ENHANCEMENT TO THE BOND DATA PRODUCT OFFERING – EFFECTIVE 20 MARCH 2017

Clients are advised of an intention by the Information Services division of the JSE to enhance the Daily Bond Data file that is currently made available at 15:00 each day, as well as the monthly data file, effective 20 March 2017.

There has been some interest in the below mentioned data hence the urgency for the IS division, as part of its drive to add value to data clients, to make the new data field available as soon as possible. In doing a number of spot checks with a set of data subscribers, the additional should not impact your processing routines.

The enhancement is to add a field '**Base CPI**' which has been developed to allow for 19 characters (3.15) all numeric. The '**Base CPI**' field column has been added at the end of report.

In support of this enhancement, a sample test data file has been created and is attached to this notification to aid development.
