REPLACEMENT OF JSE MARKET DATA PORTAL (MDP) USE FOR REPORTING TO JSE

Thank you to all clients that attended the third (and final) information session held on 9 March 2021. For the benefit of all clients please find attached the presentation used in the information session.

The first phase of the project, unless we indicate otherwise, is planned to go live on Thursday, 1 April 2021. We will provide a final go-live confirmation later in the month.

Phase 1 impact clients that have the below reporting obligations and make use of the JSE Market Data Portal (MDP) to report to the JSE. The MDP portal will be replaced by the JSE Market Data Connect, the new JSE market data client portal.

- Report data usage numbers on a monthly basis
- Report indices tracking numbers on a quarterly basis
- Maintain Indices VCT approved end user numbers

Training/ Testing of the new client portal

If your company falls in one of these three above categories, it is absolutely crucial that all your designated reporters, or as a minimum your primary and backup reporting person, are familiar with the new portal before go-live.

The JSE has made a demo (Sandbox) environment available since mid-December for the benefit of affected clients. The Sandbox provides a near production experience but is a test environment so clients can do as much testing as is required.

All reporters need to log on to the Sandbox using current email addresses and complete training/testing, right up to the point of submitting test numbers. We are tracking who has registered and submitted test numbers and will be phoning clients that are not yet participating.

The presentation provides the link to the Sandbox as well as the link to the production solution that will be applicable after go-live.

If you have any questions or issues, please send an email to mdsupport@jse.co.za or raise it via your Account Manager.
