JSE TRADING AND INFORMATION SYSTEM UPGRADE – UPCOMING RELEASE

This notice relates to Service Hotline 252/2020 sent on 13 November 2020 and serves to inform market participants that the changes for the upcoming release have been deployed into the Customer Test environment (CTS2A).

A reminder, this functional release is applicable to the Equity, Equity Derivatives and Currency Derivatives Markets.

Clients are encouraged to logon to the environment to prove connectivity and begin functional testing.

A reminder that the same IP Addresses that are used in CTS1A will be re-used for CTS2A with the port off-set of 20,000 applicable for CTS1A and 40,000 applicable for CTS2A.

Reference data files will be available on IDP under the CTS 2A folder, which will be a sub folder within both the respective Derivatives Market CTS and the Equity Market CTS Folders.

Examples of paths to the direct folder will be:

- Distribution\Derivatives Market CTS\CTS 2A
- Distribution\Equity Market CTS\CTS 2A

Clients are advised that IDP access will be copied to the new CTS2A folder. Should clients experience any issues with accessing files in the new folder they are to please contact our Client Service Centre (CSC) team to assist further.

The API and information documents have been updated and are available at the following link: <https://www.jse.co.za/services/itac>

For detailed information relating to the scope of this release, please refer to the JSE Trading Release Document available on the JSE website under “Next Functional Release” in the “Services Documentation” section at the following link:
<http://www.jse.co.za/services/itac>

The implementation date for Production is still to be determined and will be communicated in due course. Please note that this is subject to market readiness and any major issues that may arise.

Please refer all API Specification, connectivity and testing related queries to CustomerSupport@jse.co.za for assistance.
