UPDATE ON PROBLEMS WITH EQUITY MARKET END OF DAY DATA PRODUCTS ON 23 AND 25 NOVEMBER 2015

Due to technical problems on the evenings 23 and 25 November 2015, the production of the Late Equities End of Day data file (E.zip) was unfortunately delayed.

As is our customary practice, the JSE will be investigating the root causes of these problems and assessing what measures to take to try and mitigate the specific types of problems from happening again.

Please note that the problems for these particular days were unrelated, as such the investigation and resolution will be individually focused.

The JSE apologizes for the impact to your operations and to the inconvenience to your users of the data.
