	56	16 (T)	71

FIELD DESCRIPTIONS:

PREVIOUS WEIGHTING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW WEIGHTING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

12.3.2.6 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Board	28	4 (T)	31
Market	32	4 (T)	35
Exchange	36	4 (T)	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g.: DDT.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 01.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
BOARD	The board the Index is linked to.
MARKET	The market the Index is linked to.
EXCHANGE	The exchange the Index is linked to.
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

12.3.2.7 Record Type DDT Sub Type 05/07 Sequence No. 01 - 99

FIELD NAME	START POS	LENGTH	END POS
Constituent code	40	10 (T)	49
Constituent name	50	50 (T)	99
Filler	100	6 (T)	105
ISIN number	106	13 (T)	118
Country code	119	2 (T)	120
Exchange code	121	2 (T)	122
Current closing shares in issue	123	15	137
Current investibility weighting used in index calculation	138	7 (T)	144
Secondary line	145	1 (T)	145

FIELD DESCRIPTIONS:

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
CONSTITUENT NAME	Name of constituent (tradable instrument as provided by FTSE).
FILLER	Spaces or Blanks.
ISIN NUMBER	International Securities Identification Number
COUNTRY CODE	Country code for constituent (ZA).
EXCHANGE CODE	Primary exchange code for constituent. (e.g. J).
CURRENT CLOSING SHARES IN ISSUE	Shares in issue figure at index close.
CURRENT INVESTIBILITY WEIGHTING USED IN INDEX CALCULATION	Percentage of shares in issue included in index calculation (determined either by free float rule)
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

NOTE: DHT sub type 05 sequence 01 - 99 caters for changes to the constituents per index. Once these 99 record shares are used up, DDT sub type 07 sequence 01 - 99 provides for an additional 99 records to be populated should this be required.

12.3.2.8 Record Type DDT Sub Type 06/08 Sequence No. 01 - 99

New shares in issue outstanding	55	15	69
Closing investibility weighting used in index calculation	70	16 (T)	85
New investibility weighting used in index calculation	86	16 (T)	101
Secondary line	102	1 (T)	102
FTSE amendment code	103	6 (T)	108
FTSE amendment code notes	109	40 (T)	148
Date Last Modified	149	10 (T)	158
Effective Date	159	10 (T)	168

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

12.5.1.5 Record Type DDF Sub Type 14 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Weighting Factor	40	16 (T)	55
New Weighting Factor	56	16 (T)	71

FIELD DESCRIPTIONS:

PREVIOUS WEIGHTING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW WEIGHTING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

13 FTSE / JSE AFRICA INDEX SERIES – PREFERENCE SHARE INDEX

13.1 VALUATIONS DATA FILES

This file contains the index closing positions for the current trading day.

13.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Filler	28	12	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g. DRV
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 02.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

13.1.2 Record Type DRV Sub Type 02 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents	46	15	60
Capital index (ZAR)	61	18 (10.8)	78
Total return index (ZAR)	79	18 (10.8)	96
XD adjustment (today)	97	13 (7.6)	109
XD adjustment (YTD)	110	13 (7.6)	122
Market capitalisation (ZAR)	123	16 (10.6)	138
Actual dividend yield	139	7 (3.4)	145

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS	Number of lines of stock included in index calculation (including secondary lines), as at today's market close.
CAPITAL INDEX (ZAR)	Today's capital index value.
TOTAL RETURN INDEX (ZAR)	Today's total return index value. See Appendix A for definition and calculation method.
XD ADJUSTMENT (TODAY)	Today's ex dividend adjustment in Rands.
XD ADJUSTMENT (YTD)	Ex-dividend adjustment year to date (from 1 Jan to 31 Dec.).
MARKET CAPITALISATION (ZAR)	Market capitalisation in Rands millions at today's close (net, after free float and adjustment by one year-forecast dividend yield)
ACTUAL DIVIDEND YIELD	Actual dividend yield.

$$\frac{\text{Annual div (in currency of price)}}{\text{Price}} = \text{Stock div}$$

$$\text{Div yield of index} = \frac{\sum (\text{shares} \times \text{investibility} \times \text{annual div})}{\sum (\text{shares} \times \text{investibility} \times \text{price})} \times 100$$

13.1.3 Record Type DRV Sub Type 02 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Daily performance – Capital	40	12 (T)	51
Daily performance – TRI	52	12 (T)	63
Percentage weighting in this index	64	12 (T)	75
Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION)	Percentage change from previous day's capital index close. $= \left(\frac{\text{Today's index}}{\text{Yesterday's index}} - 1 \right) \times 100$
DAILY PERFORMANCE (TRI)	Percentage changes from previous day's TR index close. $= \left(\frac{\text{Today's TRI}}{\text{Yesterday's TRI}} - 1 \right) \times 100$
PERCENTAGE WEIGHTING IN THIS INDEX	Percentage weighting within Index
EARNINGS YIELD	The earnings per share for the past 12 months divided by the closing price
EARNINGS YIELD SIGN	The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Indices with no constituents will not appear in the file.

13.2 CONSTITUENTS DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

13.2.1 Leading Record Layout

This file contains the index constituents as at the end of the current day.

13.3 TRACKER DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

13.3.1 TRACKER 1 DATA FILES (INDEX LEVEL DATA)

This file contains changes / amendments i.e. it provides indices' related amendments at both index and index constituent levels. It consists of three sections:

These are the changes effective on the following trading day.

13.3.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Filler	28	12	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated -e.g. DRT.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 03.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

13.3.1.2 Record Type DRT Sub Type 03 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents (previous market cap)	46	15	60
Number of constituents (new market cap)	61	15	75
Previous market cap	76	16 (10.6)	91
New market cap	92	16 (10.6)	107
Previous divisor	108	16 (10.6)	123
New divisor	124	16 (10.6)	139

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS (PREVIOUS MARKET CAPITALISATION)	Number of constituents included in the index calculation (including secondary lines), as at market close.
NUMBER OF CONSTITUENTS (NEW MARKET CAPITALISATION)	Adjusted number of constituents included in the index calculation (including secondary lines), after effected changes.
PREVIOUS MARKET CAPITALISATION	Market capitalisation in Rand millions, at market close, after the 1 year forward DY adjustment.
NEW MARKET CAPITALISATION	Adjusted market capitalisation in Rand millions, at market open after effected changes and 1 year forward DY adjustment.
PREVIOUS DIVISOR	Index divisor as at market close.
NEW DIVISOR	Adjusted index divisor after effected changes.

