INVITATION TO CONTRIBUTE TO JSE SENS STRATEGIC ROADMAP REVIEW

The JSE is continually reviewing its technology and products and services to verify that they still meet the needs of stakeholders, as well as ensuring that they align, as much as possible, to international best practice and standards.

The JSE is embarking on a holistic review of the Stock Exchange News (SENS) service which will culminate in a SENS strategic roadmap that will map out the proposed future enhancements and timings.

As part of our ambition to collaborate even more with external stakeholders, we would like to share our ideas, and provide an opportunity for you to provide feedback as well as raise any additional input that we should consider.

To this end, kindly see attached the proposed draft roadmap and related explanations on the JSE ideas. To make the feedback process as easy as possible, we have provided a feedback form to be **completed and returned to the JSE by no later than Friday, 28 June 2019**.

We encourage you to take up this opportunity to collaborate with us on this journey to ensure that the future solution accommodates your needs and considerations as much as possible.

Note that the target audience is both business users consuming the data as well as technical users that process and distribute the JSE Live and End of Day SENS market data products as each group will have different perspectives.

Market / Service:

JSE Live and End of Day SENS Market Data Products

Environment(s):

Production

Additional Information:
