FUTURES CONTRACT	BRENT CRUDE OIL QUANTO	COPPER QUANTO	GOLD QUANTO
Determination of final cash settlement value	<p>The final settlement price for cash settlement of the contract will require only a CME Group component, denominated in ZAR. There will be no foreign exchange rate adjustments.</p> <p>The CME Group settlement value (MTM) as published on the expiry date of the South African contract will be applied as the final cash settlement value. Due to the time difference the final cash settlement value published by CME will only be reflected the following business day for the final cash settlement process for remaining position holders. Should the ZAR expiry day fall on an unannounced CME non trading day, the final cash settlement will reference the next CME business days MTM.</p> <p>An example, the Aug12 expiry last trading day will be the 12th August, however since this falls on a weekend, the 10th Aug will be last trading day with the evening mtm based on local trading activity. That evening CME's MTM for the reference contract, in the case of QBRN the Sep12 MTM will then be used as the final cash settlement value of the contract processed on the 13th August 2012. Initial margin will be returned on the 14th August.</p> <p>The final ZAR settlement value will be rounded off to 2 decimals.</p> <p>The final ZAR settlement value will be publish via the trading system (NUTRON) the next business day and included in the end of day settlement prices.</p>		
Settlement method	Denominated and cash settled in South African Rands (ZAR).
