

Descriptions of the new SENS System roles

Role	Description
User Access Administrator	This user can register new users for their company and update existing users
Sponsor Submitter	This role can be allocated to users at a sponsor company and allows them to create, rework, correct and retract announcements on behalf of their linked Issuers.
Issuer Submitter*	This role allows an Issuer to submit their own announcements. This role can only be allocated by the JSE.
Regulatory Submitter*	This role allows a regulatory body to submit announcements. This role can only be allocated by the JSE.
Issuer who can approve Sponsor Relationships	Every Issuer company will need at least one person with this role. This person will review and attest their linked Sponsors, who can submit on their company's behalf. This person can also add and manage temporary Authorised Sponsors who can act on their company's behalf.

*Certain roles can only be assigned by the JSE and are therefore not available for selection by users themselves
