SERVICE HOTLINE

REFERENCE NUMBER: 073/2022

2 June 2022

UPDATE - VERSION 7.4 TRADING AND INFORMATION SYSTEM RELEASE

With reference to [JSE Service Hotline 065/2022](#), the Matched Principal (MP) trade type has been approved and is effective in Production from the start of the trade reporting session on 2 June 2022.

Also, the release of version 7.4 into production has been moved to the contingency date of 16 July 2022 and will be effective **18 July 2022** in the Production System.

Updated versions of the release documentation and the relevant Trading API specifications are available under this "Next Functional Release" section. The release documentation has been simplified to include only version 7.4 details. Documentation relating to version 7.5 will be provided in due course.

The CTS Release (2A) environment will be updated with the Basic Native Gateway protocol default of '2' effective 8 June 2022 in anticipation of the 1 July 2022 cut-off as per the release 7.4 documentation. This will allow the default login to reference version '2' of the protocol.

The SENS News messages has also been corrected to publish the full NewsML text in CTS Release and has the identical News announcements as in the CTS Prod environment for ease of comparison.

All SENS subscribers are therefore requested to conduct testing of the corrected SENS service in the CTS Release (2A) environment by no later than the end of June. This testing is to ensure that the service remains backward compatible to you as expected with this release and does not negatively impact you.

For more details pertaining to the release, please refer to the JSE Trading Release Document available on the JSE website under "Next Functional Release" using the following link:
