DELAYED START: EQUITY DERIVATIVES AND CURRENCY DERIVATIVES MARKETS

The JSE is currently experiencing substantial delays to end of day processing for the Equity Derivatives and Currency Derivatives Markets.

A problem related to the calculation of risk arrays has been identified in the Real Time Clearing solution.

We are working with our vendor to resolve the issue and conclude end of day processing for the affected markets.

This problem will delay the opening of the Equity Derivatives and Currency Derivatives Markets on 11 July 2019.

Trading on the Equity, Bond, Interest Rate Derivatives and Commodity Derivatives Markets are not affected by this issue and will open at the normal times.

Please note that Equity trades will not feed down to BDA until the issue is resolved.

We can confirm that BDA Opening positions are correct.

We apologise for the inconvenience caused.

Market / Services:

JSE Derivative Markets

- Equity Derivatives
- Currency Derivatives

Environment(s):

Production
