CHANGES TO COUNTRY ORIGIN CODE FOR DELIVERABLE WHEAT

The JSE has received a request to change the length of the country origin code from three characters to two characters; this is to align the origin display code on the Spot Basis contract trading window of NUTRON and the API. For example German Wheat country code is currently GER and would be changed to GN.

Current Code	Origin	New Code
HRS	USA Hard Red Spring	HS
HRW	USA Hard Red Winter Wheat	HW
HRD	Australia Hard	HD
APH	Australia Prime Hard	AH
APW	Australia Premium White	AB
ASW	Australia Standard White	AJ
ARG	Argentina	AC
GER	German Wheat	GC
CAN	Canadian Red Western Spring	CS

The proposed change is planned for implementation on 9 March 2015. Should there be objections, please send an e-mail to the Commodity Derivative group address no later than 27 February 2015. No further market notice will be distributed unless objections are received in this regard.
