Any determination of a Disrupted Day, Market Disruption Event or valuation adjustment in respect of the Index shall be made in accordance with the Equity Terms, as supplemented to reflect the Multiple Exchange Index nature of the Index.</p> <p>In making such determination, the Issuer shall not be required to apply a methodology that would produce a result materially inconsistent with the economic outcome of the Issuer's hedge.</p>
(g) Other provisions:	<p>By acquiring the Notes, the Noteholders acknowledges that the Issuer may have hedged its obligations under the Notes with a third person ("Hedge Provider") and any transactions or positions in connection with such hedging are regarded as the Issuer's hedge positions ("Hedge Positions") for purpose of the Notes. In respect of the Issuer's Hedge Positions any of the following events specified below may happen and may therefore affect the Issuer's ability to fulfil its obligations under the Notes in accordance with the terms or on the dates and at the times specified in the Programme Memorandum and this Pricing Supplement. The Issuer will under such circumstances fulfil its obligations in line with the performance of the Hedge Provider under the Hedge Positions.</p> <p>(A) Successor Index</p> <p>If the Index is (a) not calculated and announced by the Index Sponsor but is calculated and announced by a successor sponsor (the Successor Index Sponsor) acceptable to the Calculation Agent, or (b) replaced by a successor index using, in the determination of the Calculation Agent, the same or a substantially similar formula for and method of calculation as used in the calculation of the Index, then in each case that index (the Successor Index) will be deemed to be the Index.</p> <p>(B) Index Adjustment:</p> <p>If (1) on or prior to an Averaging Date, an Observation Date, a Valuation Date or any other date for Index valuation or observation, as the case may be,</p>

the relevant Index Sponsor announces that it will make a material change in the formula for or the method of calculating the Index or in any other way materially modifies the Index (other than a modification prescribed in that formula or method to maintain the Index in the event of changes in Components and capitalisation and other routine events) (an “Index Modification”) or permanently cancels the Index and no Successor Index exists (an “Index Cancellation”) or (2) on an Averaging Date, an Observation Date or a Valuation Date or any other date for Index valuation or observation, as the case may be, the Index Sponsor or, if applicable, the Successor Index Sponsor fails to calculate and announce or publish the Value of the Index or a withholding tax is imposed in respect of the Index (an “Index Disruption” and together with an “Index Modification” and an “Index Cancellation”, each an Index Adjustment Event), then the Issuer may take such action as it determines appropriate from the following (which, if the Issuer has Hedge Position(s) at the relevant time, will reflect such Hedge Position(s) as applicable): (A) the Issuer may determine if the relevant Index Adjustment Event has or may have a material effect on the Equity Index Linked Notes and, if so, the Issuer will calculate the relevant level of the Index using, in lieu of a published level for the Index, the level for the Index as at the relevant date for valuation or observation as determined by the Issuer in accordance with the formula for and method of calculating the Index last in effect prior to the change, failure or cancellation, but using only those Components comprising the Index immediately prior to the relevant Index Adjustment Event, or (B) the Issuer may give notice to the Noteholders in accordance with General Condition 16 (*Notices*) and redeem the Notes on the date specified therein, in which event the Issuer will redeem the Notes and cause to be paid to each Noteholder in respect of each Note the Early Redemption Amount adjusted to account for all costs incurred by the Issuer in connection with such early redemption including, without limitation, any costs to the Issuer associated with unwinding any funding relating to the Notes, any costs associated with unwinding any Hedge Position(s) and all other expenses related thereto, as determined by the Calculation Agent, or (C) the Issuer may determine that the Equity Index Linked Notes will continue on the terms and subject to the conditions, formulas and calculation methods in effect as of any relevant time at which calculations may be made by the hedge counterparty of the Issuer or by the Issuer, acting at all times in a commercially reasonable manner.

(C) Market Disruption Event:

	<p>If:</p> <p>(i) in respect of a component security of the Index (each a “Component Security”)</p> <p>(a) (1) a Trading Disruption, which the Calculation Agent determines is material, at any time during the one-hour period that ends at the relevant valuation time in respect of the exchange on which such Component Security is principally traded.</p> <p>(2) an Exchange Disruption, which the Calculation Agent determines is material, at any time during the one-hour period that ends at the relevant valuation time in respect of the exchange on which such Component Security is principally traded, or</p> <p>(3) an Early Closure occurs or exists, and</p> <p>(b) the aggregate of all Component Securities in respect of which a Trading Disruption, an Exchange Disruption or an Early Closure occurs or exists comprises 20 per cent. or more of the level of the Index,</p> <p>or</p> <p>(ii) in respect of futures or options contracts relating to the Index</p> <p>(a) (1) a Trading Disruption, which the Calculation Agent determines is material.</p> <p>(2) an Exchange Disruption, which the Calculation Agent determines is material, or</p> <p>(3) an Early Closure occurs or exists,</p> <p>then a “Market Disruption Event” will have occurred.</p> <p>If a Market Disruption Event has occurred or exists on any valuation date or on the Final Index Level Determination Date then such valuation date or the Final Index Level Determination Date will be the first succeeding scheduled trading day that is not a Disrupted Day, unless each of the eight scheduled trading days immediately following such valuation date or the Final Index Level Determination Date is a Disrupted Day. In that case, that eighth scheduled trading day will be deemed to be the relevant valuation date or the Final Index Level Determination Date, notwithstanding the fact that such day is a Disrupted Day, and the Calculation Agent will determine the level of the Index as of the</p>
--	---

