DECOMMISSION OF THE HTTPS WEB PROTOCOL - EFFECTIVE 7 OCTOBER 2024

In line with JSE security best practices, we will be decommissioning the web service used to access the Information Delivery Portal (IDP). The decommission will be implemented on Friday, 4 October 2024 and the changes will be effective from **Monday, 7 October 2024**.

Please pass this important hotline on to your technical colleagues that are directly involved in connecting to our FTP server via the website to ensure that there is no disruption when the changes are implemented.

We are unfortunately not able to identify parties using the webservice, hence this hotline is being issued to all direct IDP users and we apologise if it does not affect you.

To help you and/or your technical colleagues identify whether you use the affected webservice, without needing to review the connectivity document, below is the link of the webservice:

<https://idp.jse.co.za/IDPService.svc>

Clients are to migrate to the other available connectivity protocols, an updated IDP connectivity document (changes in tracked mode) is provided with this hotline for your reference to the available protocols.
