Additional Risk Factors relating to Notes issued as Green Bonds

In addition to the risk factors set out in or incorporated by reference into the Programme Memorandum, the attention of investors contemplating investing in the Notes is drawn to the following additional risks relating to Notes issued as Green Bonds

The Applicable Pricing Supplement relating to a specific Tranche of Notes may provide that it will be the Issuer's intention to apply the proceeds from an offer of those Notes specifically for eligible Green Projects. In this case the Applicable Pricing Supplement may provide additional information in relation to the intended use of proceeds in respect of the Notes. This information may be provided by cross referencing to the Framework.

Prospective investors should determine for themselves the relevance of such information for the purpose of any investment in such Notes together with any other inquiry as the investor deems necessary. In particular, no assurance is given by the Issuer that the use of such proceeds for any Green Projects, will satisfy, whether in whole or in part, any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates, in particular with regard to any direct or indirect environmental, social or sustainability impact of any projects or uses, the subject of or related to any Green Projects, as applicable.

The Framework has been aligned to international best practice and guidance as issued by ICMA and unless otherwise indicated, terms used in the Framework have the meanings given to them by the GBP. The principles and guidelines of the GBP are widely accepted by issuers and investors and provide a credible framework for green bond issuances. Despite this and although the publication by ICMA of the GBP and their predecessors has resulted in greater standardisation, it should be noted that there is currently no clearly defined definition (legal, regulatory or otherwise) of or market consensus, as to what constitutes a "green" or equivalently labelled project or as to what particular attributes are required for a particular project to be

defined as “green” or such other equivalent label, nor can any assurance be given that such a clear definition or consensus will develop over time. Accordingly, no assurance is or can be given to investors that any projects or uses, the subject of, or related to any Green Projects will meet any or all investor expectations regarding such green or other equivalently-labelled performance objectives or that any adverse environmental and or other impacts will not occur during the implementation of any projects or uses, the subject of, or related to, any Green Projects.

No assurance or representation is given as to the suitability or reliability for any purpose whatsoever of any opinion, certification of any third party (whether or not requested by the Issuer) which may be made available in connection with the issue of any Notes and in particular with any Green Projects to fulfil any environmental and/or other criteria. Any such opinion or certification is not nor should be deemed to be a recommendation by the Issuer or any other person to buy sell or hold any such Notes. Any such opinion or certification is only current as of the date the opinion was initially issued. Prospective investors must determine for themselves the relevance of any such opinion or certification and or the information contained therein and/or the provider of such opinion or certification for the purpose of any investment in such Notes. Currently, the provider of such opinions and certifications are not subject to any specific regulatory or other regime or oversight, provided that the JSE Debt and Specialist Securities Listings Requirements do require independent External Reviewers to be appointed with reference to the Guidelines on External Reviews.

In the event that any such Notes are listed or admitted to trading on any dedicated “green or other equivalently labelled segment of any stock exchange or securities market (whether or not regulated) no representation or assurance is given by the Issuer or any other person that such listing or admission satisfies, whether in whole or in part, any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates, in particular with regard to any direct or indirect environmental impact of any projects or uses, the subject of or related to Green Projects.

Furthermore, it should be noted that the criteria for any such listing or admission to trading may vary from one stock exchange or securities market to another. Nor is any representation or assurance given or made by the Issuer or any other person that any such listing or admission to trading will be obtained in respect of any such Notes or, if obtained, that any such listing or admission to trading will be maintained (or maintained on a dedicated “green” or other equivalently labelled segment of any stock exchange or securities market) during the life of the Notes.

While it is the intention of the Issuer to apply the proceeds of the Notes so specified for eligible Green Projects, in or substantially in the manner described in the relevant Applicable Pricing Supplement, there can be no assurance that the relevant projects or uses the subject of or related to any Green Projects, will be capable of being implemented in or substantially in such manner and/or in accordance with any timing schedule and that accordingly such proceeds will be totally or partially disbursed for such Green projects,. Nor can there be any assurance that such Green Projects will be completed within any specified period or at all with the results or outcome (whether or not related to the environment) as originally or anticipated by the Issuer. Any such event or failure by the Issuer will not constitute an Event of Default under the Notes .

Any such event or failure to apply the proceeds of any issue of Notes for any Green Projects or any withdrawal of any such opinion or certification or any such opinion or certification attesting that the Issue is not complying in whole or in part with any matters on which such opinion or certification is opining or certifying or any Notes no longer being listed or admitted to trading on any stock exchange or securities market, may have a material adverse effect on the value of such Notes and also potentially on the value of

any other Notes which are intended to finance Green Projects and/or result in adverse consequences for certain investors with portfolio mandates to invest in securities to be used for a particular purpose.

Prospective investors should refer to the Framework for further information.

In respect of any Notes issued as Green Bonds there can be no assurance that the use of proceeds will be suitable for the investment criteria of an investor.
