| 85. | Other provisions | Applicable |

85.1 Final Redemption Amount

For the purposes of Condition 7.1 (Scheduled Redemption), unless the Notes have previously been redeemed or purchased and cancelled in accordance with the Conditions and subject as provided in the FX Linked Note Conditions, the Final Redemption Amount in respect of each principal amount of Notes equal to the Calculation Amount shall be an amount in ZAR rounded down to the nearest ZAR 0.01 (with ZAR 0.005 being rounded upwards) calculated by the Calculation Agent equal to such Note's pro rata share of the Face Realisation Amount, converted into ZAR at the Settlement Price on the relevant Settlement Price Date.

85.2 Calculation Agent

The determination by the Calculation Agent of any amount or of any state of affairs, circumstance, event or other matter, or the formation of any opinion or the exercise of any discretion required or permitted to be determined, formed or exercised by the Calculation Agent pursuant to the Notes shall (in the absence of manifest error) be final and binding on the Issuer and the Noteholders. Whenever the Calculation Agent is required to make any determination it may, inter alia, decide issues of construction and legal interpretation. In performing its duties pursuant to the Notes, the Calculation Agent shall act in good faith and in a commercially reasonable manner. Any delay, deferral or forbearance by the Calculation Agent in the performance or exercise of any of its obligations or its discretion under the Notes including, without limitation, the giving of any notice by it to any person, shall not affect the validity or binding nature of any later performance or exercise of such obligation or discretion, and neither the Calculation Agent nor the Issuer shall, in the absence of wilful misconduct and gross negligence, bear any liability in respect of, or consequent upon, any such delay, deferral or forbearance.

85.3 Redemption on Redemption of the Holding

Notwithstanding anything to the contrary in the Conditions and subject as provided in the FX Linked Note Conditions, if in the determination of the Calculation Agent the Holding is early redeemed in full for any reason (including, without limitation, by way of mandatory or voluntary repayment or redemption) at any time prior to the Maturity Date and no Credit Event has occurred, the Issuer shall forthwith give notice to Noteholders in accordance with Condition 16 (Notices) and redeem all but not some only of the Notes, each principal amount of Notes equal to the Specified Denomination being redeemed by the Issuer by payment of an amount in ZAR rounded down to the

nearest ZAR 0.01 (with ZAR 0.005 being rounded upwards) calculated by the Calculation Agent equal to such Note's pro rata share of the Holding Redemption Amount on the second Business Day immediately succeeding the Holding Redemption Date (the "**Early Redemption Amount on Redemption of the Holding**").

85.4 Additional Risk Factors

All amounts payable and/or deliverable under these Notes are determined with reference to the Reference Currency Notional Amount, which is an amount denominated in the Reference Currency. The Aggregate Nominal Amount under this Pricing Supplement is the ZAR equivalent of the Reference Currency Notional Amount on Trade Date. The Reference Currency Final Redemption Amount, any Early Redemption Amount, will be determined with reference to the Reference Currency Notional Amount and for the purposes of determining any of these amounts, any amount denominated in the Reference Currency will be converted into the Settlement Currency at the then prevailing exchange rate between such currencies, as determined by the Calculation Agent in accordance with the terms and conditions of these Notes.

As such, Noteholders may be exposed not only to credit risk of the Issuer, but also to the performance of the Reference Currency relative to the Settlement Currency, which cannot be predicted. Noteholders should be aware that foreign exchange rates are, and have been, highly volatile and determined by supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks (e.g., imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates and the availability of a specified currency).
