JSE Services Documentation - Client Connectivity Standards and Requirements Document Update

Clients are advised that an updated version of the Client Connectivity document is now available as part of the JSE Services Documentation.

JSE Client Connectivity Standards and Requirements Document – is a guidance note to detail the various connectivity options and requirements for Clients who require connectivity to the JSE and its services across all JSE Markets. In addition, the document includes the minimum bandwidth requirements for the various services.

Clients are advised that the document has been **updated to include** the connectivity options for the newly introduced **JSE Colocation Service as well as the JSE London Point of Presence (PoP)**.

For convenience, below is a link to this document:
