REFERENCE NUMBER: 75/2018

24 April 2018

UPDATE ON MISSED SLA OF THE EARLY EQUITIES, CORE AND SPECIALIST INDICES NON-LIVE DATA PRODUCTS ON 23 APRIL 2018

The JSE experienced issues with the production and dissemination routines on the evening of Monday, 23 April 2018. As a result of these problems the production and dissemination of the Early Equities (EE.Zip), Core Indices (I.Zip) and Specialist Indices (SI.Zip) files were unfortunately delayed.

The issues were as a result of a database performance and a technical issue with the system that disseminate files to our Information Delivery Portal (IDP).

All issues were resolved and additional monitoring of the fixes will continue to ensure that these specific problems will not occur in the future.

The JSE apologises for the impact to your operations and to data users.

Market / Service:

JSE Early Equities Data Service

JSE Core Indices End of Day Data
Service

JSE Specialist Indices End of Day Data
Service

Environment(s):

Production
