JSE TRADING AND INFORMATION SYSTEM – MINIMUM BANDWIDTH REQUIREMENT UPDATE

We are updating the minimum bandwidth requirements for the **Equity Market Full Depth** and **Equity Market Level 1 Feed** in line with identified optimisation and client feedback.

These feeds publish a maximum of 1.370 and 1.410 Mbps to the market, which will increase to 1.875, and 1.822 Mbps respectively. The purpose of this feed is to cater for clients that prefer to limit their bandwidth usage.

The current **Equity Market Un-throttled Full Depth Feed** is setup to publish a maximum of 3.400 Mbps and will remain unchanged.

The Equity Market Full Depth and Equity Market Un-throttled Full Depth Feed publish the same data just at different maximum bandwidth rates, and, as such, the JSE recommend clients subscribe to one or the other to avoid unnecessary line costs.

This change will be effective from **14 December 2020** and clients are required to update bandwidth capacity for relevant Market data feeds as required. The updated requirements are available at the following link:

[JSE Client Connectivity Standards and Bandwidth Requirements](#)
