Equity Market Trading and Information System – Specification Documentation Updates for Colocation Service

Clients are advised that the Equity Market Trading and Information Specification documents (which form part of the Services Documentation), has been updated to include the introduction of the Colocation Service. Colocation is an optional service to clients and is on track for Go Live on Monday, 12 May 2014.

The following documents have been updated using tracked changes to assist clients in determining the updates to these documents. These are the only Equity Market specification documents that will be impacted with the introduction of the Colocation Service.

Volume 01 – Native Trading Gateway	v2.02
Volume 05 – Market Data Gateway (ITCH - UDP)	v2.03

A copy of these documents can be found at the following link:-
