

Market Notice

Number: A1771A
Date 28 February 2013

Soybean delivery points including standardised storage rate for the 2013/2014 marketing season.

Firstly, further to notices A1626, A1745, A1760 and A1761 to register additional SOYA delivery points to the contract, no objections were received so hence the JSE has approved the applications and included the additional delivery points to the soya contract for the marketing season 1 March 2013 to 28 February 2014.

Attached is the list of 129 approved delivery points for the next marketing season.

Secondly, the SOYA standard storage rate will increase by 5.2% to **59 cents per ton per day** and is applied to outstanding storage for product delivered in completion of a futures contract. This process was defined via notice A1370 and is repeated as referencing the PPI figure as published at the end of December for standard storage rate.
