JSE NETWORK SWITCH IOS UPGRADE 6 JUNE 2015

The JSE is planning routine maintenance on the network switches. This requires an upgrade to the Internetwork Operating System (IOS) of the JSE Switches. This will impact all JSE clients that connect directly to the JSE systems. This spans all Member firms for all JSE markets (Equity, Equity Derivatives, Commodity Derivatives, Interest Rate and Currency Derivatives) as well as Live and End of Day Information Subscribers for all JSE market data products.

The Equity Market and Derivatives Markets trading systems will be started up on **Saturday, 6 June 2015**, for the duration of the day, so that the JSE can prove the success of the change. The JSE does **not** require clients to participate in this change. However, clients must ensure that their production systems are **shut down** prior to the systems start-up (preferably the evening before the scheduled change), to ensure that they do not receive and process any test data.

The JSE apologises for any inconvenience caused as a result of this request.

Market/s:

- JSE Equity Market
- JSE Derivative Markets
 - Equity Derivatives
 - Interest Rate and Currency Derivatives
 - Commodity Derivatives

Environment(s):

Production
Customer Test Service (CTS)
