Equity Market Enhancement Release – Services Documentation updates and Customer Test Service (CTS)

Further to Service Hotline 146/14 issued 5 August 2014 pertaining to the Equity Market Enhancement release for 2014, clients are advised that the following Services Documentation has been updated with the enhancements. The documents include tracked changes to assist clients in determining the updates made to the document.

Volume 01 – Native Trading Gateway	v2.03
Volume 02 – FIX Trading Gateway (FIX 5.0 SP2)	v2.02
Volume 04 – Drop Copy Gateway (FIX 5.0 SP2)	v2.01
Volume 09 – JSE Reference Data Management	v2.03

Following is the web link to the updated documents: Services Documentation

In addition, the JSE Customer Test Service (CTS) was upgraded to the new release code on Monday, 25 August 2014 to enable clients to develop and test their changes prior to go live of this release in November 2014.

CTS has been upgraded as follows:-

- Current CTS – environment upgraded to the **new release code**
- Parallel CTS – environment mirrors **current production code**

The parallel CTS environment is to assist clients in maintaining any changes to their production solutions which may be required prior to go live of the new release. It will be decommissioned post the go live of the new release in November 2014.

Please refer all queries relating to the documentation or CTS to TradingServices@jse.co.za
