JSE INTEGRATED TRADING AND CLEARING (ITAC) INTERNAL DISASTER RECOVERY (DR) TEST - 27 AND 28 AUGUST 2016

Clients are advised that the JSE will be conducting an internal JSE Disaster Recovery test in the ITaC production environment on **27 and 28 August 2016**. During this test the JSE trading and information systems for the Equity Market will be brought up and test data may be published to clients.

It should be noted that the JSE's Production and Remote Disaster Recovery links may be active simultaneously during the course of the day.

Therefore, Equity Market clients who directly connect to the JSE are requested to ensure that their **production systems are shut down and that their DR links are disabled** during the weekend to ensure that they **do not receive and process any test messages published during the test**.

In addition please note the following:

- BDA services will **not** be available on **Saturday, 27 August 2016 due to month end processing**
- No impact to any other production systems normally available during the weekend.

Should you experience any problems over the weekend, please contact Customer Support on the after-hours number **+27 11 520 7900** or **+27 83 611 9315**.

Market / Service:

JSE Equity Market
JSE broker deal accounting (BDA)
