JSE RELEASE 7.7 – MIT UPGRADE UPDATED API SPECIFICATIONS

This Service Hotline refers to [Service Hotline 080/2024](#) and [Service Hotline 047/2024](#) that were previously published and provides an update on Release 7.7 (MIT Upgrade 2024) which impacts the Equity and Currency Derivatives Markets.

Clients are advised that JSE User Specifications previously published have been updated. The updated specifications are:

- Volume 00E – Trading and Information Overview for Equity Market v407
- Volume 09 – JSE Reference Data Management v2.05

Additionally, a guideline document on Self-Match Prevention functionality has been published:

- Self-Match Prevention – Guideline Document 2024

Volume 09 introduces the JSE regulatory change of Segmented Boards into the InstrumentsEquity.csv reference data file. There is no length change to the file as a reserved field is being utilised for the change.

Clients are reminded that this release is currently available for testing in the JSE test environment, CTS Release. The go-live date has been set to 14 October 2024.

The summary of the release can be found on the JSE Client Portal under the Technical Library as well as the updated APIs [here](#)