13.3.1.3 Record Type DRT Sub Type 03 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
XD adjustment value	40	13 (10.3)	52

FIELD DESCRIPTIONS:

XD ADJUSTMENT VALUE

Today's ex dividend adjustment in Rands.

13.3.2 TRACKER 2 DATA FILES - STOCK LEVEL DATA - WEIGHTING AMENDMENTS

13.3.2.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS

FTSE amendment code notes	109	40 (T)	148
Date Last Modified	149	10 (T)	158
Effective Date	159	10 (T)	168

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1 year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of three (3), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 03, the details of the second corporate action for the same instrument will appear between continuation numbers 04 and 06.

14 FTSE / JSE AFRICA INDEX SERIES – SHARIAH INDEX

14.1 VALUATIONS DATA FILES

This file contains the index closing positions for the current trading day.

14.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12

Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g. DHV
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 02.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

14.1.2 Record Type DHV Sub Type 02 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents	46	15	60
Capital index (ZAR)	61	18 (10.8)	78
Total return index (ZAR)	79	18 (10.8)	96
XD adjustment (today)	97	13 (7.6)	109
XD adjustment (YTD)	110	13 (7.6)	122
Market capitalisation (ZAR)	123	16 (10.6)	138
Actual dividend yield	139	7 (3.4)	145

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS	Number of lines of stock included in index calculation (including secondary lines), as at today's market close.
CAPITAL INDEX (ZAR)	Today's capital index value.
TOTAL RETURN INDEX (ZAR)	Today's total return index value. See Appendix A for definition and calculation method.
XD ADJUSTMENT (TODAY)	Today's ex dividend adjustment in Rands.
XD ADJUSTMENT (YTD)	Ex-dividend adjustment year to date (from 1 Jan to 31 Dec.).
MARKET CAPITALISATION (ZAR)	Market capitalisation in Rands millions at today's close (net, after free float and adjustment by one year-forecast dividend yield)
ACTUAL DIVIDEND YIELD	Actual dividend yield.

$$\frac{\text{Annual div (in currency of price)}}{\text{Price}} = \text{Stock div}$$

$$\text{Div yield of index} = \frac{\sum (\text{shares} \times \text{investibility} \times \text{annual div})}{\sum (\text{shares} \times \text{investibility} \times \text{price})} \times 100$$

Percentage dividend yield per stock.

$$\left(\frac{\text{Annual div}}{\text{price}} \times 100 \right)$$

14.3 TRACKER DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

14.3.1 TRACKER 1 DATA FILES (INDEX LEVEL DATA)

This file contains changes / amendments i.e. it provides indices' related amendments at both index and index constituent levels. It consists of three sections:

These are the changes effective on the following trading day.

14.3.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Filler	28	12	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated -e.g. DHT.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 03.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

14.3.1.2 Record Type DHT Sub Type 03 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents (previous market cap)	46	15	60
Number of constituents (new market cap)	60	15	75
Previous market cap	76	16 (10.6)	91
New market cap	92	16 (10.6)	107
Previous divisor	108	16 (10.6)	123
New divisor	124	16 (10.6)	139

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS (PREVIOUS MARKET CAPITALISATION)	Number of constituents included in the index calculation (including secondary lines), as at market close.
NUMBER OF CONSTITUENTS (NEW MARKET CAPITALISATION)	Adjusted number of constituents included in the index calculation (including secondary lines), after effected changes.
PREVIOUS MARKET CAPITALISATION	Market capitalisation in Rand millions, at market close, after the 1 year forward DY adjustment.
NEW MARKET CAPITALISATION	Adjusted market capitalisation in Rand millions, at market open after effected changes and 1 year forward DY adjustment.
PREVIOUS DIVISOR	Index divisor as at market close.
NEW DIVISOR	Adjusted index divisor after effected changes.

14.3.1.3 Record Type DHT Sub Type 03 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
XD adjustment value	40	13 (10.3)	52

FIELD DESCRIPTIONS:

XD ADJUSTMENT VALUE

Today's ex dividend adjustment in Rands.

14.3.2 TRACKER 2 DATA FILES - STOCK LEVEL DATA - WEIGHTING AMENDMENTS

14.3.2.1 Leading Record Layout

Number of shares in issue	142	15	156

FIELD DESCRIPTIONS:

INDEX MARKER	Indices of which company is a constituent (i.e. J251 = FTSE / JSE Preference Share Index)
COUNTRY CODE	Country code for constituent (ZA)
EXCHANGE CODE	Primary exchange code for constituent (e.g. J)
ISO CODE	ISO currency code for constituent (ZAR)
FILLER	Spaces or Blanks.
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.
PRICE (RAND)	Closing price in Rands.
NUMBER OF SHARES IN ISSUE	Actual number of shares in issue (1% rule applied).

14.4.4 Record Type DHO Sub Type 11 Sequence No. 03

FIELD NAME	START POS	LENGTH	END POS
Market capitalisation (gross)	40	16 (10.6)	55
Investibility weighting factor	56	16 (T)	71
Adjusted market cap (net)	72	16 (10.6)	87
Percentage weighting within this index	88	15 (T)	102
Percentage weighting within industry	103	16 (T)	118
Percentage weighting within ICB sector	119	16 (T)	134
Percentage weighting within Sharia Top 40	135	15 (T)	149

FIELD DESCRIPTIONS:

MARKET CAPITALISATION (GROSS)	Market Capitalisation in Rands millions at index close (gross i.e. not adjusted for investibility weighting factor).
INVESTIBILITY WEIGHTING FACTOR	Percentage of shares in issue included in index calculation (determined by one – year forecast dividend yield).
ADJUSTED MARKET CAPITALISATION (NET)	Adjusted market capitalisation in Rands millions at index close (net i.e. investibility weighting factor multiplied by market capitalisation used in index calculation).
PERCENTAGE WEIGHTING WITHIN THIS INDEX	Percentage weighting within this Index.
PERCENTAGE WEIGHTING WITHIN INDUSTRY	Percentage weighting within FTSE/JSE All-Share ICB industry universe as defined in the Ground Rules.
PERCENTAGE WEIGHTING WITHIN ICB SECTOR	Percentage weighting within FTSE/JSE All-Share ICB Sector universe as defined in the Ground Rules.
PERCENTAGE WEIGHTING WITHIN SHARIA TOP 40 INDEX	Percentage weighting within this Index.

Effective Date	159	10 (T)	168

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1 year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of three (3), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 03, the details of the second corporate action for the same instrument will appear between continuation numbers 04 and 06.

XD adjustment value	82	16 (10.6)	97
FTSE dividend code	98	10 (T)	107
FTSE dividend notes	108	40 (T)	147

FIELD DESCRIPTIONS:

EX-DIVIDEND-DATE	Date the security is XD.
DIVIDEND-AMOUNT	Dividend amount in currency indicated.
ISO-CURRENCY	Currency code for dividend payment.
INDEX-CODE	Index code to which the constituent belongs.
XD-ADJUSTMENT-VALUE	Value for adjustment factor.
FTSE-DIVIDEND-CODE	FTSE codes for the types of dividend payments. (See Annexure A)
FTSE-DIVIDEND-CODE-DESCRIPTION	Details, where available, on FTSE dividend payment. (See Annexure A)

NOTE: DIT sub type 06 sequence 01–99 caters for changes to the constituents per index. Once these 99 record shares are used up, DIT sub type 08 sequence 01–99 provides for an additional 99 records to be populated should this be required.

15.4 OPENING CONSTITUENTS DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

15.4.1 Leading Record Layout

This file contains the index constituents as at the start of the following JSE business day.

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Filler	28	12	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code
RECORD TYPE	The code indicating the type of information contained in the record disseminated – e.g.: DIO.
SUB TYPE	The Sub Type related to a particular record type – e.g. Sub Type 11.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE – The date of the dissemination run, in the format CCYYMMDD.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

15.4.2 ~~Record Type DIO Sub Type 11 Sequence No. 01~~

FIELD NAME	START POS	LENGTH	END POS
Constituent code	40	10 (T)	49
ISIN number	50	13 (T)	62
Filler	63	6 (T)	68
Constituent name	69	50 (T)	118

FIELD DESCRIPTIONS:

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
ISIN NUMBER	International Securities Identification Number
FILLER	Spaces or Blanks.
CONSTITUENT NAME	Name of constituent. (Tradable instrument as provided by FTSE).

15.4.3 ~~Record Type DIO Sub Type 11 Sequence No. 02~~

FIELD NAME	START POS	LENGTH	END POS
Index marker	—40	—6 x 12(T)	—111
Country code	—112	—2 (T)	—113
Exchange code	—114	—2 (T)	—115
ISO code	—116	—5 (T)	—120
Filler	—121	—4 (T)	124
Secondary line	125	—1 (T)	125
Price (Rand)	126	16 (10.6)	141
Number of shares in issue	142	15	—156

FIELD DESCRIPTIONS:

INDEX MARKER	Indices of which company is a constituent (i.e. J263 = RAFI All Share)
COUNTRY CODE	Country code for constituent (ZA)
EXCHANGE CODE	Primary exchange code for constituent (e.g. J)
ISO CODE	ISO currency code for constituent (ZAR)
FILLER	Spaces or Blanks.
SECONDARY LINE	Indicates that two lines of stocks are used for this company—Y/N indicator e.g. ordinary and N shares.
PRICE (RAND)	Closing price in Rands.
NUMBER OF SHARES IN ISSUE	Actual number of shares in issue (1% rule applied).

15.4.4 ~~Record Type DIO Sub Type 11 Sequence No. 03~~

Date Last Modified	139	10 (T)	148
Effective Date	149	10 (T)	158

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

18.5.1.516.5.1.5 Record Type D1F Sub Type 14 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Capping Factor	42	16 (T)	57
New Capping Factor	58	16 (T)	73

FIELD DESCRIPTIONS:

PREVIOUS CAPPING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW CAPPING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

Run date	20	8	27
ISIN	28	14	41
Data (layouts below)	42	109	Varies

FIELD DESCRIPTIONS:**INDEX CODE**

Each index is identified by a unique code.

EQUITY IDENTIFIER

This field contains a generated identifier used to differentiate between instruments on multiple lines; it is partly based on Constituent Code and is not maintained by JSE. It is intended only for record processing and is not supported outside of this purpose. International equities should still be uniquely identified by FTSE Constituent Code.

RECORD TYPE

The code indicating the type of information contained in the record disseminated - e.g.: D2F.

SUB TYPE

The Sub Type related to a particular record type - e.g. Sub Type 14.

CONTINUATION SEQUENCE

The sequence number used to join together certain record types, where more than one record exists per record type.

RUN DATE

DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.

ISIN

The ISIN (International Securities Identification Number) uniquely identifies all Active and Suspended securities internationally.

DATA (LAYOUTS BELOW)

The relevant record type(s) requested by the user will be given.
The end positions vary by sequence number.

19.5.1.217.5.1.2 Record Type D2F Sub Type 14 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Constituent code	42	10 (T)	51
Constituent name	52	50 (T)	101
Filler	102	10 (T)	111
ISIN number	112	13 (T)	124
Country code	125	2 (T)	126
Exchange code	127	4 (T)	130
ISO code	131	3 (T)	133

FIELD DESCRIPTIONS:

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
CONSTITUENT NAME	Name of constituent (tradable instrument as provided by FTSE).
FILLER	Spaces or Blanks.
ISIN NUMBER	International Securities Identification Number
COUNTRY CODE	Country code for constituent according to ISO 3166-1 (ALPHA 2). Example: Italy = IT and Switzerland = CH. Refer to appendix in section 37.239.2 to review the rules for this field.
EXCHANGE CODE	Primary exchange code for constituent as defined by FTSE (e.g. AAS = Australian Securities Exchange and NCT = Toronto Stock Exchange)
ISO CODE	ISO currency code for constituent in accordance with the ISO 4217 standard. Exceptions are where values are specified in British Pennies (£1 ÷ 100), the non-standard code GBX is used to differentiate from GBP.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

FTSE amendment code notes	99	40 (T)	138
Date Last Modified	139	10 (T)	148
Effective Date	149	10 (T)	158

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

19.5.1.517.5.1.5 Record Type D2F Sub Type 14 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Capping Factor	42	16 (T)	57
New Capping Factor	58	16 (T)	73

FIELD DESCRIPTIONS:

PREVIOUS CAPPING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW CAPPING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

Each index is identified by a unique code.

EQUITY IDENTIFIER

This field contains a generated identifier used to differentiate between instruments on multiple lines; it is partly based on Constituent Code and is not maintained by JSE. It is intended only for record processing and is not supported outside of this purpose. International equities should still be uniquely identified by FTSE Constituent Code.

RECORD TYPE

The code indicating the type of information contained in the record disseminated - e.g.: D3T.

