### EQUITY DERIVATIVES AND COMMODITY DERIVATIVES MARKETS NEW DLL FOR REPORT ONLY UPLOAD FUNCTIONALITY

The JSE encountered an issue with the Equity Derivatives and Commodity Derivatives Market Report only upload functionality on the Nutron Trading Frontend.

When using the report only upload functionality where the strike field is populated with a decimal, an error of an "Invalid Strike Price" is returned restricting the ability to upload the required deal.

A DLL file has been made available to correct this defect.

We encourage all JSE Equity and Commodity Derivative dealers to download the following DLL and save it into their running directory:
