Name and Surname: Martin Koch
Designation: Head - Trading Operations

JSE TRADING AND INFORMATION SYSTEM UPGRADE - RELEASE 7.8 LIVE

Clients are advised that Release 7.8 was successfully deployed to the Production Environment over the weekend and is live this morning.

As part of this release, the TIDM field identifier will no longer be provided in the JSE reference data outputs. Client files created on Friday evening still contained this value and market broadcast messages disseminated this morning would have reflected the relevant TIDM, since deployment activities were performed over the weekend.

This notification is issued for information purposes only to advise clients that the TIDM field identifier is planned to be decommissioned at the end of the day. No client action is required.
