Corporate Bonds – Electronic Trading Platform (Proposal)

In an attempt to enhance the liquidity, transparency and functioning of the South African corporate bond market the JSE has been in discussion with various stakeholders around the implementation of new processes, technology and guidelines for the corporate bond market.

On the back of these conversations we have put together a working document for discussion with the market.

Please review and return any comments/questions to us by 31 October 2013

We will continue to have discussions with market participants and set up a committee to deal with the changes and make any necessary adjustments to the attached document.
