Number: 100/2026
Date: 16 July 2026

Name and Surname: Vuyo Mashiqua
Designation: Head - Equity and Equity Derivatives

JSE TRADING AND INFORMATION SYSTEM UPGRADE - RELEASE 7.8 (UPDATE)

This Service Hotline follows our previous communication ([031/2026](#) and [070/2026](#)) regarding **Release 7.8 (MIT Upgrade 2026)**, and communicates go-live timelines and key information regarding MIT technical specifications.

Release 7.8 will be deployed to the Production Environment on the 14th of August 2026, effective on the 17th of August 2026. This release affects the Equity Market (**EQM**), Equity Derivatives Market (**EDM**), and Currency Derivatives Market (**FXM**) and will be deployed during a Participation Test Weekend (PTW). Market participants are encouraged to include Release 7.8 in their testing activities over this PTW: 15-16 August 2026.

Summary of Enhancements (additional information in: [MIT Upgrade 2026](#))

- **Trade Capture Report (TCR) Submission Validation Enhancement** – this is an enhancement to ensure TCRs can only be submitted once the Trade Reporting session has started.
- **FAST Specification Update: Trading Halt Reason Codes (EQM)** – this enhancement ensures that trading halt reason codes in the FAST specification now include a code for scenarios where a specific reason is not available. The reason code will be 00: “Reason not available”.
- **New Reject Code for IOC/FOK Expiry Due to Circuit Breakers** – a reject code will now be sent via FIX and Native protocols when IOC or FOK orders expire because of circuit breaker thresholds being breached.
