JSE Remote Disaster Recovery (DR) Site Connectivity test update – Rescheduled to 11 October 2014

As previously communicated at the JSE Market Communication Session on 28 November 2013, the JSE initially planned a Full Market DR test for all JSE clients for all markets (Equity, Equity Derivatives, Commodity Derivatives, Interest Rate and Currency Derivatives) as well as all Live and End of Day Public Information Subscribers for all JSE products on **25 and 26 October 2014**.

We would like to advise clients that due to unforeseen circumstances we have had to reschedule the DR test from **25 and 26 October 2014** to **11 and 12 October 2014**.

The JSE has also scheduled an additional internal DR test for **2 and 3 August 2014**. During this test the JSE trading systems for all markets will be brought up and test data may be published to clients. **All clients** who directly connect to the JSE are requested to ensure that their production **systems are shut down** during the weekend to ensure that they **do not receive and process any test messages published during the test**.

Further details regarding the DR test will be provided to clients closer to the time. If there are further questions regarding this notice kindly refer them to the JSE's Customer Support team on (011) 520 7777 or CustomerSupport@jse.co.za.

We thank you for your understanding and co-operation.
