JSE MAINFRAME MIGRATION (BDA) – 20 FEBRUARY 2021 FEEDBACK AND GO-LIVE 20-22 MARCH 2021

Thank you for your participation in the successful BDA Mainframe Migration Dress Rehearsal (DR) on 20 February 2021, which enabled us to achieve:

- Connectivity and functional testing conducted by the 43 members that participated;
- Successful testing of various BDA Upload functions;
- Successful download of dissemination files from the mainframe;
- Recycling of members LU's and password resets;
- Re-spooling of BDA reports (ERD);
- Test message flows between BDA and ECS;
- Test message flows between JSE and Strate;
- Transfer of BDA dissemination files to IDP.
- A Member successfully testing their key stroke emulation software (screen scrapping).

Update on items noted during 6 February 2021 DR:

- We tested concurrent uploads where members uploaded multiple files at the same time and the JSE did not experience any issues on the day
- Printing to remote printers – Remains an issue and JSE is engaging with impacted brokers.

Our focus has now shifted to the go-live deployment planning and activities. We have scheduled a member communication session for 10 March 2021 from 10h00 to 11h00.

In this session the JSE will provide following information:

- Feedback on UAT testing
- Go-live planned activities over the week-end which will include:
 - o ICB deployment
 - o Mainframe activities (JSE activities)
 - o Member involvement over go-live week-end

Again we want to express our sincere thanks to all members who participated on the DR's, especially those members who assisted the JSE on all the non- mandatory dress rehearsal. We really appreciate your support.
