Co-location Offering Update

The JSE would like to implement co-location in the JSE's existing Primary Data Centre, for a go-live in Q1 2014, subject to the JSE:

- 1) completing a detailed design to firm up existing cost estimates
- 2) receiving written commitment from clients for a minimum number of racks
- 3) receiving final Board approval on a go/no-go decision taking into consideration items 1 and 2 above

When consulting clients on the possibilities of co-location sites, a strong preference for the JSE to provide the service out of the existing JSE site was indicated. This is a key factor in the decision to provision co-location in the existing JSE Primary Data Centre but does mean there are power capacity constraints. The JSE will only be able to provision a maximum of 140 racks and the intention is to commission a first area of 70 racks but only if contracts with clients for **70 racks** are secured and final board approval is granted.

As a result of the limited rack capacity, the cost per rack will be R51 000 per month (ex VAT) and there will be a power cap of 3.3kVA. The JSE has previously indicated in the communication session held on 2 November 2012, a price range of R45 000 to R55 000 per rack.

Please contact the Equity Market Development team on 011 520 7228/7934 or embd@jse.co.za for any further details on the co-location offering or to engage in the contractual process.
