ZAR35,000,000,000 Credit-Linked Note Programme

Issue of ZAR100,000,000 (one hundred million Rand) Senior Unsecured iTraxx Xover Series 45 Floating Rate Notes due 20 July 2031

This document constitutes the Applicable Pricing Supplement relating to the issue of the Note described herein. Terms used herein shall be deemed to be defined as such for the purposes of the terms and conditions (the “**Terms and Conditions**”) set forth in the Investec Bank Limited ZAR35,000,000,000 Programme Memorandum dated 17 March 2021 (the “**Programme Memorandum**”), as updated and amended from time to time. This Applicable Pricing Supplement must be read in conjunction with the Programme Memorandum. The Note described herein are issued on and subject to the Terms and Conditions as amended and/or supplemented by the terms and conditions contained in this Applicable Pricing Supplement. To the extent that there is any conflict or inconsistency between the contents of this Applicable Pricing Supplement and the Programme Memorandum, the provisions of this Applicable Pricing Supplement shall prevail. Any capitalised terms not defined in this Applicable Pricing Supplement shall have the meaning ascribed to them in the Terms and Conditions. To the extent that certain provisions of the *pro forma* Pricing Supplement do not apply to the Note described herein, they may be deleted in this Applicable Pricing Supplement or indicated to be not applicable.

This Note is made up of a number of portions (each referred to as a “**Portion**”) each subject to the terms and conditions as set out in this Applicable Pricing Supplement as read with the Programme Memorandum. Each Portion of the Note is linked to the Reference Entities in the iTraxx Xover Series 45 set out in Appendix B attached hereto (the “**Index**”).

Upon the occurrence of a Credit Event Determination Date in relation to any Reference Entity included in the Index (other than a Credit Event Determination Date at the Detachment Point as defined below), this Note will not be redeemed but the Calculation Amount, for the determination of the applicable redemption amount and interest payment on the Note, will be adjusted as set out in this Applicable Pricing Supplement.

25. Business Days	None Specified. Determined in accordance with the definition of Business Day in Condition 1.1. (<i>General definitions</i>) of the Terms and Conditions
26. Additional Business Centre	N/A
27. Principal Amount	ZAR1,000,000 per Note on the Issue Date
28. Specified Denomination	ZAR1,000,000 per Note
29. Calculation Amount	Means, subject to the occurrence of one or more Credit Event Determination Date(s) in respect of any of the Reference Entities, the Calculation Amount determined by the Calculation Agent as follows:

The Principal Amount multiplied by the applicable percentage of the Principal Amount set out in the table below (**Calculation Amount Percentage**), with the Calculation Amount Percentage being determined with reference to the number of Reference Entities from the Index in respect of which a Credit Event Determination Date has occurred as at that date, namely:

Number of Reference Entities in respect of which a Credit Event Determination Date has occurred	Calculation Amount Percentage
1	100%
2	100%
3 (Attachment Point)	90%
4	80%
5	70%

42. Books Closed Periods	Not applicable
43. Last Day to Register	The Last Day to Register will be 19 April, 19 July, 19 October and 19 January in each year, except that there will not be a Last Day to Register on 19 July 2026. If any such day is not a Business Day, the Last Day to Register will be 1 (one) Business Day before each Interest Payment Date up to the applicable Redemption Date.
FIXED RATE NOTES	N/A
FLOATING RATE NOTE	Applicable
44. Payment of Interest Amount	
(a) Interest Rate(s)	Reference Rate plus the applicable Margin
(b) Interest Period(s)	Each period commencing on (and including) an Interest Payment Date and ending on (but excluding) the following Interest Payment Date; provided that the first Interest Period will commence on and include the Issue Date and end on but exclude the Interest Payment Date of 20 October 2026, until but excluding the Applicable Redemption Date (each Interest Payment Date as adjusted in accordance with the applicable Business Day Convention)
(c) Interest Payment Date(s)	20 April, 20 July, 20 October and 20 January of each year until the applicable Redemption Date, provided that 20 July 2026 will not be an Interest Payment Date and the first Interest Payment Date will be 20 October 2026, or, if such day is not a Business Day, the Business Day on which interest will be paid, will be as determined in accordance with the applicable Business Day Convention (as specified in this Applicable Pricing Supplement)..
(d) Interest Rate Determination Date(s)	In accordance with item 44(o) below.
(e) Specified Period	Applicable for the period from (and including) the Issue Date until (and excluding) the applicable Redemption Date
(f) Any other terms relating to the particular method of calculating Interest	<p>The interest amount payable in respect of the Note on each Interest Payment Date will be determined in accordance with the following formula:</p> $A = [(B \times C) \times (D \div 365) \times E]$ <p>Where:</p> <p>A = the interest amount payable on an Interest Payment Date;</p> <p>B = the Principal Amount of the Note;</p>