SUB TYPE

The Sub Type related to a particular record type - e.g. Sub Type 04.

CONTINUATION SEQUENCE

The sequence number used to join together certain record types, where more than one record exists per record type.

RUN DATE

DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.

ISIN

The ISIN (International Securities Identification Number) uniquely identifies all Active and Suspended securities internationally.

DATA (LAYOUTS BELOW)

The relevant record type(s) requested by the user will be given.
The end positions vary by sequence number.

20.3.2.218.3.2.2 Record Type D3T Sub Type 04 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Constituent code	42	10 (T)	51
Constituent name	52	50 (T)	101
Filler	102	10 (T)	111
ISIN number	112	13 (T)	124
Country code	125	2 (T)	126
Exchange code	127	4 (T)	130
ISO code	131	3 (T)	133

FIELD DESCRIPTIONS:

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
CONSTITUENT NAME	Name of constituent (tradable instrument as provided by FTSE).
FILLER	Spaces or Blanks.
ISIN NUMBER	International Securities Identification Number
COUNTRY CODE	Country code for constituent according to ISO 3166-1 (ALPHA 2). Example: Italy = IT and Switzerland = CH. Refer to appendix in section 37.239.2 to review the rules for this field.
EXCHANGE CODE	Primary exchange code for constituent as defined by FTSE (e.g. AAS = Australian Securities Exchange and NCT = Toronto Stock Exchange)
ISO CODE	ISO currency code for constituent in accordance with the ISO 4217 standard. Exceptions are where values are specified in British Pennies (£1 ÷ 100), the non-standard code GBX is used to differentiate from GBP.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

Secondary line	92	1 (T)	92
FTSE amendment code	93	6 (T)	98
FTSE amendment code notes	99	40 (T)	138

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

PREVIOUS INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1 year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

20.3.2.518.3.2.5 Record Type D3T Sub Type 04 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Capping Factor	42	16 (T)	57
New Capping Factor	58	16 (T)	73

FIELD DESCRIPTIONS:

PREVIOUS CAPPING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW CAPPING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

Price adjustment factor	138	16 (10.6)	153
Adjusted price	154	16 (10.6)	169

FIELD DESCRIPTIONS:

INDEX MARKER	String of max 12 index codes to which this constituent/tradable instrument belongs.
FILLER	Spaces or Blanks.
FILLER	Spaces or Blanks.
CLOSING PRICE	Closing price at market close in the specified currency.
PRICE ADJUSTMENT FACTOR	Price adjustment factor e.g. in the case of a corporate action related to a split or consolidation.
ADJUSTED PRICE	Share price in currency indicated, after price adjustment factor.

21.3.2.419.3.2.4 Record Type D4T Sub Type 04 Sequence No. 03

FIELD NAME	START POS	LENGTH	END POS
Closing shares in issue outstanding	42	15	56
New shares in issue outstanding	57	15	71
Previous investibility weighting used in index calculation	72	10 (T)	81
New investibility weighting used in index calculation	82	10 (T)	91
Secondary line	92	1 (T)	92
FTSE amendment code	93	6 (T)	98
FTSE amendment code notes	99	40 (T)	138

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

PREVIOUS INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1 year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

21.3.2.519.3.2.5 Record Type D4T Sub Type 04 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Capping Factor	42	16 (T)	57
New Capping Factor	58	16 (T)	73

FIELD DESCRIPTIONS:

PREVIOUS CAPPING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW CAPPING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

Country code	125	2 (T)	126
Exchange code	127	4 (T)	130
ISO code	131	3 (T)	133

FIELD DESCRIPTIONS:

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
CONSTITUENT NAME	Name of constituent (tradable instrument as provided by FTSE).
FILLER	Spaces or Blanks.
ISIN NUMBER	International Securities Identification Number
COUNTRY CODE	Country code for constituent according to ISO 3166-1 (ALPHA 2). Example: Italy = IT and Switzerland = CH. Refer to appendix in section 37.239.2 to review the rules for this field.
EXCHANGE CODE	Primary exchange code for constituent as defined by FTSE (e.g. AAS = Australian Securities Exchange and NCT = Toronto Stock Exchange)
ISO CODE	ISO currency code for constituent in accordance with the ISO 4217 standard. Exceptions are where values are specified in British Pennies (£1 ÷ 100), the non-standard code GBX is used to differentiate from GBP.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

FTSE amendment code notes	99	40 (T)	138
Date Last Modified	139	10 (T)	148
Effective Date	149	10 (T)	158

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

21.5.1.519.5.1.5 Record Type D4F Sub Type 14 Sequence No. 04

Filler	100	6 (T)	105
ISIN number	106	13 (T)	118
Country code	119	2 (T)	120
Exchange code	121	2 (T)	122
Current closing shares in issue	123	15	137
Current investibility weighting used in index calculation	138	7 (T)	144
Secondary line	145	1 (T)	145

FIELD DESCRIPTIONS:

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
CONSTITUENT NAME	Name of constituent (tradable instrument as provided by FTSE).
FILLER	Spaces or Blanks.
ISIN NUMBER	International Securities Identification Number
COUNTRY CODE	Country code for constituent (ZA).
EXCHANGE CODE	Primary exchange code for constituent. (e.g. J).
CURRENT CLOSING SHARES IN ISSUE	Shares in issue figure at index close.
CURRENT INVESTIBILITY WEIGHTING USED IN INDEX CALCULATION	Percentage of shares in issue included in index calculation (determined either by free float rule)
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

NOTE: DTT sub type 05 sequence 01 - 99 caters for changes to the constituents per index. Once these 99 record shares are used up, DTT sub type 07 sequence 01 - 99 provides for an additional 99 records to be populated should this be required.

23.3.3.321.3.3.3 Record Type DTT Sub Type 06/08 Sequence No. 01 - 99

FIELD NAME	START POS	LENGTH	END POS
Ex-dividend date	40	10 (T)	49

Effective Date	159	10 (T)	168

FIELD DESCRIPTIONS:

CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this compa.ny - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

23.5.1.521.5.1.5 Record Type DTF Sub Type 14 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Weighting Factor	40	16 (T)	55
New Weighting Factor	56	16 (T)	71

FIELD DESCRIPTIONS:

PREVIOUS WEIGHTING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW WEIGHTING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

2422 FTSE / JSE AFRICA INDEX SERIES –RESOURCE 10 CAPPED INDEX

24.122.1 VALUATIONS DATA FILES

The FTSE/JSE Resources 10 Capped Index will consist of constituents of the FTSE/JSE Resources 10 Index. This index will be capped at 30% at each quarterly review.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

25.3.123.3.1 TRACKER 1 DATA FILES (INDEX LEVEL DATA)

This file contains changes / amendments i.e. it provides indices' related amendments at both index and index constituent levels. It consists of three sections:

These are the changes effective on the following trading day.