valuation time on that eighth scheduled trading day in accordance with the formula for and method of calculating the Index last in effect prior to the occurrence of the first Disrupted Day using the exchange traded or quoted price as of the valuation time on that eighth scheduled trading day of each Component Security contained in the Index (or, if an event giving rise to a Disrupted Day has occurred in respect of the relevant security on that eighth Scheduled Trading Day, its good faith estimate of the value for the relevant security as of the valuation time on that eighth scheduled trading day). In respect of Notes of which the Final Index Level Determination Date is subject to a Market Disruption Event as contemplated above, the final redemption of the Notes will be postponed until the earlier of the payment date following the date on which Calculation Agent has determined the level of the Index or the date on which the Hedge Provider has determined the level of the Index relating to the Issuer's Hedge Positions. In determining the Final Redemption Amount under these circumstances, the Issuer may take any funding interest that it may incur pending the settlement of its Hedge Positions by its Hedge Provider in consideration and reduce the Final Redemption Amount accordingly.

For the purposes of determining whether a Market Disruption Event exists in respect of the Index at any time, if a Market Disruption Event occurs in respect of a Component Security at that time, then the relevant percentage contribution of that Component Security to the level of the Index shall be based on a comparison of (x) the portion of the level of the Index attributable to that Component Security to (y) the overall level of the Index, in each case using the official opening weightings as published by the Index Sponsor as part of the market "opening data".

For purposes of the above:

“Trading Disruption” means any suspension of or limitation imposed on trading by the relevant exchange or related exchange or otherwise and whether by reason of movements in price exceeding limits permitted by the relevant exchange or related exchange or otherwise: (i) relating to any Component Security on the exchange in respect of such Component Security, or (ii) in futures or options contracts relating to the Index on the related exchange.

“Exchange Disruption” means any event (other than an Early Closure) that disrupts or impairs (as determined by the Calculation Agent) the ability of market participants in general to effect transactions in or obtain market values for: (i) any Component Security on the exchange in respect of such

Component Security, or (ii) futures or options contracts relating to the Index on the related exchange.

“Early Closure” means the closure on any exchange business day of the exchange in respect of any Component Security or the related exchange prior to its scheduled closing time unless such earlier closing is announced by such exchange or related exchange (as the case may be) at least one hour prior to the earlier of: (i) the actual closing time for the regular trading session on such exchange or related exchange (as the case may be) on such exchange business day, and (ii) the submission deadline for orders to be entered into the exchange or related exchange system for execution at the relevant valuation time on such exchange business day.

“Disrupted Day” means any scheduled trading day on which: (i) the Index Sponsor fails to publish the level of the Index, (ii) the related exchange fails to open for trading during its regular trading session, or (iii) a Market Disruption Event has occurred.

Any Noteholder who wants to redeem Notes early must be aware that the amount paid to acquire the Notes will not be protected in these circumstances and the Noteholder may receive substantially less than the amount initially paid to acquire the Notes. Although a daily value is published by the Financial Exchange, that value is determined in respect of Notes that will be held to the Maturity Date (and is not applicable in respect of the early redemption of Notes as contemplated in this paragraph). The daily value of the Notes published by the Financial Exchange can under no circumstances be used as a guideline for what the Noteholder will receive upon early redemption of the Notes in terms of this paragraph. At all times a Noteholder must first contact the Issuer as market maker to obtain the actual MTM valuation (less a spread of 1%) to determine the price at which the Issuer will be willing to redeem the relevant Notes prior to the Maturity Date. As the Noteholder had from the Issue Date the intention to acquire participatory interests of the Invest Top40 ETF and therefore the intention that the Notes will be physically settled, the Issuer will on the early redemption date determine the number</p>

	of ETF participatory interests which will be in value equal to the price at which the Issuer is willing to redeem the relevant Notes of the Noteholder and will arrange for the physical delivery of these ETF participatory interests in the securities account of the Noteholder by no later than the fourth Financial Exchange Business Day following the early redemption date.