C = the applicable Calculation Amount Percentage based on the number of Reference Entities in respect of which a Credit Event Determination Date has occurred as at the Interest Payment Date (as set out in item 29);

D = the number of days in the Interest Period; and

E = the Interest Rate (as applicable at the time),

provided that:

- (i) should the number of Reference Entities in respect of which a Credit Event Determination Date has occurred change during an Interest Period, then the Calculation Agent will apply the above formula to determine the interest amount per Note for that Interest Period based on the applicable Calculation Amount Percentage for the portion of the applicable Interest Period up to but excluding the date of the change in the number of Reference Entities, as well as a calculation based on the applicable Calculation Amount Percentage from and including the date of any change in the number of Reference Entities in respect of which a Credit Event Determination Date has occurred and the interest amount for the applicable Interest Period will be the sum of all such calculations;
- (ii) no interest will be payable on the Note when the Detachment Point has been reached.

Investec authority to use the Index: Yes

Description and Compilation:

CDS Indices are over-the-counter (OTC) products and can be traded with licensed participants providing liquidity. A CDS index is an index whose underlying reference obligations are credit default swap instruments. The names in the index are selected based on their |

liquidity, respective business sectors, and geographical location, and depend on the rules governing the index. Tradable CDS indices allow investors to take a view on certain portions of the credit markets. Standardized CDS indices are created and administered by S&P Dow Jones Indices and include the CDX and iTraxx indices. CDS indices are among the most liquid instruments in the credit markets, enabling investors to efficiently access key market segments at low cost.

A list of licensed participants providing liquidity for the European and Asian indices is available on:

<http://www.ihsmarkit.com/Documentation/Product/iTraxx>

Establishment:

In 2004, TRAC-X and iBoxx CDS indices merged to form the CDX indices in North America and the iTraxx indices in Europe and Asia. After being the administrator for CDX and calculation agent for iTraxx, Markit acquired both families of indices in November 2007, and owned the iTraxx and CDX indices, along with iTraxx SovX, and MCDX Indices for derivatives, and the iBoxx indices for cash bonds. Markit subsequently merged with IHS to become IHS Markit in July 2016, which in turn merged with S&P Global in March 2022. The iTraxx and CDX indices are now part of S&P Global's index offerings under S&P Dow Jones Indices.

Review frequency:

Indices roll every six months in March and September. At each roll, a new series of the CDS index is created with updated constituents. Though previous series continue trading, liquidity tends to concentrate in the most recent on-the-run series. Further, liquidity is greatest in the 5-year tenor contract. For example, iTraxx Crossover Series 43 will begin trading on March 20, 2025. Then, most investors looking to maintain their credit exposure with the CDS indices will roll their position into the new series. The fixed tenors of the CDS indices enable investors to extend the duration of their position at each index roll, thereby maintaining consistent duration.

Modifications and Discontinuation:

Following a Credit Event Determination Date in a constituent of the CDS index, a new version of the index is published which assigns a zero percent weight on the relevant entity. The notional amount on the index trade is reduced by the weight of the name in the index.

ANNEX C

SCREEN RATE DETERMINATION FOR FLOATING RATE NOTES REFERENCING COMPOUNDED DAILY ZARONIA (LOOKBACK WITHOUT OBSERVATION SHIFT)

1. The Interest Rate payable from time to time in respect of the Notes for each Interest Period will, subject as provided below, be Compounded Daily ZARONIA (as defined below) for the relevant Interest Period plus the Margin (as specified in the Applicable Pricing Supplement), all as determined by the Calculation Agent in accordance with the provisions below, where:

“**Compounded Daily ZARONIA**” means, with respect to an Interest Period, the rate of return of a daily compound interest investment in ZAR (with daily ZAR overnight reference rate as reference rate for the calculation of interest) as calculated by the Calculation Agent on the relevant Interest Determination Date, in accordance with the following formula, and the resulting percentage will be rounded, if necessary, to the fourth decimal place, with 0.00005% being rounded upwards:

$$\left[\prod_{i=1}^{d_o} \left(1 + \frac{\text{Relevant ZARONIA}_{i-5\text{JBD}} \times n_i}{365} \right) - 1 \right] \times \frac{365}{d}$$

where:

“**d**” is the number of calendar days in the relevant Interest Period;

“**do**” is the number of Johannesburg Business Days in the relevant Interest Period;

“**i**” is, in relation to any Interest Period, a series of whole numbers from one to do, each representing the relevant Johannesburg Business Day in chronological order from (and including) the first Johannesburg Business Day in such Interest Period;

“**Johannesburg Business Day**” or “**JBD**” means a day (other than a Saturday, a Sunday or an official public holiday) on which commercial banks are open for general business in Johannesburg, South Africa;

“**ni**”, for any Johannesburg Business Day “**i**” in the relevant Interest Period, means the number of calendar days from and including such Johannesburg Business Day “**i**” up to but excluding the following Johannesburg Business Day;

“**Publication Time**” means at or about 10.00 a.m. (Johannesburg time) or any amended publication time for the final intraday refix of ZARONIA specified by the SARB, as the administrator of ZARONIA (or any successor administrator of ZARONIA);

“**Relevant ZARONIA_i – 5JBD**” means, in respect of any Johannesburg Business Day “**i**” falling in the relevant Interest Period, the ZARONIA Reference Rate for the Johannesburg Business Day (being a Johannesburg Business Day falling in the relevant ZARONIA Observation Period) falling 5 (five) Johannesburg Business Days prior to the relevant Johannesburg Business Day “**i**”;

“**SARB**” means the South African Reserve Bank;

“**SARB’s Website**” means the website of the SARB currently at <http://www.resbank.co.za>, any successor website of the SARB (or a successor administrator of ZARONIA) or any successor source;

“**ZARONIA**” means the South African Overnight Index Average administered by the SARB (known as ZARONIA);

“**ZARONIA Observation Period**” means, in respect of the relevant Interest Period, the period

from (and including) the date falling 5 (five) Johannesburg Business Days prior to the first day of such Interest Period (and the first Interest Period shall begin on (and include) the Interest Commencement Date) and ending on (but excluding) (a) the date falling 5 (five) Johannesburg Business Days prior to the Interest Payment Date for such Interest Period (and the last Interest Period shall end on (but exclude) the Maturity Date), or (b) the date falling 5 (five) Johannesburg Business Days prior to such earlier date, if any, on which the Notes become due and payable; and

“ZARONIA Reference Rate” means, in respect of any Johannesburg Business Day, a reference rate equal to the daily ZARONIA rate for such Johannesburg Business Day as published by the SARB, as the administrator of ZARONIA (or any successor administrator of ZARONIA), on the SARB’s Website, in each case at the Publication Time on the Johannesburg Business Day immediately following such Johannesburg Business Day.

For the avoidance of doubt, the formula for the calculation of Compounded Daily ZARONIA only compounds the ZARONIA Reference Rate in respect of any Johannesburg Business Day. The ZARONIA Reference Rate applied to a day that is not a Johannesburg Business Day will be taken by applying the ZARONIA Reference Rate for the previous Johannesburg Business Day.

2. If, in respect of any Johannesburg Business Day in the relevant ZARONIA Observation Period, the ZARONIA Reference Rate is not available on the SARB’s Website, such ZARONIA Reference Rate shall be:
 - (a) the daily ZARONIA rate last published on the SARB’s Website for the first preceding Johannesburg Business Day on which the ZARONIA rate was published on the SARB’s Website (the **“Previous Day’s ZARONIA”**); or
 - (b) if Previous Day’s ZARONIA is not available, the sum of (i) the SARB Policy Rate prevailing at close of business on such Johannesburg Business Day, and (ii) the mean of the spread of the ZARONIA Reference Rate to the SARB Policy Rate over the previous 5 (five) Johannesburg Banking Days on which a ZARONIA Reference Rate has been published (after eliminating the highest such spread (or, in the event of equality, one of the highest) and the lowest such spread (or in the event of equality, one of the lowest)).

For the purposes of this paragraph **“SARB Policy Rate”** means, in respect of any relevant day (including any day “i”), the repo rate (or any successor rate) which is the main policy rate of the SARB as determined and set by the monetary policy committee of the SARB and published by the SARB from time to time, in effect on that day.

