Equity Market Trading and Information System – 2013 Product Upgrade

Clients are reminded that the JSE has proposed an Equity Market 2013 product upgrade release. As mentioned previously, the JSE is a number of versions behind the current MillenniumIT production version.

As this release is a substantial upgrade involving several version changes, the JSE's service provider has strongly advised that extensive testing be conducted to ensure continued stability of the solution. Therefore, the product upgrade scheduled for July, will be postponed to a later date. We will provide feedback on the confirmed scope, timeline and updated services documentation for this release as soon as it has been finalised. We apologise for any inconvenience this may have caused.

Please contact Customer Support on +27 11 520 7777 if you have any queries.

Service:

- Equity Market Trading and Information Solution

Environment(s):

- Production
