## 2 DISCLAIMER

This document is strictly for informational purposes solely for developing or operating systems for your use that interact with the market data systems of the JSE. The JSE reserves the right to withdraw, modify, or replace the specification (or any part thereof) at any time by means of a notice to contracted clients.

To the extent allowed by law, JSE does not (expressly, tacitly or impliedly) guarantee or warrant the availability, sequence, accuracy, completeness, reliability or any other aspect of any of the information contained in, linked to or distributed through these specifications, or that the information contained therein are up to date. Prospective subscribers that are interested in subscribing to either the daily or monthly data products must contact the Market Data Department in writing via [MDSalesTeam@jse.co.za](mailto:MDSalesTeam@jse.co.za).

## 2.1 FTP SITE AND FOLDERS

The files are made available via the Information Delivery Portal (IDP), which is the JSE's primary client facing FTP server. IDP is access controlled so access requires an approved IDP user ID and password.

Access to IDP is facilitated via different protocols. Refer to the Information Delivery Portal Connectivity document for access and other pertinent information:

<https://www.jse.co.za/services/market-data/technical-documents>

## 2.2 USER ID AND PASSWORD

1. If you are a new IDP user, a representative from the JSE Market Data Sales Support team will provide you with your User ID and password.
2. On request, and if reasonable, more than one User ID will be provided to address primary and backup needs.
3. Depending on the nature of the use, we will provide a User ID suitable for manual human based access and/or a User ID suitable for automated system-based access. A human based User ID caters for manual access and is typically used as a backup to a system based access. The password for human based User IDs expire once a month and system based User IDs expire once a year.
4. An Account Manager from the Market Data Sales team will contact you to confirm receipt of the data file(s), User ID and Password.
5. The onus is on you to test as soon as you have received the above-mentioned information to ensure that you can successfully access the IDP server.

Should you experience any problems relating to the information communicated to you or the actual testing using the provided information, please contact the under-mentioned teams for assistance:

### 3 PRODUCT FAMILY

This document contains the product specifications for the following products that make up the family of Bonds Reference data products.

1. **Bonds Instrument Reference** - provides key reference data of all Debt Securities instruments that are listed instruments in the Bond Market.
2. **New Bonds Listing** - provides key reference data of all Debt Securities instruments that are in the process of being listed on the JSE Bond market but are not yet listed. Once the security is listed, its reference data will only be made available via the Bond Instrument Reference data product.
3. **Bonds Corporate Actions Events Schedule** - provides key upcoming corporate actions event data of all listed Debt Securities instruments.
4. **Bonds Coupon Rate Update** - product provides key upcoming Rate changes that affect all Debt Securities instruments listed in the Bond Market.

## 4 BONDS INSTRUMENT REFERENCE

The Bonds Instrument Reference data product provides key reference data of all *listed* instruments in the Bond Market. The bonds listed in this report are the primary driver in the SA Capital Market.

Because of the nature of the data, where some of the data has a one-to-many relationship, this data product comprises of a primary general section that contains common data and several secondary data sections where each section provides a complementary but distinct different set of related data.

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats. The Excel format version presents the data sections as Excel sheets while the CSV format version presents each data section as a separate data file.

The product is available at the end of each business day for daily data subscribers, with a copy of the daily product is made available at the end of the last business day of the month for monthly data subscribers. The SLA time for this data product is **16h20**.

To cater for historical retrieval, the daily and monthly data files for the last rolling 40 business days will be available on the IDP server with the historical data files suffixed with “\_yyymmdd”.

#### 4.14 BONDS INSTRUMENT REFERENCE MIXED RATE

An Instrument can be issued as a Mixed Rate Note; meaning that for the first defined period the debt instrument pays a specific type of coupon and then for the next defined period changes to another type of coupon payment. These different periods are referred to as legs. The number of legs for Mixed Rate Notes are typically two legs but could increase over time.

Refer to the Coupon General Section for the meaning of the fields.

## 5 NEW BONDS LISTING

The New Bonds Listing data product provides key reference data of all Debt Securities instruments that are in the process of *being listed on the JSE Bond market but are not yet "listed"*. Once the security is "listed", its reference data is made available via the Bond Instrument Reference data product.

Because of the nature of the data, where some of the data has a one-to-many relationship, this data product comprises of a primary general section that contains common data and several secondary data sections where each section provides a complementary but distinct different **set of related data**. **The structure of this product is an exact match of the Bond Instrument Reference data product.**

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats. The Excel format version presents the data sections as Excel sheets while the CSV format version presents each data section as a separate data file.

Due to the dynamic nature of Bonds, a set of the daily files is made available three times each business day with the new version completely replacing the old version each time so does not contain delta changes. The SLA time for the different publication time is **10h40**, **14h50** and **16h20** but the JSE will always endeavour to make the files as early as possible after they are produced.

To cater for historical retrieval, the last version will be available on the IDP server for the last rolling 40 business days, with the historical data files suffixed with "\_yyyymmdd".

### 5.13 NEW BONDS LISTING MIXED RATE

An Instrument can be issued as a Mixed Rate Note; meaning that for the first defined period the debt instrument pays a specific type of coupon and then for the next defined period changes to another type of coupon payment. These different periods are referred to as legs. The number of legs for Mixed Rate Notes are typically two legs but could increase over time.

Refer to the Coupon General Section for the meaning of the fields.

## 6 BONDS CORPORATE ACTIONS EVENTS SCHEDULE

The Bonds Corporate Actions Events Schedule data product provides key upcoming corporate actions event data of all *listed* instruments in the Bond Market.

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats. In addition, the data that relates to general reference data updates, one of the very dynamic Corporate Actions event types, is made available as a separate CSV file in addition to being included in the main data product.

Due to the dynamic nature of the data, a set of the daily files is made available three times each business day with the new version completely replacing the old version each time so does not contain delta changes. The SLA time for the different publication time is **10h40**, **14h50** and **17h00** but the JSE will always endeavour to make the files as early as possible after they are produced.

To cater for historical retrieval, the last version will be available on the IDP server for the last rolling 40 business days, with the historical data files suffixed with “\_yyymmdd”.

**Note that while there are common fields that will always have values, the specific type of Corporate Event will dictate which fields have values versus not in each row.**

To cater for historical retrieval, the daily and monthly data files for the last rolling 40 business days will be available on the IDP server with the historical data files suffixed with “\_yyymmdd”.

## 7 BONDS CORPORATE RATE UPDATE

The Bonds Corporate Rate Update data product provides key upcoming Rate changes that affect *listed* instruments in the Bond Market.

For the benefit of both human and system-based consumption, the data product is available in both CSV and Excel formats.

The daily files are made available two times each business day with the new version completely replacing the old version each time so the new version does not contain delta changes. The SLA time for the different publication time is **10h40, 14h50** but the JSE will always endeavour to make the files as early as possible after they are produced

To cater for historical retrieval, the daily and monthly data files for the last rolling 40 business days will be available on the IDP server with the historical data files suffixed with “\_yyymmdd”.