25.3.1.123.3.1.1 Leading Record Layout

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Filler	28	12	39
Data (layouts below)	40	Varies	Varies

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code (This field will be blank for this record type)
RECORD TYPE	The code indicating the type of information contained in the record disseminated -e.g. DUT.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 03.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

25.3.1.223.3.1.2 Record Type DUT Sub Type 03 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Index code	40	6 (T)	45
Number of constituents (previous market cap)	46	15	60
Number of constituents (new market cap)	61	15	75
Previous market cap	76	16 (10.6)	91
New market cap	92	16 (10.6)	107
Previous divisor	108	16 (10.6)	123
New divisor	124	16 (10.6)	139

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS (PREVIOUS MARKET CAPITALISATION)	Number of constituents included in the index calculation (including secondary lines), as at market close.
NUMBER OF CONSTITUENTS (NEW MARKET CAPITALISATION)	Adjusted number of constituents included in the index calculation (including secondary lines), after effected changes.
PREVIOUS MARKET CAPITALISATION	Market capitalisation in Rand millions, at market close, after the 1 year forward DY adjustment.
NEW MARKET CAPITALISATION	Adjusted market capitalisation in Rand millions, at market open after effected changes and 1 year forward DY adjustment.
PREVIOUS DIVISOR	Index divisor as at market close.
NEW DIVISOR	Adjusted index divisor after effected changes.

25.3.1.323.3.1.3 Record Type DUT Sub Type 03 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
XD adjustment value	40	13 (10.3)	52

FIELD DESCRIPTIONS:

XD ADJUSTMENT VALUE

Today's ex dividend adjustment in Rands.

25.3.223.3.2 TRACKER 2 DATA FILES - STOCK LEVEL DATA - WEIGHTING AMENDMENTS

25.3.2.123.3.2.1 Leading Record Layout

Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{Yesterday's index}} - 1 \right) \times 100$$

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{Today's TRI}}{\text{Yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING IN THIS INDEX Percentage weighting within Index

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Indices with no constituents will not appear in the file.

26.224.2 CONSTITUENTS DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

26.2.124.2.1 Leading Record Layout

This file contains the index constituents as at the end of the current day.

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

26.5.1.524.5.1.5 Record Type DVF Sub Type 14 Sequence No. 04

This record will be present for all rows in sequence 03, even if both fields below are empty of values.

FIELD NAME	START POS	LENGTH	END POS
Previous Weighting Factor	40	16 (T)	55
New Weighting Factor	56	16 (T)	71

FIELD DESCRIPTIONS:

PREVIOUS WEIGHTING FACTOR

The currently applied constituent market capitalisation adjustment factor on the constituent as at today. This value is a decimal number but is only shown if the value is affected by the amendment.

NEW WEIGHTING FACTOR

The constituent market capitalisation adjustment factor on the constituent as it will be on the next trading day. This value is a decimal number but is only shown if the value is affected by the amendment.

Note: This sequence will be created with continuation numbers in multiples of four (4), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 04, the details of the second corporate action for the same instrument will appear between continuation numbers 05 and 08.

2725 FTSE / JSE AFRICA INDEX SERIES – TOP 40 DIVIDEND INDEX

27.125.1 INDEX POINTS DATA FILE

This file contains the index points for the index for the current trading day.

27.1.125.1.1 Leading Record Layout

Market Capitalisation AUD	389	16 (10.6)	404
Actual dividend yield	405	7 (3.4)	411

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS	Number of lines of stock included in index calculation (including secondary lines), as at today's market close.
INDEX PRICE	Index price in Rands
INDEX PRICE USD	Index price in US Dollars
INDEX PRICE EUR	Index price in EURO's
INDEX PRICE GBP	Index price in British Pounds
INDEX PRICE JPY	Index price in Yen
INDEX PRICE AUD	Index price in Australian Dollars
CAPITAL INDEX (ZAR)	Today's capital index value.

TOTAL RETURN INDEX (ZAR)	Today's total return index value. See Appendix A for definition and calculation method.
TOTAL RETURN INDEX USD	Today's total return index value in US Dollars
TOTAL RETURN INDEX EUR	Today's total return index value in EURO's
TOTAL RETURN INDEX GBP	Today's total return index value in British Pounds
TOTAL RETURN INDEX JPY	Today's total return index value in Yen
TOTAL RETURN INDEX AUD	Today's total return index value in Australian Dollars
XD ADJUSTMENT (TODAY)	Today's ex dividend adjustment in Rands.
XD ADJUSTMENT (YTD)	Ex-dividend adjustment year to date (from 1 Jan to 31 Dec.).
MARKET CAPITALISATION (ZAR)	Market capitalisation in Rands millions at today's close (net, after free float and adjustment for shareholder weighting)
MARKET CAPITALISATION USD	Market capitalisation in US Dollars
MARKET CAPITALISATION EUR	Market capitalisation in EURO's
MARKET CAPITALISATION GBP	Market capitalisation in British Pounds
MARKET CAPITALISATION JPY	Market capitalisation in Yen
MARKET CAPITALISATION AUD	Market capitalisation in Australian Dollars
ACTUAL DIVIDEND YIELD	Actual dividend yield.
	$\frac{\text{Annual div (in currency of price)}}{\text{Price}} = \text{Stock div}$
	$\text{Div yield of index} = \frac{\sum (\text{shares x investibility x annual div})}{\sum (\text{shares x investibility x price})} \times \frac{100}{100}$

28.1.326.1.3 Record Type D6V Sub Type 02 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Daily performance – Capital	40	12 (T)	51
Daily performance – TRI	52	12 (T)	63
Percentage weighting in this index	64	12 (T)	75
Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{Yesterday's index}} - 1 \right) \times 100$$

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{Today's TRI}}{\text{Yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING WITHIN THIS INDEX Percentage weighting within this Index.

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Sector indices with no constituents will not appear in the file

28.226.2 CONSTITUENTS DATA FILES

This file contains the index constituents as at the end of the current day.

Please note that the sequences will be created in multiples of 4 for every Minimum Variance Index in this family. At the time of production of this manual only one Minimum Variance index is being calculated i.e. the Minimum Variance Top 40 Index.

