## NEW DLL FOR JSE ECFD EXPOSURE VIEW

The JSE encountered two issues with the JSE eCFD exposure view on the Nutron Trading Frontend.

The first issue experienced was that the eCFD exposure view did not remove records when the quantity and exposure fields had zero values.

The second issue occurred while executing roll-over trades and the eCFD exposure view did not update with the correct expiry date.

A DLL file has been made available to resolve this issue. Once installed, the eCFD exposure view will update correctly after closing and opening the exposure view.

We encourage all dealers trading JSE eCFD's to download the following DLL and save it into their running directory:
