CHANGES TO ACCESS THE JSE TEST IDP AND BONDFTP FTP SERVERS

We announced in August 2022 via [Service Hotline 115/2022](#) the introduction of test IDP and BondFTP servers to assist your future development testing. The introduction was coupled with an upgrade to the Transport Layer Security (TLS) protocol for enhanced encryption.

A governance review of the server access has however necessitated changes to the way that the test IDP and BondFTP servers can be accessed. The changes are as follows with the details in the attached updated IDP Connectivity document with tracked changes.

1. Removal of FTP and FTPS access via Client Access Network (dedicated Leased Lines) to servers
2. Removal of HTTPS access to servers
3. Update of FTP access address to BondFTP server

If you have any queries about this announcement, please contact the JSE via the contacts details provided.