The sequences will work as follows:

Sequences 01 - 04, will carry data for all indices in this family, and the constituents within each index can be identified by looking at the fields within the leading record. The index code in the leading record needs to be used in conjunction with the Record Type's sequence number in order to distinguish which index a constituent record is referring.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

NOTE: D6T sub type 06 sequence 01 - 99 caters for changes to the constituents per index. Once these 99 record shares are used up, D6T sub type 08 sequence 01 - 99 provides for an additional 99 records to be populated should this be required.

28.426.4 OPENING CONSTITUENTS DATA FILES

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

28.4.126.4.1 Leading Record Layout

This file contains the index constituents as at the start of the following JSE business day.

FIELD NAME	START POS	LENGTH	END POS
Index code	1	6 (T)	6
Equity alpha code	7	6 (T)	12
Record type	13	3 (T)	15
Sub type	16	2 (T)	17
Continuation sequence number	18	2	19
Run date	20	8	27
Filler	28	12	39
Data (layouts below)	40	109	148

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
EQUITY ALPHA CODE	Current JSE equity alpha code
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g.: D6O.
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 11.
CONTINUATION SEQUENCE	The sequence number used to join together certain record types, where more than one record exists per record type.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
FILLER	Spaces or blank
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

28.4.226.4.2 Record Type D6O Sub Type 11 Sequence No. 01

FIELD NAME	START POS	LENGTH	END POS
Constituent code	40	10 (T)	49
Filler	50	10	59
ISIN number	60	13 (T)	72
FILLER	7379	6 (T)	78
Constituent name		50 (T)	128

FIELD DESCRIPTIONS:

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
FILLER	Spaces or Blanks.
ISIN NUMBER	International Securities Identification Number
FILLER	Spaces or Blanks.
CONSTITUENT NAME	Name of constituent. (Tradable instrument as provided by FTSE).

28.4.326.4.3 Record Type D6O Sub Type 11 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Index marker	40	6 x 12(T)	111
Country code	112	2 (T)	113
Exchange code	114	2 (T)	115
ISO code	116	5 (T)	120
Filler	121	4 (T)	124
Secondary line	125	1 (T)	125
Price (Rand)	126	16 (10.6)	141
Number of shares in issue	142	15	156

FIELD DESCRIPTIONS:

INDEX MARKER	Indices of which company is a constituent (i.e. J251 = FTSE / JSE Preference Share Index)
COUNTRY CODE	Country code for constituent (ZA)
EXCHANGE CODE	Primary exchange code for constituent (e.g. J)
ISO CODE	ISO currency code for constituent (ZAR)
FILLER	Spaces or Blanks.
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.
PRICE (RAND)	Closing price in Rands.
NUMBER OF SHARES IN ISSUE	Actual number of shares in issue (1% rule applied).

28.4.426.4.4 Record Type D6O Sub Type 11 Sequence No. 03

FIELD NAME	START POS	LENGTH	END POS
Market capitalisation (gross)	40	16 (10.6)	55
Investibility weighting factor	56	16 (T)	71

Date Last Modified	149	10 (T)	158
Effective Date	159	10 (T)	168

FIELD DESCRIPTIONS:CLOSING SHARES IN ISSUE
OUTSTANDING

Shares in issue figure at index close.

NEW SHARES IN ISSUE
OUTSTANDING

New shares in issue figure.

CLOSING INVESTIBILITY
WEIGHTING USED IN INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of 1 year forward DY and free float).

NEW INVESTIBILITY WEIGHTING USED IN
INDEX CALCULATION

Percentage of shares in issue included in index calculation (determined by the product of free float and 1 year forward DY).

SECONDARY LINE

Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.

FTSE AMENDMENT CODE

FTSE code for weighting and housekeeping amendments. (See Annexure A)

FTSE AMENDMENT CODE DESCRIPTION

Details, where available, on FTSE amendment code. (See Annexure A)

DATE LAST MODIFIED

The date on which the amendment was last changed. When an amendment does not have any changes, the previously published date is resent. DD/MM/YYYY

EFFECTIVE DATE

The date on which the amendment will be applied to the constituent. DD/MM/YYYY

Note: This sequence will be created with continuation numbers in multiples of three (3), to reflect multiple corporate actions per instrument. If one instrument has two corporate actions, then the first corporate action details will appear between continuation number 01 and 03, the details of the second corporate action for the same instrument will appear between continuation numbers 04 and 06.

2927 FTSE / JSE MINIMUM VARIANCE – ALL SHARE

Only the Minimum Variance – All Share Index will be provided in the data files below.

29.127.1 VALUATIONS DATA FILES

This file contains the index closing positions for the current trading day.

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
NUMBER OF CONSTITUENTS	Number of lines of stock included in index calculation (including secondary lines), as at today's market close.
INDEX PRICE	Index price in Rands
INDEX PRICE USD	Index price in US Dollars
INDEX PRICE EUR	Index price in EURO's
INDEX PRICE GBP	Index price in British Pounds
INDEX PRICE JPY	Index price in Yen
INDEX PRICE AUD	Index price in Australian Dollars
CAPITAL INDEX (ZAR)	Today's capital index value.

TOTAL RETURN INDEX (ZAR)	Today's total return index value. See Appendix A for definition and calculation method.
TOTAL RETURN INDEX USD	Today's total return index value in US Dollars
TOTAL RETURN INDEX EUR	Today's total return index value in EURO's
TOTAL RETURN INDEX GBP	Today's total return index value in British Pounds
TOTAL RETURN INDEX JPY	Today's total return index value in Yen
TOTAL RETURN INDEX AUD	Today's total return index value in Australian Dollars
XD ADJUSTMENT (TODAY)	Today's ex dividend adjustment in Rands.
XD ADJUSTMENT (YTD)	Ex-dividend adjustment year to date (from 1 Jan to 31 Dec.).
MARKET CAPITALISATION (ZAR)	Market capitalisation in Rands millions at today's close (net, after free float and adjustment for shareholder weighting)
MARKET CAPITALISATION USD	Market capitalisation in US Dollars
MARKET CAPITALISATION EUR	Market capitalisation in EURO's
MARKET CAPITALISATION GBP	Market capitalisation in British Pounds
MARKET CAPITALISATION JPY	Market capitalisation in Yen
MARKET CAPITALISATION AUD	Market capitalisation in Australian Dollars
ACTUAL DIVIDEND YIELD	Actual dividend yield.

$$\frac{\text{Annual div (in currency of price)}}{\text{Price}} = \text{Stock div}$$

$$\text{Div yield of index} = \frac{\sum (\text{shares x investibility x annual div})}{\sum (\text{shares x investibility x price})} \times \frac{100}{100}$$

29.1.327.1.3 Record Type D5V Sub Type 02 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Daily performance – Capital	40	12 (T)	51
Daily performance – TRI	52	12 (T)	63
Percentage weighting in this index	64	12 (T)	75
Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{Yesterday's index}} - 1 \right) \times 100$$

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{Today's TRI}}{\text{Yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING WITHIN THIS INDEX Percentage weighting within this Index.

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Sector indices with no constituents will not appear in the file

29.227.2 CONSTITUENTS DATA FILES

This file contains the index constituents as at the end of the current day.

Please note that the sequences will be created in multiples of 4 for every Minimum Variance Index in this family. At the time of production of this manual only one Minimum Variance index is being calculated i.e. the Minimum Variance All Share Index.

The sequences will work as follows:

Sequences 01 - 04, will carry data for all indices in this family, and the constituents within each index can be identified by looking at the fields within the leading record. The index code in the leading record needs to be used in conjunction with the Record Type's sequence number in order to distinguish which index a constituent record is referring.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

Earnings yield	76	13 (9.4)	88
Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{Yesterday's index}} - 1 \right) \times 100$$

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{Today's TRI}}{\text{Yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING WITHIN THIS INDEX Percentage weighting within this Index.

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Sector indices with no constituents will not appear in the file

30.228.2 CONSTITUENTS DATA FILES

This file contains the index constituents as at the end of the current day.

Please note that the sequences will be created in multiples of 4 for every Responsible Investment Index in this family. At the time of production of this manual only one Responsible Investment index is being calculated i.e. the Responsible Investment Index.

The sequences will work as follows:

Sequences 01 - 04, will carry data for all indices in this family, and the constituents within each index can be identified by looking at the fields within the leading record. The index code in the leading record needs to be used in conjunction with the Record Type's sequence number in order to distinguish which index a constituent record is referring.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

Index Earnings Yield Sign	89	1 (T)	89

FIELD DESCRIPTIONS:

DAILY PERFORMANCE (CAPITALISATION) Percentage change from previous day's capital index close.

$$= \left(\frac{\text{Today's index}}{\text{Yesterday's index}} - 1 \right) \times 100$$

DAILY PERFORMANCE (TRI) Percentage changes from previous day's TR index close.

$$= \left(\frac{\text{Today's TRI}}{\text{Yesterday's TRI}} - 1 \right) \times 100$$

PERCENTAGE WEIGHTING WITHIN THIS INDEX Percentage weighting within this Index.

EARNINGS YIELD The earnings per share for the past 12 months divided by the closing price

EARNINGS YIELD SIGN The sign indicating whether the yield earnings value is negative or positive. It denotes "N" for a negative value and "P" for a positive value.

NOTE: Sector indices with no constituents will not appear in the file

31.229.2 CONSTITUENTS DATA FILES

This file contains the index constituents as at the end of the current day.

Please note that the sequences will be created in multiples of 4 for every Responsible Investment Index in this family. At the time of production of this manual only one Responsible Investment index is being calculated i.e. the Responsible Investment Index.

The sequences will work as follows:

Sequences 01 - 04, will carry data for all indices in this family, and the constituents within each index can be identified by looking at the fields within the leading record. The index code in the leading record needs to be used in conjunction with the Record Type's sequence number in order to distinguish which index a constituent record is referring.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

CONSTITUENT CODE	Unique Constituent code derived by FTSE per stock.
ISIN NUMBER	International Securities Identification Number
FILLER	Spaces or Blanks.
CONSTITUENT NAME	Name of constituent. (Tradable instrument as provided by FTSE).

31.2.329.2.3 Record Type D0C Sub Type 01 Sequence No. 02

FIELD NAME	START POS	LENGTH	END POS
Index marker	40	6 x 12(T)	111
Country code	112	2 (T)	113
Exchange code	114	2 (T)	115
ISO code	116	5 (T)	120
Filler	121	4 (T)	124
Secondary line	125	1 (T)	125
Price (Rand)	126	16 (10.6)	141
Number of shares in issue	142	15	156

FIELD DESCRIPTIONS:

INDEX MARKER	Indices of which company is a constituent (i.e. J200 = FTSE / JSE Top 40)
COUNTRY CODE	Country code for constituent (ZA)
EXCHANGE CODE	Primary exchange code for constituent (e.g. J)
ISO CODE	ISO currency code for constituent (ZAR)
FILLER	Spaces or Blanks.
SECONDARY LINE	Indicates that two lines of stocks are used for this company - Y/N indicator e.g. ordinary and N shares.
PRICE (RAND)	Closing price in Rands.
NUMBER OF SHARES IN ISSUE	Actual number of shares in issue (1% rule applied).

31.2.429.2.4 Record Type D0C Sub Type 01 Sequence No. 03

FIELD NAME	START POS	LENGTH	END POS
Market capitalisation (gross)	40	16 (10.6)	55
Investibility weighting factor	56	16 (T)	71
Adjusted market cap (net)	72	16 (10.6)	87
Percentage weighting within this index	88	15 (T)	102

FIELD DESCRIPTIONS:

MARKET CAPITALISATION (GROSS)	Market Capitalisation in Rands millions at index close (gross i.e. not adjusted for investibility weighting factor).
INVESTIBILITY WEIGHTING FACTOR	Percentage of shares in issue included in index calculation (determined by free float rule and adjusted for shareholder weighting).
ADJUSTED MARKET CAPITALISATION (NET)	Adjusted market capitalisation in Rands millions at index close (net i.e. investibility weighting factor multiplied by market capitalisation used in index calculation).
PERCENTAGE WEIGHTING WITHIN THIS INDEX	Percentage weighting within this Index.

31.2.529.2.5 Record Type D0C Sub Type 01 Sequence No. 04

FIELD NAME	START POS	LENGTH	END POS
Dividend yield Percentage	40	15 (T)	54
Weighting Factor	55	16 (6,10)	70

FIELD DESCRIPTIONS:

DIVIDEND YIELD Percentage

Percentage dividend yield per stock.

$$\left(\frac{\text{Annual div}}{\text{price}} \times 100 \right)$$

WEIGHTING FACTOR

Constituent market capitalisation adjustment factor.

31.329.3 TRACKER DATA FILES

31.3.129.3.1 TRACKER 1 DATA FILES (INDEX LEVEL DATA)

This file contains changes / amendments i.e. it provides indices' related amendments at both index and index constituent levels. It consists of three sections:

These are the changes effective on the following trading day.

N.B These record types will on an ad-hoc basis include dummy line instruments due to complex Corporate Actions, please refer to section 7 of this document for the full explanation of Dummy Lines.

31.3.1.129.3.1.1 Leading Record Layout

3634 FTSE INTERNATIONAL CURRENCY EXCHANGE RATES

36.134.1 CURRENCY EXCHANGE RATES DATA FILE

This file contains the international currency exchange rates used by FTSE for calculation of market capitalisation, Index value and TRI in multiple currencies. This is used by FTSE to generate the international valuations files (DNV, D1V, D2V, D3V and D4V) and is intended to make public the exchange rate that they used in these calculations. This is not intended to be an authoritative indication of international exchange rates as traded on any particular foreign exchange market.

FIELD DESCRIPTIONS:

EMPTY PADDING

Blank or space.

CURRENCY ISO CODE

The ISO currency code of the currency to which the given exchange rate applies. The three letter currency codes are in accordance with the [ISO 4217 standard](#) (click for details). The exception is that some codes are added to represent 1/100 denominations (cents, pence and so on) as a distinct code that isn't recognised by ISO. These are:

- GBX 1/100 GBP (British Pennies)
- ILX 1/100 ILS (Israeli Agorot)
- USC 1/100 USD (United States Cents)
- PNC a non-existent currency (equals 1 GBX)

EXCHANGE RATE

The factor to multiply 1 USD by in order to have an equivalent amount in the named currency in the preceding field.

LAST TRADED TIME	The time of the last trade. Will be null if the index had no activity on the current day.
TRADED INDICATOR	“Y” if the index traded on the day and “N” if it didn’t.

3836 FTSE/JSE TOP 40 NET RISK TARGET TOTAL RETURN INDEX

The FTSE/JSE Top 40 Risk Target Return Index Series is based upon a rules-based framework that tracks the return of an investment strategy which aims to provide an investor with risk targeted exposures to the FTSE/JSE Top 40 Index. The Risk Target Indices make use of the empirical properties of the risk statistic and aim to provide an equity investor access to three different levels of risk exposure for the FTSE/JSE Top 40 Index: 10%, 15% and 20% respectively.

Data (layouts below)	40	Varies	Varies

FIELD DESCRIPTIONS:

Z

INDEX CODE	Each index is identified by a unique code.
RECORD TYPE	The code indicating the type of information contained in the record disseminated - e.g. RTI
SUB TYPE	The Sub Type related to a particular record type - e.g. Sub Type 01.
CONTINUATION SEQUENCE	The sequence number used to indicate row number in the results.
RUN DATE	DISSEMINATION DATE - The date of the dissemination run, in the format CCYYMMDD.
DATA (LAYOUTS BELOW)	The relevant record type(s) requested by the user will be given.

38.1.236.1.2 Record Type RTI Sub Type 01

FIELD NAME	START POS	LENGTH	END POS
Index Code	40	6 (T)	45
Index Name	46	60 (T)	105
Index Value	106	18 (10.8)	123

FIELD DESCRIPTIONS:

INDEX CODE	Each index is identified by a unique code.
INDEX NAME	The Index name.
INDEX VALUE	Today's Index Value.

3937 Annexure A

• FTSE/JSE Africa Series Dividend Codes

Code	Type of Dividend	FTSE Dividend Notes
F	Final Dividend	
I	Interim Dividend	
Q	Quarter Dividend	
S	Special Dividend	
M	Miscellaneous dividend	
Y	Annually paid dividend	

• FTSE/JSE Africa Series Amendment Codes

Housekeeping Changes

Code	Amendment Note	Notes for service user
NC	Name Change	Former name will appear in notes field.
CU	Currency Change	
CA	Constituent Addition	Includes quarterly review changes and classification changes
CD	Constituent Deletion	Includes quarterly review changes and classification changes
SS	Sub-Sector Change	Sub-Sector Classification code change

Corporate Actions

Code	Amendment Note	Notes for service user
CP	Capital Repayment	Terms included in notes field. as available
CI	Capitalisation Issue	Terms included in notes field. as available
CN	Consolidation	Terms included in notes field. as available
IS	Issue of Shares	Includes: Employee Exercise of Options Exercise of Warrants Further Issue Issue for Cash Offer for subscription Satisfaction of loan
CX	Complex Issue	Details of complex issue
RI	Rights Issue	Terms included in notes field. as available
SB	Subdivision	Terms included in notes field. as available
IC	Investability weight change	
SW	Weighting Change	Used in those indices that have a separate free float / investability weighting and a "portfolio factor" column. This portfolio factor will change from index to index (e.g. equal weighting factor, RAFI factor etc). It indicates that there is a change to this index-specific weighting factor.

39.137.1 CALCULATION OF THE TOTAL RETURN INDICES (TRI'S)

The Total Return Indices (TRI's) measure total return on the underlying indices. combining both capital performance and reinvested income. The TRI's are calculated using declared dividends except where specified that the TRI is calculated on a net basis.

Although in reality there is a timing delay between the xd date and the receipt of dividends (payment date). it is considered preferable to assume all income is reinvested on the xd date rather than incur the complications of allowing a time lag before (i) reinvestment of the net dividends. and (ii) different and uncertain time lag before reinvestment of any tax reclaimed.

39.237.2 INTERNATIONAL PRODUCT COUNTRY CODE TRANSLATION

The fields in the **International products** which indicate a country code are translated from the original value sent by FTSE. The output value is compliant with the ISO standard 3166-1 (Alpha 2) defining two-letter country codes (for more details, visit this [definition](#)).

FTSE Country Code	Country Name	ISO 3166-1 (ALPHA 2) Code
AU	Australia	AU
BELG	Belgium	BE
CAN	Canada	CA
DEN	Denmark	DK
FIN	Finland	FI
FRA	France	FR
GER	Germany	DE
GRC	Greece	GR
HK	Hong Kong	HK
IRE	Ireland	IE
ISR	Israel	IL
ITA	Italy	IT
JA	Japan	JP
KOR	Republic of Korea (South Korea)	KR
NETH	Holland	NL
NOR	Norway	NO
NZ	New Zealand	NZ
OEST	Austria	AT
PTL	Portugal	PT
SI	Singapore	SG
SP	Spain	ES
SWED	Sweden	SE
SWIT	Switzerland	CH
UK	Great Britain and Northern Ireland	GB
USA	United States of America	US
