EQUITY MARKET TRADING RELEASE 28 OCTOBER 2017

The JSE has planned routine network and application maintenance on Saturday, 28 October 2017. This will affect all Equity Market member firms as well as Live Information Subscribers for all JSE Equity Market data products.

The Equity Market trading systems will be started up on **Saturday, 28 October 2017**, for the duration of the day, so that the JSE can prove the success of the change. The JSE does **not** require clients to participate in this change. However, clients must ensure that their production systems are **shut down** prior to the system's start-up (preferably the evening before the scheduled change), to ensure that they do not receive and process any test data.

The application maintenance will ensure that the Trading system for the Equity Market is ready for the anticipated Go Live of the Integrated Trading and Clearing (ITaC) Project in 2018. As part of this release, the functionality to trade at half a price tick on Cross Orders (XT) will be made available. The change is functional and has no impact on APIs.

The JSE appreciates your co-operation in this regard.

Market/s:

JSE Equity Market

Environment(s):

Production