3. In the event that the Interest Rate cannot be determined in accordance with the foregoing provisions of this Schedule 1, the Interest Rate shall be:
 - (a) that determined as at the last preceding Interest Determination Date (though substituting, where a different Margins to be applied to the relevant Interest Period from that which applied to the last preceding Interest Period, the Margin relating to the relevant Interest Period, in place of the Margin relating to that last preceding Interest Period); or
 - (b) if there is no such preceding Interest Determination Date, the initial Interest Rate which would have been applicable to such Series of Notes for the first Interest Period had the Notes been in issue for a period equal in duration to the

scheduled first Interest Period but ending on (and excluding) the Interest Commencement Date (but applying the Margin applicable to the first Interest Period).

4. If the relevant Series of Notes become due and payable in accordance with Condition 7 (*Redemption*), Condition 25 (*Events of Default*) or, in accordance with item 52(b) of this Applicable Pricing Supplement, the final Interest Determination Date shall, notwithstanding any Interest Determination Date specified in the Applicable Pricing Supplement, be deemed to be the date on which such Notes became due and payable and the Interest Rate on such Notes shall, for so long as any such Note remains outstanding, be that determined on such date.

ANNEX D

ADDITIONAL RISK FACTORS RELATING TO ZARONIA

The market continues to develop in relation to ZARONIA as a reference rate for Floating Rate Notes

Investors should be aware that the market continues to develop in relation to ZARONIA as a reference rate in the capital markets and its adoption as alternatives to JIBAR. In addition, market participants and relevant working groups are exploring alternative reference rates based on ZARONIA, including a term ZARONIA reference rate (which seeks to measure the market's forward expectation of an average ZARONIA rate over a designated term). The development of ZARONIA rates as interest reference rates for the South African bond market, as well as continued development of ZARONIA based rates for such market and the market infrastructure for adopting such rates, could result in reduced liquidity or increased volatility or could otherwise affect the market price of the Notes.

The use of ZARONIA as a reference rate for bonds in the South African capital markets continues to develop both in terms of the substance of the calculation and in the development and adoption of market infrastructure for the issuance and trading of bonds referencing ZARONIA.

The market or a significant part thereof may adopt an application of ZARONIA that differs significantly from that set out in the Terms and Conditions as applicable to the Notes. Furthermore, the Issuer may in future issue Notes referencing ZARONIA that differ materially in terms of interest determination when compared with the Notes. In addition, the manner of adoption or application of ZARONIA reference rates in the South African bond market may differ materially compared with the application and adoption of ZARONIA in other markets, such as the derivatives and loan markets. Noteholders should carefully consider how any mismatch between the adoption of ZARONIA reference rates across these markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of Notes referencing ZARONIA.

ZARONIA differs from JIBAR in a number of material respects and has a limited history

ZARONIA differs from JIBAR in a number of material respects, including that ZARONIA is a backwards-looking, risk-free overnight rate, whereas JIBAR is expressed on the basis of a forward-looking term and includes a risk-element based on inter-bank lending. As such, investors should be aware that ZARONIA may behave materially differently as interest reference rates for the Notes, compared to JIBAR.

The future performance of ZARONIA may be difficult to predict based on the limited historical performance. The level of ZARONIA during the term of the Notes may bear little or no relation to the historical level of ZARONIA. Prior observed patterns, if any, in the behaviour of market variables and their relation to ZARONIA such as correlations, may change in the future.

Furthermore, the Interest Rate is only capable of being determined immediately prior to the relevant Interest Payment Date. It may be difficult for Noteholders to estimate reliably the amount of interest which will be payable on the Notes, and some investors may be unable or unwilling to trade such Notes without changes to their IT systems, both of which factors could adversely impact the liquidity of the Notes.

The administrator of ZARONIA may make changes that could change the value of ZARONIA or discontinue ZARONIA

The South African Reserve Bank (or its successor), as administrator of ZARONIA, may make methodological or other changes that could change the value of ZARONIA, including changes related to the method by which ZARONIA is calculated, eligibility criteria applicable to the transactions used to calculate ZARONIA, or timing related to the publication of ZARONIA. In addition, the administrator may alter, discontinue or suspend calculation or dissemination of ZARONIA (in which case a fallback method of determining the interest rate on the Notes will apply).

The relevant administrator has no obligation to consider the interests of Noteholders when calculating, adjusting, converting, revising or discontinuing ZARONIA.
