Dear Client,

The JSE is proud to introduce a new Standard Bank Actively Managed Certificate

The Standard Bank AMC linked to the High Street Wealth Warriors High Equity Portfolio (AMC007) comprises constituents of the iShares MSCI World Index ETF. The iShares MSCI World Index ETF seeks to track the investment results of an underlying index, the MSCI World Index composed of developed market equities. The underlying index is designed to measure the performance of equity securities in the top 85% of equity market capitalisation, as calculated by the index provider, in certain developed market countries.

The underlying index may include large-, mid- or small capitalisation companies. Constituents of the underlying index primarily include financials, healthcare, and information technology companies. The constituents of the underlying index, and the degree to which these components represent certain industries, are likely to change over time, comprising developed market equity securities.
